vii Author biographies

CHAPTER 1

- 1 Type 2 diabetes: the modern epidemic**
- 1 Diagnosing diabetes
- 4 Prediction and prevention of type 2 diabetes

CHAPTER 2

- 9 Management of diabetes**
- 9 Goals of treatment
- 11 Shared care – the multidisciplinary approach
- 12 Healthy eating and weight control
- 15 Exercise

CHAPTER 3

- 19 Non-insulin agents in the management of type 2 diabetes**
- 20 Treatment goals
- 20 Pathogenesis of hyperglycemia in type 2 diabetes
- 22 Non-insulin antihyperglycemic agents
- 26 Selection of initial antihyperglycemic agents
- 28 Combination therapy
- 28 Conclusions

CHAPTER 4

- 31 Insulin in the management of type 2 diabetes**
- 31 Indications
- 31 Insulin secretion in individuals without diabetes
- 32 Types of insulin
- 34 Adverse effects
- 35 General principles of insulin regimens
- 38 Conclusion

CHAPTER 5

41 Complications of diabetes

41 Microvascular complications

42 Macrovascular complications

42 Role of insulin resistance in the pathogenesis of atherosclerosis

43 Impact of tight metabolic control on complications

43 Treatment goals to prevent diabetes complications

44 Prevention and management of specific diabetes complications

55 Screening for coronary heart disease

CHAPTER 6

59 Diabetic emergencies

59 Hyperglycemic crisis

66 Hypoglycemia

CHAPTER 7

67 Patient education

67 Goals of patient education

69 Monitoring glycemic control

70 Identifying and overcoming barriers to effective self-care

73 Patient resources

77 Index
