<i>Foreword by Henry D. Schlinger, Jr.</i>	xiii
<i>Preface</i>	xv
1 A Science of Behavior: Perspective, History, and Assumptions	1
Science and Behavior	2
New Directions: Behavior Analysis and Neuroscience	7
Focus On: Burrhus Frederic Skinner	11
A Brief History of Behavior Analysis	14
Science and Behavior: Some Assumptions	21
Chapter Summary	25
2 The Experimental Analysis of Behavior	29
Functional Analysis of Behavior	29
Functional Analysis of the Environment	32
Tactics of Behavioral Research	36
New Directions: Operant Baselines and Behavioral Neuroscience	41
Single-Subject Research	42
Advanced Section: Perceiving as Behavior	46
Chapter Summary	50
3 Reflexive Behavior and Respondent Conditioning	55
Phylogenetic Behavior	55
Ontogenetic Behavior	60
New Directions: Neuroscience and Learning in Honey Bees	66
Temporal Relations and Conditioning	69
Second-Order Respondent Conditioning	72
On the Applied Side: Drug Use, Abuse, and Respondent Conditioning	73
Note On: Physiology and the Control of Preparatory Responses by Conditioned Stimuli	73
Advanced Section: Complex Conditioning	76
The Rescorla–Wagner Model of Conditioning	77
Focus On: The Rescorla–Wagner Equation	79
Chapter Summary	81
4 Reinforcement and Extinction of Operant Behavior	85
Operant Behavior	85
Focus On: Rewards and Intrinsic Motivation	89
Operant Conditioning	93
New Directions: Behavioral Neuroscience and Operant Conditioning of the Neuron	94
Focus On: Reinforcement and Problem Solving	103
Extinction	106

On the Applied Side: Extinction of Temper Tantrums	112
Chapter Summary	113
5 Schedules of Reinforcement	117
Importance of Schedules of Reinforcement	117
Focus On: C. B. Ferster and Schedules of Reinforcement	118
Behavior Analysis: A Progressive Science	119
Comment On: Inner Causes, Schedules, and Response Patterns	121
Focus On: A System of Notation	123
Schedules of Positive Reinforcement	124
Ratio and Interval Schedules of Reinforcement	126
Focus On: Generality of Schedule Effects	131
Note On: VI Schedules, Reinforcement Rate, and Behavioral Momentum	134
Schedule Performance in Transition	138
On the Applied Side: Schedules and Cigarettes	139
Advanced Section: Schedule Performance	141
Chapter Summary	148
6 Aversive Control of Behavior	153
Aversive Control in Everyday Life	153
Contingencies of Punishment	156
Focus On: Use of Punishment in Treatment	161
Note On: The Legal and Ethical Use of Electric Shock in a Residential Treatment Program	163
Punishment: Permanence and Paradox	165
Focus On: Physical Punishment and Mental Disorders	167
Contingencies of Negative Reinforcement	168
Focus On: Escape and Infant Caregiving	171
Determinants and Analysis of Avoidance Behavior	175
Side Effects of Aversive Procedures	178
New Directions: Social Defeat and Behavioral Neuroscience	182
On the Applied Side: Coercion and its Fallout	188
Chapter Summary	189
7 Operant–Respondent Interrelationships: The Biological Context of Conditioning	193
Analysis of Operant–Respondent Contingencies	194
Note On: Operants and Respondents	202
The Biological Context of Conditioning	203
New Directions: Behavioral Neuroscience, Taste Aversion, and Urges for Addictive Behavior	205
On the Applied Side: Activity Anorexia and Interrelations between Eating and Physical Activity	212
Advanced Section: The Nature of Autosshaped Responses	216
Chapter Summary	218

