<i>About the cover</i>	page ix
<i>List of contributors</i>	xi
<i>Foreword by Bruce R. Levin</i>	xiv
<i>Preface</i>	xvii
1 Phages, ecology, evolution	1
<i>Stephen T. Abedon</i>	
Part I Phage ecology	
2 Bacteriophages: models for exploring basic principles of ecology	31
<i>Benjamin Kerr, Jevin West, and Brendan J. M. Bohannan</i>	
3 Phage population growth: constraints, games, adaptation	64
<i>Stephen T. Abedon</i>	
4 Impact of spatial structure on phage population growth	94
<i>Stephen T. Abedon and John Yin</i>	
5 Contribution of lysogeny, pseudolysogeny, and starvation to phage ecology	114
<i>Robert V. Miller and Martin J. Day</i>	
Part II Phage evolutionary biology	
6 Phage evolutionary biology	147
<i>Siobain Duffy and Paul E. Turner</i>	

7	Phage evolution	177
	<i>Roger W. Hendrix</i>	
8	Evolutionary ecology of multiple phage adsorption and infection	195
	<i>Paul E. Turner and Siobain Duffy</i>	
9	Patterns in phage experimental adaptation	217
	<i>J. J. Bull</i>	
	Part III Phage ecology in environments	
10	Aquatic phage ecology	251
	<i>T. Frede Thingstad, Gunnar Bratbak, and Mikal Heldal</i>	
11	Phage ecology of terrestrial environments	281
	<i>Martin J. Day and Robert V. Miller</i>	
12	Phages, bacteria, and food	302
	<i>Lawrence D. Goodridge</i>	
13	Interaction of bacteriophages with animals	332
	<i>Carl R. Merrill</i>	
14	Phage ecology of bacterial pathogenesis	353
	<i>Paul Hyman and Stephen T. Abedon</i>	
	Part IV Modeling phage ecology	
15	Modeling bacteriophage population growth	389
	<i>David Stopar and Stephen T. Abedon</i>	
16	Modeling phage plaque growth	415
	<i>Stephen M. Krone and Stephen T. Abedon</i>	
17	Modeling of bacteriophage therapy	439
	<i>Jason J. Gill</i>	
	<i>Index</i>	465

Color plate section appears between pages 46 and 47.
