<b>1 Immunocytochemical Techniques . . . . .</b>	<b>1</b>
Introduction . . . . .	1
Fixation . . . . .	2
Washing and Dehydration . . . . .	6
Embedding and Polymerization with the LR White . . . . .	7
LR Gold . . . . .	10
Lowicryl Resin for Embedding Samples . . . . .	11
Methacrylate . . . . .	12
Mounting, Trimming and Sectioning . . . . .	13
Collecting and Mounting Light and Transmission Electron Microscope Sections . . . . .	16
TEM Sections . . . . .	16
Light Microscopic Sections . . . . .	17
Immunocytochemical Staining Protocols . . . . .	19
Blocking Step . . . . .	19
Antibody Step . . . . .	20
Wash Steps . . . . .	23
Secondary Antibody . . . . .	24
Light Microscopy-Immunogold-Silver . . . . .	24
Fluorescence Markers . . . . .	25
Final Washes . . . . .	25
Silver Intensification . . . . .	26
Post Stains . . . . .	27
Photography and Subsequent Plate Formation . . . . .	28
TEM Photography . . . . .	29
Double Labeling . . . . .	29
Quantification and Statistics . . . . .	30
Pre-embedding Immunogold . . . . .	31
More Radical Approaches to Pre-embedding . . . . .	35

Other Questions/Problems that are Often Encountered in Immunocytochemical Studies . . . . .	36
The Basic Procedure . . . . .	36
References . . . . .	38
Introduction to Section 2 . . . . .	41
References for Introduction to Section 2 . . . . .	41
<b>2 Chloroplast Proteins . . . . .</b>	<b>43</b>
General Structural Features of Chloroplasts . . . . .	43
Distribution of RuBisCo. . . . .	44
Photosystem, Light-Harvesting Complexes and Other Thylakoid Proteins . . . . .	45
Chloroplast Development . . . . .	47
Sites of Plastid Protein Uptake . . . . .	48
Chloroplast Lipids . . . . .	49
The Enigma of Nitrate Reductase . . . . .	49
Summary . . . . .	50
References . . . . .	50
<b>3 Peroxisomes . . . . .</b>	<b>53</b>
Structure and General Functions . . . . .	53
Distribution of Peroxisomal Proteins . . . . .	54
Ureide-Producing Nodules . . . . .	55
Peroxisomal Biogenesis . . . . .	55
The Unique Cell Plate Peroxisomes . . . . .	57
Summary . . . . .	58
References . . . . .	58
<b>4 Cell Walls and Golgi . . . . .</b>	<b>61</b>
Introduction . . . . .	61
Polyclonal Antibodies . . . . .	62
Development of Monoclonal Antibodies. . . . .	63
Distribution of Polysaccharides in the Primary Wall . . . . .	67
Formation of the Cell Plate. . . . .	68
Transfer Cell Walls . . . . .	68
Gelatinous Fibers in Trees . . . . .	70
Parasitic Weeds. . . . .	70
Biology of Vines and Movement Phenomenon . . . . .	72
Abscission of Leaves and Stems . . . . .	74
Trichomes and Cotton Fibers . . . . .	75
Pollen . . . . .	77
Effects of Herbicides . . . . .	77
Nodules . . . . .	78
Lower Land Plants . . . . .	79

Contents	xi
Masking of Epitopes . . . . .	79
Affinity and Enzyme-Gold Probes . . . . .	80
Studies of Golgi Vesicles . . . . .	82
Wall Proteins . . . . .	84
Other Useful Techniques . . . . .	84
Sodium m-Periodate Treatment . . . . .	84
PATAg Procedure . . . . .	84
PTA Reaction . . . . .	85
Literature Cited . . . . .	85
<b>5 The Nucleus . . . . .</b>	91
Antibodies and Probes . . . . .	93
Antibodies to Bromo-deoxyuridine . . . . .	97
Additional Useful Techniques . . . . .	98
Cytochemical protocols . . . . .	98
References . . . . .	99
<b>6 The Cytoskeleton . . . . .</b>	103
Microtubules . . . . .	105
Post-translational Modifications of Tubulin . . . . .	110
Microtubule Organizing Centers . . . . .	110
Microtubule Disrupters . . . . .	112
Calmodulin and Other Proteins Often Found in Microtubule Arrays . . . . .	113
Actin . . . . .	113
Actin Binding Proteins . . . . .	116
Cytoskeletal Elements in the Plasmodesmata . . . . .	117
References . . . . .	117
