

Contents

1	Preparation of Solutions	1
1.1	Types of Solutions	1
1.1.1	Standard Solutions	1
1.1.2	Stock Solution	3
1.1.3	Saturated Solution	4
1.1.4	Solution of Acids	4
1.1.5	General Precautions	5
2	Expression of Concentration	9
2.1	Molarity (M)	9
2.2	Molality (m)	10
2.3	Normality (N)	10
2.4	Mass Concentration	11
2.5	Mass Fraction	12
2.6	Mass Percent % (w/w)	12
2.7	Percentage by Volume or % (v/v)	12
2.8	Parts per Million (ppm)	13
2.8.1	Preparation of 1,000 ppm Solutions	13
2.9	Parts per Billion (ppb)	14
2.10	Preparation of 10^{-1} – 10^{-10} M Solutions from 1 M Stock Solution by Serial Dilutions	14
2.11	Conversion of Molarities into ppm	15
2.12	Conversion of ppm to Parts per Hundred (%) ($\text{ppm} \times 10^{-6} \times 100$)	15
2.13	Preparation of One Molar (1 M) Solutions of Concentrated Acids	15
2.14	Formula to Calculate the Volume of Stock Solution Required to Prepare Solution of Desired Normality	16
2.15	Formula to Calculate Volume of Stock Solution Required to Prepare Solution of Desired Percentage	16

2.16	Formula to Calculate the Dilution Factor Used in Spectroscopic Estimations	17
2.17	Preparation of Standard Solution of Acids and Bases	17
2.17.1	Normal Solutions	18
2.18	Percentage Solutions.....	24
2.18.1	Reagents	24
2.18.2	Preparation	25
2.19	Ratio Solutions.....	25
2.20	Titration.....	26
3	Buffers and Their Preparation	29
3.1	Selection of Buffers	29
3.2	Acids and Bases	30
3.3	Concept of pH	30
3.4	Buffer System.....	33
3.5	Preparation of Buffers	34
3.6	Preparation of Some Commonly Used Buffers	34
4	Techniques in Biochemical Evaluation	39
4.1	Spectrophotometry.....	39
4.2	Measurement of pH with Glass Electrode	41
4.3	Chromatography	42
4.3.1	Types of Chromatographic Techniques	42
4.4	Centrifugation.....	62
4.5	Ultracentrifugation.....	63
4.6	Isotopic Methods	64
5	Carbohydrate Estimations.....	67
5.1	Classification of Carbohydrates	67
5.2	Qualitative Tests for Carbohydrates.....	68
5.2.1	Molisch's Test.....	68
5.2.2	Anthrone Test	69
5.2.3	Iodine Test	70
5.2.4	Barfoed's Test.....	70
5.2.5	Seliwanoff's Test.....	71
5.2.6	Fehling's Test	72
5.2.7	Benedict's Test.....	73
5.2.8	Picric Acid Test	73
5.2.9	Mucic Acid Test	74
5.2.10	Bial's Test.....	75
5.2.11	Quantitative Determination of Carbohydrates.....	75

