

# Contents

<b>1.</b>	<b>Anatomy and Physiology of Respiratory System .....</b>	<b>1</b>
1.1	Overview .....	1
1.2	Ventilation Parameters .....	3
Lung Volumes .....	3	
Capacities: Combined Volumes .....	3	
1.3	Lung Mechanics .....	6
<b>2.</b>	<b>The Model of Respiratory System .....</b>	<b>9</b>
2.1	Vocal Tract Model .....	9
The Acoustic <i>L</i> .....	11	
Acoustic <i>C</i> .....	11	
Acoustic <i>R</i> .....	12	
Acoustic <i>G</i> .....	12	
2.2	Respiratory Sound Generation and Transmission .....	14
<b>3.</b>	<b>Breath Sounds Recording .....</b>	<b>17</b>
<b>4.</b>	<b>Breath Sound Characteristics .....</b>	<b>19</b>
<b>5.</b>	<b>Current Research in Respiratory Acoustics .....</b>	<b>23</b>
5.1	Respiratory Flow Estimation .....	23
5.2	Heart Sound Cancelation .....	27
5.3	Heart Sound Localization .....	32
Comparison Between the Heart Sound Localization Methods .....	37	
<b>6.</b>	<b>Nonlinear Analysis of Lung Sounds for Diagnostic Purposes .....</b>	<b>41</b>
<b>7.</b>	<b>Adventitious Sound Detection .....</b>	<b>45</b>
7.1	Common Symptomatic Lung Sounds .....	45
<b>8.</b>	<b>Acoustic Mapping and Imaging of Thoracic Sounds .....</b>	<b>51</b>
