

CONTENTS

<i>Acknowledgements</i>	<i>xiii</i>
<i>Introduction to the Classic Edition: A brief history of developments</i>	<i>xiv</i>
1 Introduction: Cognitive theory of emotional disorders	1
<i>Beck's cognitive theory</i>	2
<i>The role of behaviour in cognitive theory</i>	5
<i>Cognitive model of panic</i>	7
<i>Clinical models and scientific theory</i>	7
<i>Experimental psychology of attention and emotion</i>	8
<i>Plan of the book</i>	13
PART I	
Emotion, attention and information processing	15
2 Attention: Basic conceptual and theoretical issues	17
<i>The search for a bottleneck</i>	18
<i>Capacity models of attention</i>	21
<i>Levels of control of attention</i>	25
<i>Connectionism and attention</i>	33
<i>Conclusions</i>	36
3 Attention: Selection of complex, personally significant and emotional stimuli	39
<i>Selection by schemas</i>	39

x Contents

	<i>Automaticity and social knowledge</i>	42
	<i>Attention and affective information</i>	47
	<i>Conclusions</i>	50
4	Attentional bias in emotional disorders	53
	<i>Depression</i>	55
	<i>Generalised anxiety</i>	58
	<i>Attentional bias in other anxiety disorders</i>	66
	<i>Anxiety and depression effects on other tasks</i>	69
	<i>Factors moderating the incidence of emotional bias</i>	74
	<i>Conclusions</i>	80
5	Affective bias in attention: Theoretical issues	83
	<i>Network models of affective bias: Bower (1981; 1987)</i>	84
	<i>Information-processing models of bias: Williams et al. (1988)</i>	87
	<i>Conclusions</i>	101
6	Emotional disorders: Attentional deficit	105
	<i>Attention deficits in depression</i>	105
	<i>Obsessive-compulsive states</i>	108
	<i>Anxiety, depression and the efficiency of attention in non-clinical samples</i>	111
	<i>Theoretical issues</i>	115
	<i>Performance deficit and cognitive content: Test-anxiety research</i>	116
	<i>Depressed mood</i>	119
	<i>Lack of energy</i>	121
	<i>Conclusions</i>	123
PART II		
Cognitive content and process in emotional disorder		125
7	Attentional content: Distressing intrusive thoughts	127
	<i>Varieties of thought in emotional disorders</i>	127
	<i>The content of thought in anxiety and depression</i>	131
	<i>Dimensions of worry and their measurement</i>	132
	<i>Thought management: Are some strategies counterproductive?</i>	134
	<i>Meta-cognitive beliefs and negative thinking</i>	137
	<i>Intrusions, obsessions and thought control</i>	138
	<i>The role of attention in theoretical accounts of worry</i>	139
	<i>Conclusions</i>	141

8	Interactionist approaches to stress	143
	<i>The transactional theory of stress</i>	143
	<i>Social aspects of stress processes</i>	154
	<i>Stress, arousal and performance</i>	161
	<i>Error and cognitive failures</i>	164
	<i>Conclusions</i>	169
9	Self-focused attention	171
	<i>Definition and measurement of self-focus</i>	172
	<i>Causes of self-focus</i>	177
	<i>Consequences of self-focus</i>	179
	<i>Self-focus and psychopathology</i>	184
	<i>Self-focus and depression</i>	185
	<i>Self-focus and anxiety</i>	188
	<i>Addictive behaviours: Alcohol and drug use</i>	195
	<i>Conclusions</i>	196
10	Attention manipulations: Moderating influences in treatment?	198
	<i>Distraction and depression</i>	199
	<i>Distraction and anxiety</i>	201
	<i>Emotional processing and attention</i>	207
	<i>Attentional training</i>	209
	<i>Eye-movement desensitisation</i>	211
	<i>Conclusions</i>	212
11	Attentional disorder: Cause or consequence of emotional problems?	214
	<i>Experimental studies</i>	215
	<i>Longitudinal studies of depression, anxiety and cognition</i>	217
	<i>Longitudinal studies of depression: Conclusions</i>	219
	<i>Longitudinal studies of anxiety</i>	221
	<i>Studies comparing trait and state effects</i>	222
	<i>Studies of recovered patients</i>	226
	<i>Conclusions</i>	229
PART III		
New theoretical model and clinical implications		231
12	Theoretical integration	233
	<i>Self-attention and emotional distress</i>	233
	<i>The cognitive-attentional syndrome</i>	234

xii Contents

<i>An integrative attentional model of emotional distress</i>	234
<i>Effects of SREF processing on attention and self-knowledge</i>	236
<i>Factors affecting choice and control of action</i>	238
<i>Emotional distress</i>	244
<i>The effect of distraction in treatment: A new perspective</i>	245
<i>Explanations for attentional phenomena</i>	249
<i>Automatisation</i>	251
<i>Explaining performance data: Consequences of biasing of plans</i>	253
<i>Consequences of resource limitation</i>	257
<i>Summary of the model</i>	259
13 Clinical implications	261
<i>Behavioural and cognitive therapies</i>	261
<i>Accounting for existing therapy effects in the SREF model</i>	264
<i>New implications for cognitive therapy</i>	267
<i>Secondary “emotion”</i>	271
<i>Stimulus considerations in treatment</i>	272
<i>Modifying on-line SREF activity</i>	272
<i>Procedures and goals</i>	273
<i>Conclusions: A summary of specific treatment implications</i>	273
14 Conclusions	276
<i>Overview of theoretical issues</i>	276
<i>Further experimental research</i>	281
<i>The role of psychobiological processes</i>	285
<i>Clinical issues</i>	291
References	297