6 Estimation of Lipids.....	77
6.1 Extraction, Separation and Estimation of Lipids from Oil Seed...	77
6.2 Determination of Saponification Value of Fats and Oils	79
6.3 Determination of Acid Value of Fats and Oils.....	80
6.4 Determination of Iodine Number of Fat.....	81
6.5 Solubility Test for Lipids.....	83
6.6 Acrolein Test for Glycerol	84
6.7 Qualitative Test for the Presence of Fatty Acids by Titrimetric Method	84
6.8 Test for Unsaturation of Fatty Acids in Lipid Sample.....	85
6.9 Separation of Different Lipid Fractions by Thin Layer Chromatography (TLC)	86
6.10 Separation and Identification of Lipids by Column Chromatography	87
6.11 Estimation of Fatty Acids by Gas-Liquid Chromatography	89
7 Qualitative and Quantitative Estimations of Amino Acids and Proteins.....	93
7.1 Qualitative Tests for Proteins.....	93
7.2 Nitrogen Estimation by Micro-Kjeldahl Method (FAO 1970).....	93
7.3 Sample Preparation for Amino Acid Estimation.....	98
7.4 Estimation of Total Free Amino Acids.....	100
7.5 Estimation of Proline	101
7.6 Lysine Estimation in Grains	102
7.7 Estimation of Lysine in Cereal Grains	103
7.8 Estimation of Methionine in Food Grains.....	105
7.9 Estimation of Tryptophan	106
7.10 In Vitro Protein Digestibility	107
7.11 Protein Efficiency and Net Protein Ratios	108
7.12 Determination of Net Protein Utilization, Digestibility and Biological Value	110
7.13 Protein Estimation by Lowry's Method	113
7.14 Polycrylamide-Sodium Dodecyl Sulphate Slab Gel Electrophoresis (SDS-PAGE) of Proteins.....	115
7.15 Fluorography of Polyacrylamide Gels	119
7.16 Quantification of Protein in Polyacrylamide Gels	122
7.17 Protein Electrophoresis Using Starch Gel.....	124
7.18 Isoelectric Focusing of Proteins	126
7.19 Western Blotting	128
7.20 Production of Antiserum	131
7.21 Immunodiffusion in Agarose Gels	133
7.22 Enzyme-Linked Immunosorbant Assay	136
7.23 Preparations of S-30 Extract for Protein Synthesis In Vitro	139
7.24 In Vitro Translation Assay	140
7.25 Ammonium Sulphate Fractionation of Proteins.....	142

7.26	Methods for Determining Amino Acid Sequences of Protein	142
7.26.1	Identification of the NH ₂ -Terminal Amino Acid	144
7.26.2	Identification of the COOH-Terminal Amino Acid.....	144
7.26.3	Cleavage of Protein into Smaller Units	146
8	Protein Purification Techniques.....	149
8.1	Protein Extraction Procedure	150
8.2	Ammonium Sulphate Fractionation	151
8.3	Ion-Exchange Chromatography	153
8.3.1	Selection of Ion-Exchange Matrix	153
8.4	Gel Filtration.....	157
8.5	Characterization of Proteins by SDS-PAGE	161
8.6	Protein Analysis by Reversed Phase HPLC.....	165
8.6.1	Separation of Proteins on C-18 Column	168
9	Cell Disruption and Fractionation	169
9.1	Homogenization Media.....	169
9.2	Cell Disruption.....	169
9.3	Fractionation of Tissue Homogenate.....	170
9.4	Isolation of Mitochondria.....	170
9.5	Isolation of Chloroplasts.....	173
10	Enzymes in Metabolism	175
10.1	Main Steps During Enzyme Purification	175
10.2	Preparation of Acetone Powder	177
10.3	Estimation of Activities of Some Important Enzymes.....	177
10.3.1	Malate Dehydrogenase (L-Malate: NAD ⁺ Oxidoreductase EC 1.1.1.37)	177
10.3.2	Glutamate Dehydrogenase (L-Glutamate: NAD Oxidoreductase (Deaminating) EC 1.4.1.2) (L-Glutamate: NADP Oxidoreductase (Deaminating) EC 1.4.1.4).....	178
10.3.3	Glutamate Synthase (L-Glutamate: NADP ⁺ Oxidoreductase (Transaminating) EC 1.4.1.13).....	180
10.3.4	Ascorbic Acid Oxidase (L-Ascorbate: Oxygen Oxidoreductase EC 1.10.3.3).....	181
10.3.5	Catalase (Hydrogen Peroxide: Hydrogen Peroxide Oxidoreductase EC 1.11.1.6).....	182
10.3.6	Nitrate Reductase (NADH: Nitrate Oxidoreductase EC 1.6.6.1 (NADH-Dependent)) (NAD(P)H: Nitrate Oxidoreductase EC 1.6.6.2 (NAD(P)H-dependent)) (NADPH: Nitrate Oxidoreductase EC 1.6.6.3 (NADPH-Dependent)).....	184

