<i>Contributors</i>	VIII
<i>Preface</i>	XI
PART I: CELLULAR AND MOLECULAR BASIS FOR HEART FAILURE	
1. A brief primer on the development of the heart	1
<i>Serge Gregoire and Sean M. Wu</i>	
2. The genetics of dilated and hypertrophic cardiomyopathies	9
<i>Calum A. MacRae</i>	
3. Molecular signaling networks underlying cardiac hypertrophy and failure	31
<i>Gerald W. Dorn II</i>	
4. Excitation–contraction coupling in the normal and failing heart	43
<i>Matthew Coggins, Bernhard Haring, and Federica del Monte</i>	
5. Myocardial energetics and metabolism in the failing heart	64
<i>Joanne S. Ingwall</i>	
6. Animal models of heart failure	78
<i>William Carlson</i>	
PART II: PATHOPHYSIOLOGY OF HEART FAILURE	
7. Ventricular remodeling and secondary valvular dysfunction in heart failure progression	95
<i>Kibar Yared and Judy Hung</i>	
8. Neurohormonal and cytokine activation in heart failure	119
<i>Dennis M. McNamara</i>	
9. Cardiomyopathies in the adult	137
<i>Richard Rodeheffer</i>	
10. Water and salt: The cardiorenal syndrome	160
<i>Maria Rosa Costanzo</i>	

**PART III: THE DEMOGRAPHICS, DIAGNOSIS, AND MONITORING
OF HEART FAILURE**

- | | |
|--|------------|
| 11. The clinical syndrome of heart failure | 208 |
| <i>Thomas DiSalvo and Jordan Shin</i> | |
| 12. Clinical profiles and bedside assessment | 240 |
| <i>Lynne Warner Stevenson</i> | |
| 13. Prognosis in heart failure | 252 |
| <i>J. Susie Woo and Wayne C. Levy</i> | |
| 14. Biomarkers in heart failure | 264 |
| <i>Ravi V. Shah and Thomas J. Wang</i> | |
| 15. Noninvasive imaging modalities for the evaluation
of heart failure | 278 |
| <i>Kimberly A. Parks, Malissa J. Wood, Ian S. Rogers, and Godtfred Holmvang</i> | |
| 16. Role of invasive monitoring in heart failure: Pulmonary
artery catheters in the post-ESCAPE era | 313 |
| <i>W. H. Wilson Tang and Gary S. Francis</i> | |

PART IV: THE MEDICAL TREATMENT OF CLINICAL HEART FAILURE

- | | |
|--|------------|
| 17. Conventional therapy of chronic heart failure: Diuretics,
vasodilators, and digoxin | 320 |
| <i>G. William Dec</i> | |
| 18. Conventional therapy of chronic heart failure:
Beta-adrenergic blockers | 330 |
| <i>G. William Dec</i> | |
| 19. Angiotensin receptor blockers for heart failure | 341 |
| <i>George V. Moukarbel</i> | |
| 20. Anticoagulation in systolic heart failure | 353 |
| <i>Ronald S. Freudenberger</i> | |
| 21. Role of mineralocorticoid receptor antagonists in patients
with heart failure | 365 |
| <i>Mara Giattina and Flora Sam</i> | |
| 22. Treatment of heart failure with preserved ejection fraction | 377 |
| <i>Barry A. Borlaug</i> | |
| 23. Cardiac resynchronization therapy | 388 |
| <i>William T. Abraham</i> | |

CONTENTS	VII
24. Management of atrial and ventricular arrhythmias in heart failure	401
<i>Usha Tedrow and William G. Stevenson</i>	
25. Ultrafiltration for the management of volume overload	427
<i>Bradley A. Bart</i>	
26. Heart failure and palliative care	445
<i>Joshua M. Hauser and Robert O. Bonow</i>	
PART V: MOLECULAR AND BIOLOGIC THERAPIES	
27. Gene therapy for heart failure	457
<i>Stefan P. Janssens</i>	
<i>Index</i>	<i>475</i>
