PART I Fundamentals of Human Genome Epidemiology Revisited

1. Human Genome Epidemiology: The Road Map Revisited 3
*Muin J. Khoury, Sara R. Bedrosian, Marta Gwinn,
Julian Little, Julian P. T. Higgins, and John P. A. Ioannidis*
2. Principles of Analysis of Germline Genetics 13
Jesus Gonzalez-Bosquet and Stephen J. Chanock
3. The Public Health Genomics Enterprise 36
Philippa Brice and Ron Zimmern
4. Navigating the Evolving Knowledge of Human Genetic
Variation in Health and Disease 63
Marta Gwinn and Wei Yu

PART II Methods and Approaches for Data Collection, Analysis, and Integration

5. The Global Emergence of Epidemiological Biobanks: Opportunities
and Challenges 77
Paul R. Burton, Isabel Fortier, and Bartha M. Knoppers
6. Case-Control and Cohort Studies in the Age of Genome-wide
Associations 100
Teri Manolio
7. The Emergence of Networks in Human Genome
Epidemiology: Challenges and Opportunities 120
*Daniela Seminara, Muin J. Khoury, Thomas R. O'Brien,
Teri Manolio, Marta Gwinn, Julian Little, Julian P. T. Higgins,
Jonine L. Bernstein, Paolo Boffetta, Melissa L. Bondy,
Molly S. Bray, Paul E. Brenchley, Patricia A. Buffler,
Juan Pablo Casas, Anand P. Chokkalingam, John Danesh,*

<p><i>George Davey Smith, Siobhan M. Dolan, Ross Duncan, Nelleke A. Gruis, Mia Hashibe, David J. Hunter, Marjo-Riitta Jarvelin, Beatrice Malmer, Demetrius M. Maraganore, Julia A. Newton-Bishop, Elio Riboli, Georgia Salanti, Emanuela Taioli, Nic Timpson, André G. Uitterlinden, Paolo Vineis, Nick Wareham, Deborah M. Winn, Ron Zimmern, and John P. A. Ioannidis</i></p>	
8. Design and Analysis Issues in Genome-wide Association Studies	136
<p><i>Duncan C. Thomas</i></p>	
9. The Challenge of Assessing Complex Gene–Environment and Gene–Gene Interactions	165
<p><i>Peter Kraft and David J. Hunter</i></p>	
10. STrengthening the REporting of Genetic Association Studies (STREGA)—an Extension of the STROBE Statement	188
<p><i>Julian Little, Julian P. T. Higgins, John P. A. Ioannidis, David Moher, France Gagnon, Erik von Elm, Muin J. Khoury, Barbara Cohen, George Davey Smith, Jeremy Grimshaw, Paul Scheet, Marta Gwinn, Robin E. Williamson, Guang Yong Zou, Kimberley Hutchings, Candice Y. Johnson, Valerie Tait, Miriam Wiens, Jean Golding, Cornelia M. van Duijn, John McLaughlin, Andrew Paterson, George Wells, Isabel Fortier, Matthew Freedman, Maja Zecevic, Richard A. King, Claire Infante-Rivard, Alexandre Stewart, and Nick Birkett</i></p>	
11. Integration of the Evidence on Gene-Disease Associations: Methods of HuGE Reviews	215
<p><i>Julian P. T. Higgins and Julian Little</i></p>	
12. Genome-wide Association Studies, Field Synopses, and the Development of the Knowledge Base on Genetic Variation and Human Diseases	227
<p><i>Muin J. Khoury, Lars Bertram, Paolo Boffetta, Adam S. Butterworth, Stephen J. Chanock, Siobhan M. Dolan, Isabel Fortier, Montserrat Garcia-Closas, Marta Gwinn, Julian P. T. Higgins, A. Cecile J. W. Janssens, James M. Ostell, Ryan P. Owen, Roberta A. Pagon, Timothy R. Rebbeck, Nathaniel Rothman, Jonine L. Bernstein, Paul R. Burton, Harry Campbell, Anand P. Chokkalingam, Helena Furberg, Julian Little, Thomas R. O'Brien, Daniela Seminara, Paolo Vineis, Deborah M. Winn, Wei Yu, and John P. A. Ioannidis</i></p>	

PART III Case Studies: Cumulative Assessment of the Role of Human Genome Variation in Specific Diseases

13. Colorectal Cancer 249
Harry Campbell, Steven Hawken, Evropi Theodoratou, Alex Demarsh, Kimberley Hutchings, Candice Y. Johnson, Lindsey Masson, Linda Sharp, Valerie Tait, and Julian Little
14. Childhood Leukemias 278
Anand P. Chokkalingam and Patricia A. Buffler
15. Bladder Cancer 299
Jonine D. Figueroa, Montserrat Garcia-Closas, and Nathaniel Rothman
16. Type 2 Diabetes 326
Eleftheria Zeggini and Mark I. McCarthy
17. Osteoporosis 337
André G. Uitterlinden, Joyce B. J. van Meurs, and Fernando Rivadeneira
18. Preterm Birth 357
Siobhan M. Dolan
19. Coronary Heart Disease 369
Adam S. Butterworth, Julian P. T. Higgins, Nadeem Sarwar, and John Danesh
20. Schizophrenia 390
Lars Bertram

PART IV Applications of Epidemiologic Methods for Using Genetic Information in Medicine and Public Health

21. Mendelian Randomization: The Contribution of Genetic Epidemiology to Elucidating Environmentally Modifiable Causes of Disease 407
George Davey Smith and Shah Ebrahim
22. Evaluation of Predictive Genetic Tests for Common Diseases: Bridging Epidemiological, Clinical, and Public Health Measures 445
A. Cecile J. W. Janssens, Marta Gwinn, and Muin J. Khoury

23. The Evaluation of Genomic Applications in Practice and Prevention (EGAPP) Initiative: Methods of the EGAPP Working Group 458
Steven M. Teutsch, Linda A. Bradley, Glenn E. Palomaki, James E. Haddow, Margaret Piper, Ned Calonge, W. David Dotson, Michael P. Douglas, and Alfred O. Berg
24. Rapid, Evidence-based Reviews of Genetic Tests 482
James M. Gudgeon, Glenn E. Palomaki, and Marc S. Williams
25. Role of Social and Behavioral Research in Assessing the Utility of Genetic Information 497
Saskia C. Sanderson, Christopher H. Wade, and Colleen M. McBride
26. Assessing the Evidence for Clinical Utility in Newborn Screening 517
Scott D. Grosse
27. The Role of Epidemiology in Assessing the Potential Clinical Impact of Pharmacogenomics 533
David L. Veenstra
28. The Human Epigenome and Cancer 551
Mukesh Verma
29. The Use of Family History in Public Health Practice: The Epidemiologic View 579
Rodolfo Valdez, Muin J. Khoury, and Paula W. Yoon

PART V Case Studies: Assessing the Use of Genetic Information in Practice for Specific Diseases

30. Cytochrome P450 Testing in the Treatment of Depression 597
Iris Grossman, Mugdha Thakur, and David B. Matchar
31. A Rapid-ACCE Review of *CYP2C9* and *VKORC1* Allele Testing to Inform Warfarin Dosing in Adults at Elevated Risk for Thrombotic Events to Avoid Serious Bleeding 620
Monica R. McClain, Glenn E. Palomaki, Margaret Piper, and James E. Haddow
32. Hereditary Hemochromatosis: Population Screening for Gene Mutations 639
Diana B. Petitti
- Index 657
