Preface

Chapter 1: Regulation: Peptides of the Gastrointestinal Tract

- General Characteristics
- Discovery
- Chemistry
- Distribution And Release
- Actions And Interactions
- Candidate Hormones
- Neurocrines
- Paracrines
- Summary

Chapter 2: Regulation: Nerves and Smooth Muscle

- Anatomy Of The Autonomic Nervous System
- Neurohumoral Regulation Of Gastrointestinal Function

Anatomy Of The Smooth Muscle Cell

Smooth Muscle Contraction

Summary

Chapter 3: Swallowing

Chewing

Pharyngeal Phase

Esophageal Peristalsis

Receptive Relaxation Of The Stomach

Summary

Chapter 4: Gastric Emptying

Anatomic Considerations

Contractions Of The Orad Region Of The Stomach

Contractions Of The Caudad Region Of The Stomach

Contractions Of The Gastroduodenal Junction

Contractions Of The Proximal Duodenum

Regulation Of Gastric Emptying

Summary

Chapter 5: Motility of the Small Intestine

Anatomic Considerations

Types Of Contractions

Patterns Of Contractions

Vomiting

Summary

Chapter 6: Motility of the Large Intestine

Anatomic Considerations

Contractions Of The Cecum And Ascending Colon

Contractions Of The Descending And Sigmoid Colon

Motility Of The Rectum And Anal Canal

Control Of Motility

Summary

Chapter 7: Salivary Secretion

Functions Of Saliva

Anatomy And Innervation Of The Salivary Glands

Composition Of Saliva

Regulation Of Salivary Secretion

Summary

Chapter 8: Gastric Secretion

Functional Anatomy

Secretion Of Acid

Origin Of The Electrical Potential Difference

Electrolytes Of Gastric Juice

Stimulants Of Acid Secretion

Stimulation Of Acid Secretion

Inhibition Of Acid Secretion

Pepsin

Mucus

Intrinsic Factor

Growth Of The Mucosa

Summary

Chapter 9: Pancreatic Secretion

Functional Anatomy

Mechanisms Of Fluid And Electrolyte Secretion

Mechanisms Of Enzyme Secretion

Regulation Of Secretion

Cellular Basis For Potentiation

Response To A Meal

Summary

Chapter 10: Bile Secretion and Gallbladder Function

Overview Of The Biliary System

Constituents Of Bile

Bile Secretion

Gallbladder Function

Expulsion Of Bile

Summary

Chapter 11: Digestion and Absorption of Nutrients

Structural-Functional Associations

Digestion

Absorption

Adaptation Of Digestive And Absorptive Processes

Carbohydrate Assimilation

Protein Assimilation

Lipid Assimilation

Vitamins

Summary

Chapter 12: Fluid and Electrolyte Absorption

Bidirectional Fluid Flux

Ionic Content Of Luminal Fluid

Transport Routes And Processes

Mechanism For Water Absorption And Secretion

Intestinal Secretion

Calcium Absorption

Iron Absorption

Summary

Chapter 13: Regulation of Food Intake

Appetite Control

The Nervous System

The Endocrine System

The Gastrointestinal System

Summary

Appendix

Index