10.3.7	Nitrite Reductase (NAD(P)H: Nitrite Oxidoreductase EC 1.6.6.4)	185
10.3.8	Peroxidase (Donor: H ₂ O ₂ Oxidoreductase E.C. 1.11.1.17)	186
10.3.9	Polyphenol Oxidase (Monophenol, Dihydroxyphenylalanine: Oxygen Oxidoreductase EC 1.14.18.1).....	188
10.3.10	Indole Acetic Acid Oxidase	190
10.3.11	Lipase (Triacylglycerol Acylhydrolase EC 3.1.1.3)	191
10.3.12	Acetylcholine Esterase (Acetylcholine Hydrolase EC 3.1.1.7)	193
10.3.13	Pectin Methylesterase (Pectin Pectyl Hydrolase EC 3.1.1.11)	195
10.3.14	Aspartate Aminotransferase (Glutamate: Oxaloacetate Aminotransferase EC 2.6.1.1)	196
10.3.15	Alanine Aminotransferase (Glutamate: Pyruvate Aminotransferase EC 2.6.1.2)	198
10.3.16	Phosphatases (Orthophosphoric-Monoester Phosphohydrolase, Alkaline Medium 3.1.3.1) (Orthophosphoric-Monoester Phosphohydrolase, Acid Medium 3.1.3.2).....	199
10.3.17	Amylases (α -1,4 Glucan 4-Glucanohydrolase EC 3.2.1.1) and (α -1,4 Glucan Maltahydrolase EC 3.2.1.2)	201
10.3.18	Cellulases (1,4-(1,3;1,4): β -D-Glucan 4-glucanohydrolase EC 3.2.1.4).....	203
10.3.19	Polygalacturonase Activity (Poly 1,4- α -D-Galacturonide Glycanohydrolase EC 3.2.1.15)	205
10.3.20	Estimation of Papain (Papainase EC 3.4.22.2)	208
10.3.21	Phosphoenol Pyruvate Carboxylase (Orthophosphate: Oxaloacetate Carboxylase Phosphorylative EC 4.1.1.31)	210
10.3.22	Ribulose Biphosphate Carboxylase (3-Phospho D-Glycerate Carboxylase EC 4.1.1.39)	211
10.3.23	Phenylalanine Ammonia Lyase (L-Phenylalanine Ammonia Lyase EC 4.3.1.5).....	212
10.3.24	Glutamine Synthetase (L-Glutamate: Ammonia Ligase EC 6.3.1.2).....	213
10.3.25	Asparagine Synthetase (L-Aspartate; Ammonia Ligase EC 6.3.1.4).....	215
10.3.26	Lactate Dehydrogenase (L-Lactate: NAD Oxidoreductase, EC 1.1.1.27).....	216

10.3.27	Glutamate–Oxaloacetate Transaminase.....	218
10.3.28	Glutamate–Pyruvate Transaminase	221
10.3.29	Phosphatases.....	223
11	Isoenzyme Analysis	227
11.1	General Methodology for Isozyme Analysis.....	228
11.2	Isozyme Analysis of Esterase	228
11.3	Peroxidase	229
11.4	Polyphenol Oxidase (PPO)	229
11.5	Acid Phosphatase	229
11.6	Glutamine Synthetase.....	230
11.7	Phosphoenol Pyruvate Carboxylase	230
11.8	Glutamate Dehydrogenase.....	230
11.9	Indolacetic Acid Oxidase.....	231
11.10	Malate Dehydrogenase	231
12	Chromatographic Separations.....	233
12.1	Separation and Identification of Amino Acids by Descending Paper Chromatography	233
12.1.1	Principle	233
12.1.2	Reagents	233
12.1.3	Procedure	234
12.1.4	Observations and Calculations	235
12.1.5	Note.....	235
12.2	Separation and Identification of Amino Acids by Ascending Paper Chromatography.....	236
12.2.1	Reagents and Materials.....	236
12.2.2	Procedure	236
12.3	Separation and Identification of the Amino Acids by Two-Dimensional Paper Chromatography.....	237
12.3.1	Principle	237
12.3.2	Reagents	237
12.3.3	Procedure	238
12.4	Identification of Lipids by TLC	238
12.4.1	Principle	238
12.4.2	Reagents and Materials.....	239
12.4.3	Procedure	239
12.5	Separation of Pigments by Adsorption Column Chromatography.....	240
12.5.1	Principle	240
12.5.2	Materials and Reagents	240
12.5.3	Procedure	240
12.6	Separation and Identification of Sugars by Adsorption TLC	241
12.6.1	Principle	241

