

Contents

Introduction	1
1. The Flow of Energy in Living Systems	3
References	10
2. Origins: The Early Earth	11
General references	29
References	29
3. Force and Energy Explored	31
3.1 Gravitational force	36
3.2 The electromagnetic force	40
3.3 The strong nuclear force	43
3.4 The weak nuclear force	43
References	47
4. Which Way? An Introduction to Thermodynamics	48
General references	72
References	72
5. The Building Blocks	73
General references	108
References	108
6. How Fast, How Far? Chemical Kinetics and Equilibrium	109
General references	138
References	138
7. The Strange Story of Water and Oil	139
General references	161
References	161
8. Size Matters: Proteins and Enzymes	162
8.1 Principles of protein structure	162
8.2 Some very special molecules: enzymes	178
8.3 Regulation of enzyme activity	189
8.4 Coenzymes, vitamins, and enzyme classification	192
References	199
9. Molecular Genetics—the Chemical Basis of Heredity	200
General references	222
10. Electron Gymnastics: Energy Revisited	223
10.1 How many ATP molecules are produced when electrons traverse the entire ETC?	233
10.2 What about the rotary engine?	234
References	249

x Contents

11. Cells and Metabolism: Putting it all Together	250
11.1 General aspects of metabolism	250
11.2 Glycolysis	254
11.3 The reactions of glycolysis	257
11.4 The pentose phosphate pathway	265
11.5 The citric acid or tricarboxylic acid cycle	266
11.6 Regulation of the citric acid cycle	271
General references	273
References	273
12. From Prokaryotes to Eukaryotes: Getting Ready for Multicellular Life	274
General references	286
References	286
13. Multicellular Life: The Last Hurdle?	287
13.1 Multicellularity arrives	287
13.2 The evolution of plants	290
13.3 The evolution of fungi	294
13.4 The evolution of animals	296
13.5 The organization of the mammalian body	300
General references	302
References	302
Appendix A Electromagnetic Radiation	303
Appendix B Glycolysis: Chemical Structures of Intermediates	311
Appendix C TCA Cycle: Chemical Structures of Intermediates	312
Appendix D The Calvin Cycle in Photosynthesis, Showing Chemical Structures of the Intermediates, and the Enzymes Involved in each Step	313
Appendix E Amino Acid Structures	315
Index	319
