What Is the <i>DSM</i> ?	54
Bipolar Categories in the <i>DSM-5</i>	57

4. The Mood Disease	58
Before “Bipolar”	58
Dr. Kraepelin and “Manic-Depressive Insanity”	60
Dr. Cade and Lithium	63
PART II TREATMENT	69
5. The Plastic Brain	71
6. Mood-Stabilizing Medications	77
Lithium	77
Lamotrigine (Lamictal)	86
Valproate (Depakote, Depakene, Epival)	89
Carbamazepine (Tegretol, Equetro, Eptol)	92
Oxcarbazepine (Trileptal)	94
Other Mood Stabilizers	95
On the Horizon: Promising New Approaches	96
7. Antidepressant Medications	98
Tricyclic Antidepressants	98
Selective Serotonin Reuptake Inhibitors	100
New Antidepressants	101
Monoamine Oxidase Inhibitors	102
Treating Bipolar Depression	104
8. Antipsychotic Medications	107
Typical Antipsychotic Medications	108
Atypical Antipsychotic Medications	110
9. More Medications, Hormones, and Dietary Supplements	115
Medications for Anxiety and Sleep Disturbances	115
Thyroid Hormones	117
Herbal Preparations and Nutritional Supplements	119
Omega-3 Fatty Acids and Fish Oil	120
N-Acetyl Cysteine	120
St. John’s Wort	121
10. Brain-Stimulation Treatments	124
Electroconvulsive Therapy	124
Transcranial Magnetic Stimulation	130
Vagal Nerve Stimulation	132
Emerging Technologies	132

11. Counseling and Psychotherapy	134
Brain and Mind	135
What Can Therapy Do?	137
Group Psychotherapy	138
Individual Therapy for Depression	139
New Psychotherapies for Bipolar Disorder	142
“Traditional” Individual Psychotherapy	144
Psychotherapy in Bipolar Disorder: Is It Really Necessary?	146
The Psychiatrist-Psychotherapist: An Extinct Species?	147
12. Treatment Approaches in Bipolar Disorder	148
Therapeutic Results as a Guide to Treatment	148
Some Principles of Treatment	151
PART III VARIATIONS, CAUSES, AND CONNECTIONS	159
13. Bipolar Disorder in Children and Adolescents	161
Symptoms of Pediatric Bipolar Disorder	163
Bipolar Disorder and Attention-Deficit Hyperactivity Disorder	164
Treatment and Prognosis	165

Symptom Differences in Women	169
Postpartum Mood Disorders and Family Planning	170
Premenstrual Syndromes	172
15. Alcoholism and Drug Abuse	174
Bipolar Binges	174
Effect, Cause, or Association?	178
Use or Abuse?	178
A Deadly Combination	179
Treating Substance Abuse and Addiction	180
16. The Science of Cycles: Chronobiology	184
Circadian Rhythms	186
Seasonal Affective Disorder	188
The Sleep Cycle and Bipolar Disorder	189
17. The Genetics of Bipolar Disorder	193
Genes, Chromosomes, and DNA	193
Genetic Diseases	195
What We Know	195
The Search Continues	196

18. Bipolar Biology	198
How the Body Handles Stress	198
Bipolar Disorder and Hormonal Systems	202
Picturing Bipolar Disorder in the Brain	203
19. Bipolar Disorder and Creativity	207
PART IV GETTING BETTER AND STAYING WELL	215
20. Living with Bipolar Disorder	217
Confront and Accept the Illness	217
Practice Mood Hygiene	220
Build Your Support System	226
Don't Be a "Bipolar Victim"	228
21. Planning for Emergencies	231
Know Whom to Call for Help	234
Insurance Issues	235
Safety Issues and Hospitalization	237
22. The Role of the Family	239
Recognizing Symptoms	239
Involuntary Treatment and Other Legal Issues	244
More on Safety	246
Getting Support	247
23. Looking Ahead	250
Resources	255
Suggested Reading	255
Support and Advocacy Organizations	256
Internet Resources	257
Notes	261
Index	279