12.6.2	Reagents and Materials	242
12.6.3	Procedure	242
12.6.4	Note.....	243
12.7	Separation of Amino Acids by Ion Exchange Column Chromatography.....	244
12.7.1	Principle	244
12.7.2	Materials and Reagents	244
12.7.3	Procedure	244
12.8	Concentration of Dilute Protein Solutions with Sephadex G-25.....	245
12.8.1	Principle	245
12.8.2	Materials and Reagents	245
12.8.3	Procedure	246
12.9	Concentration of Dilute Protein by Column Chromatography using Sephadex G-25.....	247
12.9.1	Principle	247
12.9.2	Reagents.....	247
12.9.3	Procedure	247
12.10	Determination of Molecular Weight of Protein by Gel Filtration.....	248
12.10.1	Principle	248
12.10.2	Materials and Reagents.....	248
12.10.3	Procedure	249
13	Methods for Nutritional Quality Evaluation of Food Materials.....	251
13.1	Determination of Iron	251
13.2	Estimation of Protein Content by Micro-Kjeldahl Method.....	253
13.3	Estimation of Tryptophan	255
13.4	Estimation of Methionine	256
13.5	Estimation of Starch.....	257
13.6	Estimation of Amylose	258
13.7	Estimation of Gluten in Wheat.....	259
13.8	Estimation of Lysine	260
13.9	Protein Fractionation in Cereals	262
13.10	Estimation of Crude Fibre.....	264
13.11	Estimation of Dietary Fibre	265
13.12	Estimation of Oil Content in Oilseeds	266
13.13	Estimation of Fatty Acids by Gas-Liquid Chromatography (GLC).....	268
13.14	Determination of Lipase and Lipxygenase Activity	270
13.15	Estimation of Carotenoid Pigments	272
13.16	Estimation of Lycopene	276
13.17	Estimation of Chlorophylls.....	277

13.18	Estimation of Curcumin.....	279
13.19	Estimation of Thiamine	279
13.20	Estimation of Riboflavin	282
13.21	Estimation of Niacin	283
13.22	Estimation of Ascorbic Acid.....	284
13.23	Biological Evaluation of Protein Quality by Rat Feeding Experiments	287
13.24	Determination of In Vitro Protein Digestibility in Food Grains.....	292
13.25	Estimation of Blood Glucose and Cholesterol.....	294
13.26	Estimation of High Density Lipoprotein (HDL), Low Density Lipoprotein (LDL) and Very Low Density Lipoprotein (VLDL) Cholesterol in Serum.....	297
13.27	Estimation of Phenols	299
13.28	Chlorogenic Acid.....	300
13.29	Estimation of Tannins.....	301
13.30	Estimation of Lignin	303
13.31	Estimation of Capsaicin in Chillies	305
13.32	Estimation of Glucosinolates Content in Oil Seeds	306
13.33	Determination of Polyphenols in Pulse Grains	309
13.34	Estimation of Aldehydes in Food Stuffs.....	310
13.35	Estimation of ODAP	311
13.36	Assessment of Rancidity of Oil and Fats	312
13.37	Determination of Phytin Phosphorus.....	315
13.38	Estimation of Trypsin Inhibitor in Legumes.....	317
13.39	Estimation of Cyanogens.....	319
13.40	Estimation of Indoleacetic Acid.....	320
13.41	Estimation of Ethylene	321
14	Nutritional Evaluation of Forages	323
14.1	Preparation of Plant Extract for Analysis.....	323
14.2	Proximate Analysis of Forages.....	324
14.3	Estimation of Dry Matter (DM).....	327
14.3.1	DM in Bulk Samples	327
14.3.2	Dry Matter in Laboratory Samples	328
14.3.3	DM in Silage, Haylage and Molasses	329
14.4	Crude Protein (CP)	330
14.5	Determination of True Protein and Non-Protein Nitrogen	332
14.6	Estimation of Ammonia Nitrogen.....	333
14.7	Estimation of Urea Nitrogen	334
14.8	Estimation of Ether Extract (Crude Fat)	335
14.8.1	Preparation of Thimble	335
14.9	Determination of Crude Fibre (CF)	336
14.10	Estimation of Total Ash.....	338
14.11	Estimation of Acid Insoluble Ash.....	339