8 Stimulus Control	223
Differential Reinforcement and Discrimination	224
New Directions: Stimulus Control, Neuroscience, and What Birds See	226
Focus On: Discrimination and the “Bird-Brained” Pigeon	229
Behavioral Contrast	231
Generalization	233
On the Applied Side: Peak Shift in Anorexia Nervosa	236
Errorless Discrimination and Fading	238
Complex Stimulus Control	241
Focus On: Concept Formation by Pigeons	246
On the Applied Side: Quality Control and Detection of Signals by Animals	248
Chapter Summary	251
9 Choice and Preference	255
Experimental Analysis of Choice and Preference	255
The Matching Law	260
Extensions of the Matching Law	263
Matching on Single Operant Schedules	265
On the Applied Side: Application of the Quantitative Law of Effect	267
Choice, Foraging, and Behavioral Economics	269
Behavioral Economics, Choice, and Addiction	273
Focus On: Activity Anorexia and Substitutability of Food and Wheel Running	275
Advanced Section: Quantification of Choice and Generalized Matching	281
New Directions: Behavioral Neuroscience, Matching, and Sensitivity	288
Chapter Summary	289
10 Conditioned Reinforcement	293
Note On: Clicker Training	294
Chain Schedules and Conditioned Reinforcement	294
Focus On: Backward Chaining	296
Conditioned Reinforcement: Determinants and Analysis	297
New Directions: Neuroscience and Conditioned Reinforcement	301
Information and Conditioned Reinforcement	302
Delay Reduction and Conditioned Reinforcement	307
Generalized Conditioned Reinforcement	310
On the Applied Side: The Token Economy	315
Advanced Section: Quantification and Delay Reduction	316
Chapter Summary	319
11 Correspondence Relations: Imitation and Rule-Governed Behavior	323
Correspondence and Human Behavior	323
Correspondence and Spontaneous Imitation	325
Imitation in the Laboratory	327
Infant Imitation Research	330
New Directions: Behavioral Neuroscience, Mirror Neurons, and Imitation	333

Correspondence, Generalized Imitation, and Observational Learning	337
On the Applied Side: Training Generalized Imitation	340
Focus On: Rules, Observational Learning, and Self-Efficacy	344
Rule-Governed Behavior	345
Focus On: Instructions and Contingencies	349
Chapter Summary	353
12 Verbal Behavior	357
Language and Verbal Behavior	357
Focus On: Speaking and Evolution of the Vocal Tract	358
Verbal Behavior: Some Basic Distinctions	360
Operant Functions of Verbal Behavior	364
Research on Verbal Behavior: Manding and Tacting	366
Additional Verbal Relations: Intraverbals, Echoics, Textuals, and Autoclitics	371
Focus On: Higher-Order Verbal Classes and the Naming Relation	376
Analysis of Complex Behavior and Communication in the Laboratory	378
Note On: Universal Grammar	378
Symbolic Behavior and Stimulus Equivalence	384
New Directions: Behavioral Neuroscience and Derived Conceptual Relations	389
On the Applied Side: Three-Term Contingencies and Natural Speech	392
Advanced Section: A Formal Analysis of Manding and Tacting	393
Chapter Summary	396
13 Applied Behavior Analysis	399
Characteristics of Applied Behavior Analysis	400
Research Strategies in Applied Behavior Analysis	405
Contingency Management and Substance Abuse	409
Note On: Contingency Management and Online Help Resources	410
Behavior Analysis in Education	414
Applications of Behavior Principles	418
New Directions: Autism, Mirror Neurons, and Applied Behavior Analysis	421
Causes and Prevention of Behavior Problems	425
Focus On: Conditioned Overeating and Childhood Obesity	428
On the Applied Side: MammaCare—Detection and Prevention of Breast Cancer	430
Chapter Summary	434
14 Three Levels of Selection: Biology, Behavior, and Culture	439
Level 1: Evolution and Natural Selection	440
Genetic Regulation of Behavior	442
Focus On: Genetic Control of a Fixed-Action Pattern	442
Level 2: Selection by Reinforcement	447
Focus On: Operant Regulation in the Marine Snail, <i>Aplysia</i>	449
New Directions: Evolution, Environment, and the Obesity Crisis	451
Evolution, Reinforcement, and Verbal Behavior	455
Level 3: Selection and Evolution of Culture	459

Focus On: Depleting Resources, Punishment, and Communication	461
Origin, Transmission, and Evolution of Cultural Practices	463
Chapter Summary	466
<i>Glossary</i>	469
<i>References</i>	503
<i>Author index</i>	557
<i>Subject index</i>	575
