

Contents

1	Classification of Periodontal Diseases	1
1.1	Gingival Diseases	1
1.2	Diseases of the Tooth Supporting Structures.....	4
1.2.1	Chronic Periodontitis	7
1.2.2	Aggressive Periodontitis.....	8
1.2.3	Systemic Disease Forms of Periodontitis	9
1.2.4	Necrotizing Forms of Periodontitis.....	9
1.2.5	Developmental or Acquired Deformities and Conditions	10
1.3	Essentialistic or Nominalistic Disease Classification.....	11
2	Evidence for the Role of Genetic Variants in Periodontitis	15
2.1	Study of Inherited Diseases and Genetic Syndromes	16
2.2	Family Studies	17
2.3	Twin Studies.....	18
2.4	Population Studies	18
3	A Gene Mutation of Major Effect on Human Disease and Its Association with Periodontitis	21
3.1	Papillon-Lefèvre Syndrome.....	22
3.2	Haim-Munk Syndrome	23
3.3	Ehlers-Danlos Syndrome	24
3.4	Cyclic Neutropenia	24
3.5	Familial Neutropenia	25
3.6	Chediak-Highachi Syndrome.....	25
3.7	Leukocyte Adhesion Deficiency.....	25
3.8	Congenital Disorder of Glycosylation Type IIc CDG-IIc (Also Known as LAD II)	27
4	Modifying Disease Genes in Relation to Periodontitis	31
4.1	Interleukin-1 Gene Polymorphisms	31
4.1.1	Interleukin-1 Genotype and Experimental Gingivitis.....	32
4.1.2	Interleukin-1 Genotype and Chronic Periodontitis.....	34

4.1.3	Interleukin-1 Genotype and Aggressive Periodontitis.....	38
4.1.4	Interleukin-1 Genotype and Smoking.....	38
4.1.5	Interleukin-1 Genotype and IL-1 Levels.....	39
4.1.6	Interleukin-1 Genotype and Periodontal Treatment.....	40
4.1.7	Interleukin-1 Genotype and Ethnicity.....	42
4.1.8	Interleukin-1 Genotype and Oral Implants.....	42
4.2	Interleukin-2 Gene Polymorphisms.....	44
4.3	Interleukin-4 Gene Polymorphisms.....	45
4.4	Interleukin-6 Gene Polymorphisms.....	45
4.5	Interleukin-10 Gene Polymorphisms.....	46
4.6	Interleukin-12 Gene Polymorphisms.....	48
4.7	Interleukin-18 Gene Polymorphisms.....	48
4.8	Transforming Growth Factor- β (TGF- β) Gene Polymorphisms.....	50
4.9	Fc Receptor Polymorphisms.....	51
4.10	Tumor Necrosis Factor- α	57
4.11	Human Leukocyte Antigen Polymorphisms.....	58
4.12	CD14 Gene Polymorphisms.....	61
4.13	Toll like receptor, TLR2 and TLR4 Gene Polymorphisms.....	64
4.14	CARD15/NOD2 Gene Polymorphisms.....	65
4.15	<i>N</i> -Formyl-L-Methionyl-L-Leucyl-L-Phenylalanine Receptor Polymorphisms.....	68
4.16	Matrix Metalloproteinase Polymorphisms.....	70
4.17	Cathepsin C Polymorphisms.....	76
4.18	Vitamin D Receptor Polymorphisms.....	77
4.19	Calcitonin Gene Polymorphism.....	81
4.20	RANK/Osteoprotegerin Gene Polymorphism.....	81
4.21	Plasminogen Activator Gene Polymorphism.....	84
4.22	NAT2 (<i>N</i> -acetyltransferase) Gene Polymorphism.....	85
4.23	Fibrinogen Gene Polymorphism.....	87
4.24	Estrogen Receptor- α Gene Polymorphism.....	88
4.25	Cytochrome P450 Gene Polymorphism.....	89
4.26	RAGE (Receptor of Advanced Glycation End-Products) Gene Polymorphism.....	90
4.27	CCR5 (Crotonyl Coenzyme Reductase 5) Gene Polymorphism.....	91
4.28	Lactoferrin Gene Polymorphism.....	92
4.29	Interferon- γ Gene Polymorphisms.....	93
5	Heritability of Chronic Periodontitis.....	113
6	Heritability of Aggressive Periodontitis.....	117
7	Heritability of Gingivitis.....	121
8	Heritability of Peri-Implantitis.....	125

9 Common Guidelines for Association Studies	127
9.1 Ethnic Heterogeneity	127
9.2 Clinical Classification	128
9.3 Functional Polymorphisms	128
9.4 Sample Size of the Study Subjects	128
9.5 Choice of Controls	129
9.6 Data Presentation	129
10 Clinical Utility of Genetic Knowledge	131
Index	133
