Guided tour	xii
Introduction	xvi
Acknowledgements	xviii

Chapter 1 What is caring? 1

Introduction	1
Learning objectives	2
What do we mean by 'caring'?	2
Quality	10
The assessment process	20
Summary	27
Key points	28
Points for debate	28
Links to other chapters	28
Further reading	29
References	29

Chapter 2 Dignity and privacy 31

Introduction	31
Learning objectives	32
Dignity in care	32
Culturally sensitive healthcare	40
Communication	41
Communicating with non-English-speaking patients	45
Protecting individuals from abuse	46
Summary	59
Key points	60
Points for debate	60
Links to other chapters	61
Further reading	61
References	62

Chapter 3 Basic observations 63

Introduction	64
Learning objectives	64
The importance of basic observations	64
Pulse	67
Respirations	76

CONTENTS

Temperature	86
Summary	97
Key points	99
Points for debate	99
Links to other chapters	100
Further reading	100
References	100

Chapter 4 Hygiene 102

Introduction	102
Learning objectives	103
Personal hygiene	103
Oral hygiene	119
Infection control	121
Summary	127
Key points	127
Points for debate	128
Links to other chapters	128
Further reading	128
References	128

Chapter 5 Nutrition 130

Introduction	131
Learning objectives	131
The importance of good nutrition	131
Essential nutrients	132
Nutritional requirements	137
Factors affecting nutritional choice	139
Nutritional assessment	141
Nutrition in hospital	147
Feeding patients	150
Dysphagia awareness	153
Summary	161
Key points	161
Points for debate	162
Links to other chapters	162
Further reading	162
References	163

Chapter 6 Fluid balance and continence care 165

Introduction	165
Learning objectives	166
Fluid balance	166
Recording fluid balance	173
Urinary continence	179
Incontinence	184

Catheter care	197
Problems with elimination of faeces	201
Summary	208
Key points	209
Points for debate	210
Links to other chapters	210
Further reading	210
References	210

Chapter 7 Pain management 213

Introduction	214
Learning objectives	214
What is pain?	214
How is pain felt?	216
Government policy developments in pain management	220
Pain assessment	221
Pain perception	229
Pain management	236
Other methods of pain relief	248
Summary	252
Key points	253
Points for debate	253
Links to other chapters	254
Further reading	254
References	254

Chapter 8 Pressure ulcers 257

Introduction	257
Learning objectives	258
Why study pressure ulcers?	259
How and why pressure ulcers develop	261
Avoidance of pressure ulcers	266
Screening and assessing the possibility of skin damage due to pressure	269
Pressure ulcer healing	275
Summary	277
Key points	277
Points for debate	278
Links to other chapters	278
Further reading	278
References	278

Chapter 9 Rehabilitation and self-care 280

Introduction	281
Learning objectives	281
What is rehabilitation?	282

CONTENTS

Independence and self-care	286
Framework for rehabilitation nursing	291
Factors that impact on individual well-being	301
Summary	305
Key points	305
Points for debate	306
Links to other chapters	306
Further reading	306
References	306

Chapter 10 Record-keeping

308

Introduction	309
Learning objectives	309
Overview of record-keeping	309
The purpose of records	312
Legal aspects of record-keeping	314
Nursing documentation	318
Standards for record-keeping	325
Summary	330
Key points	331
Points for debate	332
Links to other chapters	332
Further reading	332
References	332
Index	335
