<i>Preface . . . . .</i>	<i>v</i>
<i>Acknowledgment . . . . .</i>	<i>vii</i>
<i>Contributors . . . . .</i>	<i>xv</i>
<b>1. Copper and Copper Alloys . . . . .</b>	<b>1</b>
<i>    Harold T. Michels</i>	
Introduction . . . . .	1
Copper: Properties of the Element . . . . .	1
Pure Copper . . . . .	2
Copper Alloys . . . . .	2
Properties of Copper Alloys . . . . .	2
Copper Alloy Families . . . . .	4
The High Coppers . . . . .	4
Conclusions . . . . .	6
<b>2. Corrosion Chemistry of Copper: Formation of Potentially Skin-Diffusible Compounds . . . . .</b>	<b>7</b>
<i>    Jurij J. Hostýnek</i>	
Introduction . . . . .	7
Electron Configuration and Reactivity of Copper . . . . .	8
Corrosion of Copper in the Environment . . . . .	8
Corrosion of Copper in Physiologic Media . . . . .	9
Conclusions . . . . .	15
Glossary . . . . .	16
Abbreviations . . . . .	16
References . . . . .	16

<b>3. Basics of Metal Skin Penetration:</b>	
<b>Scope and Limitations</b>	21
<i>Jurij J. Hostýnek and Howard I. Maibach</i>	
Introduction	21
Structure of Skin and Its Function as Diffusion Barrier	23
Descriptors of Dermal Absorption	25
Permeant Categories and Paths of Diffusion	28
Compounds Formed by Metals in Contact with the Skin	31
Variables Determining Skin Diffusion of Metal Compounds	35
Methods for Measuring Percutaneous Absorption	45
Analytical Methods for Metal Detection	53
Summary and Conclusions	56
Abbreviations	57
References	58
<b>4. Percutaneous Absorption of Copper Compounds</b>	67
<i>Jurij J. Hostýnek and Howard I. Maibach</i>	
Introduction	67
Qualitative Diffusion Data	68
Semiquantitative Data	70
Quantitative Data	71
Discussion and Conclusions	73
Limitations in Measuring Copper Absorption In Vivo	74
Interdependence of Systemic Copper and Zinc Levels	75
Recommendations for Research to Fill Existing Data Gaps	76
Conclusions	77
Glossary	78
Abbreviations	78
References	79
<b>5. Diffusion of Copper Through Human Skin</b>	
<b>In Vivo</b>	81
<i>Jurij J. Hostýnek, Howard I. Maibach, and Frank Dreher</i>	
Introduction	81
Experimental	84
Results	85

Discussion . . . . .	88
Conclusions . . . . .	92
Glossary . . . . .	93
Abbreviations . . . . .	93
References . . . . .	94
<b>6. Irritation Potential of Copper Compounds . . . . .</b>	<b>97</b>
<i>Jurij J. Hostýnek and Howard I. Maibach</i>	
Introduction . . . . .	97
Exposure to Copper . . . . .	97
Solubilization of Copper Metal . . . . .	98
Incidence and Epidemiology of Irritation Due to Copper . . . . .	100
Pharmacology of Copper . . . . .	101
Copper Irritancy in Skin and Mucosa . . . . .	103
Conclusions . . . . .	111
Abbreviations . . . . .	112
References . . . . .	112
<b>7. Copper Hypersensitivity: Dermatologic Aspects—Overview . . . . .</b>	<b>115</b>
<i>Jurij J. Hostýnek and Howard I. Maibach</i>	
Introduction . . . . .	115
Metallurgy of Copper and Its Alloys, and Its Role as Sensitizer . . . . .	117
Predictive Immunology Test Results for Copper . . . . .	119
Diagnostic Tests for Hypersensitivity . . . . .	119
Test Concentrations for Copper ACD . . . . .	123
Immunogenic Potential of Copper . . . . .	123
Summaries of Population-Based Studies . . . . .	134
Summary of Selected Case Reports of Immune Reactions to Copper . . . . .	138
Selection of Individual Reports of Immune Reactions to Copper . . . . .	138
Comments . . . . .	140
Conclusions . . . . .	140
Abbreviations . . . . .	141
References . . . . .	141

