Preface	v
Contributors	vii
1 Kinins: History and outlook	1
<i>Michael Bader</i>	
2 Molecular and genetic aspects of the kallikrein-kinin system	7
2.1 Introduction.....	7
2.2 Kinins and kininogens	7
2.3 Kallikreins	10
2.4 Kininases	14
2.5 Kinin receptors	18
2.6 Genetics of the kallikrein-kinin system	19
<i>François Alhenc-Gelas and Jean Pierre Girolami</i>	
3 Kinin receptor signaling and regulation.....	33
3.1 Introduction.....	33
3.2 Kinin receptor structures.....	33
3.3 Kinin binding sites in the receptors	33
3.4 Receptor maturation and cellular distribution	34
3.5 Receptor signaling	35
3.6 Receptor regulation	38
<i>L. M. Fredrik Leeb-Lundberg</i>	
4 Animal models in the kinin field	51
4.1 Introduction.....	51
4.2 Animal models for the study of kinins	51
4.3 Animal models for the kinin B ₁ receptor	52
4.4 B ₂ receptor transgenic models	57
4.5 B ₁ and B ₂ receptor knockout model	60
4.6 Summary	63
<i>Vicencia M.T. Sales, Lauro T. Turaça, and João B. Pesquero</i>	
5 Drugs in the kallikrein-kinin system	69
5.1 Introduction.....	69
5.2 Plasma kallikrein inhibitors.....	69
5.3 Tissue kallikrein inhibitors	71
5.4 B ₂ R antagonists.....	71
5.5 B ₂ R agonists.....	74
5.6 B ₁ R antagonists.....	75
5.7 B ₁ R agonists.....	76
5.8 ACE inhibitors.....	76
5.9 Vasopeptidase inhibitors.....	77

5.10	Other considerations	77
5.11	Conclusions and perspectives.....	78
	<i>François Marceau</i>	
6	Kallikrein-kinin system in the brain	85
6.1	Introduction	85
6.2	Kallikrein-kinin system and kinins in neural tissue and brain.....	85
6.3	Kinin receptors.....	87
6.4	Kallikrein-kinin system and neuronal diseases.....	91
	<i>Mami Noda</i>	
7	The role of the renal kallikrein-kinin system in physiology and pathology	103
7.1	The kidney has its own kallikrein-kinin system.....	103
7.2	Kidney development	104
7.3	Renal physiology.....	105
7.4	Renal pathology	107
7.5	Glomerular injury	107
7.6	Tubulointerstitial fibrosis	108
7.7	Conclusion.....	110
	<i>Julie Klein, Bénédicte Buffin-Meyer, Joost P. Schanstra, and Jean-Loup Bascands</i>	
8	Kallikrein-kinin system in the heart	117
8.1	Introduction	117
8.2	The local cardiac KKS under physiological conditions.....	117
8.3	The role of the KKS in diabetic cardiopathy.....	118
8.4	The role of the KKS post myocardial infarction and on cardiac left ventricular remodeling.....	123
8.5	The role of the KKS in post ischemic angiogenesis, neovascularization, and stem cell recruitment.....	126
8.6	Conclusion.....	127
	<i>Frank Spillmann and Carsten Tschöpe</i>	
9	Kallikrein-kinin system in the vessel wall.....	137
9.1	Introduction	137
9.2	KKS implication in control of vascular tone.....	137
9.3	The rise and plunge of vasodilatory theory: a suspended verdict	140
9.4	Involvement of the KKS in vessel growth	141
9.5	Involvement of the KKS in atherosclerotic vessel wall remodeling and vascular repair.....	143
	<i>Paolo Madeddu and Nicolle Kräinkel</i>	
10	Kallikreins and kinin receptors: modulators of skin homeostasis.....	155
10.1	The skin: a defensive barrier	155
10.2	Kallikreins, kinins, and kinin receptors in the skin.....	156