14.12	Nitrogen-Free Extract	341
14.13	Determination of Free Fatty Acids.....	341
14.14	Estimation of Fibre Fractions	342
14.14.1	Estimation of Neutral-Detergent Fibre (Determination of Cell Contents and Cell Wall Constituents).....	343
14.14.2	Determination of Acid-Detergent Fibre.....	344
14.15	Determination of Acid-Detergent Lignin	346
14.16	Permanganate Lignin, Cellulose and Silica.....	347
14.17	Estimation of Non-Starch Polysaccharides	350
14.17.1	Determination of Starch.....	350
14.18	Determination of Digestibility by In Vitro and In Sacco Techniques.....	351
14.18.1	In Vitro Dry Matter Digestibility	352
14.18.2	Modified Method of In Vitro Dry Matter Digestibility.....	353
14.19	Quantification of Tanins in Foliage	355
14.20	Method for Extraction of Tannins	356
14.21	Measurement of Total Phenolics and Tannins Using Folin–Ciocalteu Method	357
14.22	Determination of Condensed Tannins (Proanthocyanidins)	358
14.23	Gallotannin Determination by Rhodanine Assay	359
14.24	Gallotannin Determination Using HPLC	361
14.25	Determination of Protein-Precipitable Phenolics	362
14.26	Protein-Binding Capacity by Filter Paper Assay	364
14.27	Characterization of Phenolic Compounds by Thin Layer Chromatography (TLC)	365
14.28	Estimation of Nitrates and Nitrites	368
14.29	Estimation of Total Glucosinolates	370
14.30	Estimation of Oxalic Acid	371
14.31	Estimation of Trypsin Inhibitor in Forages	372
14.32	Estimation of Cyanogenic Glycosides	373
14.32.1	Qualitative Test.....	373
14.32.2	Titrimetric Method for Quantitative Test.....	373
14.33	Qualitative Estimation of Ricin	375
15	Techniques in Molecular Biology	377
15.1	Polymerase Chain Reaction (PCR).....	377
15.2	Isolation of Plant DNA	380
15.3	Isolation of RNA	383
15.4	Quantitative Estimation of DNA	385
15.5	Quantitative Estimation of RNA	386
15.6	Southern Blot Analysis of Plant DNA	387
15.7	Isolation of Plasmids	394

15.8	Rapid Isolation of Plasmid DNA.....	397
15.9	Miniprep of Plasmid DNA.....	399
15.10	Cultivation of Lambda (λ) Phage.....	401
15.11	Extraction Lambda DNA.....	403
15.12	Restriction (Digestion) of DNA.....	405
15.13	DNA Electrophoresis in Agarose Gel.....	407
15.14	Recovery of DNA Fragments from Agarose Gels.....	409
15.15	Isolation of mRNA by Affinity Chromatography.....	410
Appendix A Glossary.....		417
Appendix B Abbreviations.....		419
Appendix C Reference Tables.....		421
References.....		425