<b>8. Copper in Medicine and Personal Care:</b>	
<b>A Historical Overview . . . . .</b>	<b>149</b>
<i>Roberto Milanino</i>	
Introduction . . . . .	149
The Sumeric Culture: Circa 4000–2300 B.C. . . . .	150
The Ancient Egyptian Culture . . . . .	150
The Babylonian–Assyrian Culture:	
Circa 1750–539 B.C. . . . .	152
The Ancient Indian Culture: Circa 2800–1000 B.C. . . . .	152
The Ancient Chinese Culture: Circa 3000 B.C.	
to 1100 A.D. . . . .	152
The Pre-Columbian Meso- and South-American Cultures:	
Circa 600 B.C. to 1500 A.D. . . . .	153
The Ancient Greek Culture . . . . .	153
The Ancient Roman Culture: Circa 600 B.C.	
to 476 A.D. . . . .	155
From the High-Medieval Age to the Early	
20th Century . . . . .	156
Beginning of the Scientific Age for Copper:	
1928–1976 . . . . .	157
Conclusions . . . . .	158
Abbreviations . . . . .	159
References . . . . .	159
<b>9. The Role of Copper in Onset, Development, and</b>	
<b>Control of Acute and Chronic Inflammation . . . . .</b>	<b>161</b>
<i>Roberto Milanino</i>	
Introduction . . . . .	161
Studies on Copper-Deficient, Experimentally	
Inflamed Animals . . . . .	163
Laboratory Animals: Studies on “Endogenous” Copper	
Metabolism in Acute and Chronic Inflammation . . . . .	170
Human Subjects: Studies on “Endogenous” Copper Metabolism	
in Acute and Chronic Inflammations, with a Particular	
Reference to Rheumatoid Arthritis . . . . .	179
Effects of “Exogenous” Copper Administration on the	
Inflammatory Process . . . . .	184
Copper Anti-inflammatory Activity: Hypotheses Explaining	
the Possible Mechanisms of Action . . . . .	203
Conclusions . . . . .	216

Abbreviations . . . . .	219
References . . . . .	220
<b>10. Copper Jewelry and Arthritis . . . . .</b>	<b>237</b>
<i>Brenda J. Harrison</i>	
Introduction . . . . .	237
The Copper Bracelet “Myth” and Hypothesis . . . . .	239
The Copper Bracelet Trial . . . . .	243
The Present State of the Copper Bracelets “Issue” . . . . .	251
Is There Likely to Be a Future for Copper Bracelets in Arthritis Care? . . . . .	256
Appendix A: Position Statements of Support Organizations, Government Agencies, Etc. . . . .	257
Appendix B: Miscellany . . . . .	259
References . . . . .	261
<b>11. Role of Copper in Anti-inflammatory Therapy and the Potential for Its Transdermal Application . . . . .</b>	<b>267</b>
<i>Jurij J. Hostýnek and Roberto Milanino</i>	
Introduction . . . . .	267
Traditional and Modern Therapies for RA and Related Disorders . . . . .	268
Drug Therapy . . . . .	271
Precedents in Topical Delivery of Anti-inflammatory Agents . . . . .	275
Role of Copper in AI Activity . . . . .	275
Past Use of Copper Chelates in the Treatment of Rheumatoid Arthritis . . . . .	278
Transdermal Delivery of Anti-inflammatory Copper Chelates vs. Conventional (Systemic) Anti-inflammatory Therapy . . . . .	278
Conclusions . . . . .	286
Outlook . . . . .	288
Abbreviations . . . . .	288
References . . . . .	289
<i>Index . . . . .</i>	295