10.3	The tissue kallikrein family: true tissue kallikrein (<i>KLK1/hK1</i>) and kallikrein-related peptidases (<i>KLK2-KLK15/hk2-hK15</i>).....	157
10.4	Kinin receptors and EGFR transactivation.....	160
10.5	Kinin receptors and keratinocyte differentiation <i>Carola E. Matus, Kanti D. Bhoola, and Carlos D. Figueroa</i>	161
11	Kallikrein-kinin system in the eye	171
11.1	Introduction	171
11.2	The anatomy of the eye	171
11.3	The ocular KKS.....	173
11.4	Effects of kinins on ocular functions	175
11.5	Potential role of the KKS in ocular diseases.....	180
11.6	Summary and conclusion	181
	<i>Takeshi Kita and Edward P. Feener</i>	
12	Kallikrein-kinin system in reproductive organs	187
12.1	Introduction	187
12.2	Detection of a tissue kallikrein-kinin system in the male reproductive organs	187
12.3	Detection of a tissue KKS in the female reproductive organs.....	195
12.4	Conclusions	197
	<i>Thomas Monsees</i>	
13	The Kallikrein-kinin system and thrombosis	203
13.1	Introduction	203
13.2	Plasmatic coagulation	203
13.3	FXII and the intrinsic pathway of blood coagulation	204
13.4	Deficiency in contact factors protects from thrombosis.....	206
13.5	Role of contact factors for thromboembolic disease in humans	207
13.6	Putting the contact into contact activation	209
13.7	Polyphosphates: the endogenous activator of FXII in thrombosis	210
	<i>Thomas Renné</i>	
14	Kinins: kallikreins and kinins in cancer	217
14.1	Introduction	217
14.2	Kallikrein-kinin cascade in cancer	217
14.3	The kinin system and tumor microenvironment.....	220
14.4	The kinin system in carcinogenesis.....	222
14.5	True tissue kallikrein and kinin receptors in human tumors	225
14.6	Kallikrein-related peptidases (<i>KLK2-KLK15/hK2-KLK15</i>)	234
	<i>Pamela Ehrenfeld, Carlos D. Figueroa, and Kanti D. Bhoola</i>	
15	Kallikrein-kinin system in pain	247
15.1	Introduction	247
15.2	Kinins and inflammatory pain.....	248
15.3	Kinins and visceral pain	250

15.4	Kinins and neuropathic pain.....	251
15.5	Kinins and cancer/chemotherapy pain.....	253
15.6	Kinins and itch	254
15.7	Concluding remarks	255
	<i>João B. Calixto, Rafael C. Dutra, Allisson F. Bento, Rodrigo Marcon, and Maria M. Campos</i>	
16	Kallikrein-kinin system in inflammation	261
16.1	Introduction	261
16.2	The KKS in inflammation.....	262
16.3	B ₂ R and the initiation of inflammation.....	263
16.4	B ₁ R and the progression of inflammation.....	265
16.5	B ₁ R and monocytes/macrophages.....	267
16.6	KKS and the adaptive immune response	268
16.7	Conclusion.....	269
	<i>Johan Duchene and Amrita Ahluwalia</i>	
17	Kallikrein-kinin system in diabetes	273
17.1	Introduction	273
17.2	KKS and diabetic nephropathy.....	273
17.3	Kallikrein and diabetic nephropathy	277
17.4	KKS and diabetic neuropathy.....	277
17.5	KKS and diabetic retinopathy.....	278
17.6	Nitric oxide mediates the beneficial effect of KKS on diabetic complications	278
17.7	Role of oxidative metabolism in preventing diabetic complications by KKS.....	279
17.8	Therapeutic implications	280
17.9	Conclusions	281
	<i>Masao Kakoki and Oliver Smithies</i>	
18	Kallikrein-kinin system in angioedema	289
18.1	Angioedema.....	289
18.2	Bradykinin and the pathogenesis of angioedema	292
18.3	Bradykinin as target of angioedema therapy	297
	<i>Marco Cicardi and Massimo Cugno</i>	
19	Kinins in bacterial infections	307
19.1	Introduction	307
19.2	Kinin release by microorganisms	307
19.3	Kinin release by proteases	308
19.4	Kinin release at the surface of the microorganism.....	311
19.5	Processing of kinins.....	312
19.6	Kinin receptor regulation.....	313
19.7	Pathological consequences of kinin release by bacterial pathogens	314
19.8	Clinical aspects	315
19.9	Concluding remarks	315
	<i>Jan Potempa and Heiko Herwald</i>	

20 The kallikrein-kinin system in parasitic infections.....	321
20.1 Introduction	321
20.2 Chagas' disease and the KKS	321
20.3 Leishmaniasis and KKS	330
<i>Julio Scharfstein and Erik Svensjö</i>	
21 Kallikrein-kinin system in ischemic stroke and brain trauma.....	337
21.1 Introduction	337
21.2 Kallikrein-kinin system in ischemic stroke	339
21.3 Kallikrein-kinin system in traumatic brain injury.....	346
21.4 Perspective	348
<i>Christoph Kleinschnitz</i>
