Contents

Preface iii

PART I: General Principles of Toxicology

1. General Considerations ***3***
Definition and Purpose of Toxicology 3
Scope and Subdisciplines 4
Early Developments 5
Recent Developments 6
Some Challenges and Successes 8
Toxicity vs. Other Considerations 9
Future Prospects 10
References 11
Appendix 1 U.S. Laws That Have a Basis in Toxicology 12
Appendix 2 Examples of Outbreaks of Mass Poisoning 13

2. Absorption, Distribution, and Excretion of Toxicants ***15***
Introduction 16
Absorption 18
Distribution 21
Excretion 23
Physiologically Based Pharmacokinetic Modeling 25
Levels of Toxicants in the Body 27
References 28

3. Biotransformation of Toxicants ***31***
General Considerations 32
Phase I (Degradation) Reactions 32
Phase II (Conjugation) Reactions 34
Bioactivation 36
Complex Nature of Biotransformation 39
References 42
Appendix 1 Examples of Bioactivation 44

4. Toxic Effects ***47***
General Considerations 48
Spectrum of Toxic Effects 48
Target Organs 51
Mechanisms of Action 53

Molecular Targets: Chemical Nature 55
Receptors 58
References 62

5. Modifying Factors of Toxic Effects *65*
General Considerations 65
Host Factors 66
Environmental Factors 73
Chemical Interaction 73
References 76
Appendix 1 Mechanisms Underlying Certain Modifying Factors 78
Appendix 2 Strain-Related Differences in Drug-Induced Responses 79

PART II: Testing Procedures for Conventional and Nontarget Organ Toxicities

6. Conventional Toxicity Studies *83*
Introduction 84
Acute Toxicity Studies 85
Short-Term and Long-Term Toxicity Studies 91
Good Laboratory Practice 94
References 95
Further Reading 96
Appendix 1 General Observations, Clinical Laboratory Tests, and Pathology Examinations That May Be Used in Short- and Long-Term Toxicity Studies 97

7. Carcinogenesis *99*
Introduction 100
Mode of Action 102
Categories of Carcinogens 106
Some Human Carcinogens/Target Organs 109
Tests for Carcinogenicity 111
Evaluation 114
References 117
Further Reading 119
Appendix 1 Biomarkers of Carcinogenesis/Human Cancers 120
Appendix 2 Probable Carcinogenic Chemicals 121

8. Mutagenesis *123*
Introduction 124
Gene Mutation 126
Chromosomal Effects 131
DNA Repair and Recombination 133
Other Tests 134
Evaluation 135
References 137

9. Developmental Toxicology *139*
Introduction 140
Teratogens (Developmental Toxicants) and Their Effects 142
Mode of Action 143
Teratogens of Special Interest 145
Testing Procedures 146
Evaluation of Teratogenic Effects 147
References 148
Appendix 1 Teratogens in Animal Models 150

10. Lactation *151*
General Remarks 151
Benefits of Breast-Feeding 153
Biomarkers of Exposure 154
Toxicants 155
References 160

PART III: Target Organs and Systems

11. Toxicology of the Immune System *165*
General Considerations 165
Components of the System 166
Immunotoxicants 169
Immunotoxicities 172
References 174
Further Reading 175

12. Respiratory System Inhalation Toxicology *177*
Introduction 177
Toxicants and Their Effects 178
References 183
Appendix 1 Site of Action and Pulmonary Disease Produced by Selected Occupationally Inhaled Toxicants 184
Appendix 2 Mechanisms Underlying the Oxidative Stress Induced by Cigarette Smoke 186

13. Toxicology of the Liver *187*
General Considerations 187
Types of Liver Injury 189
Hepatotoxicants 193
Clinical Biochemical Tests 193
References 194
Appendix 1 Examples of Hepatotoxic Agents and Associated Liver Injury 197

14. Toxicology of the Kidney *199*
Introduction 200

Nephrotoxicants: Mechanism and Site of Action 202
Testing Procedure 205
Nature of Toxicity 208
References 208
Further Reading 209

15. Toxicology of the Skin *211*
General Considerations 211
Types of Toxic Effects and Dermatotoxicants 213
Testing Procedures 217
References 219
Appendix 1 Primary Irritation 220

16. Toxicology of the Eye *223*
General Considerations 223
Toxicants and Site of Their Effects 224
Testing Procedures 228
Evaluation 231
References 231
Appendix 1 Cataractogenic Chemicals 232
Appendix 2 Grading of Eye Irritation 233

17. Toxicology of the Nervous System *235*
Introduction 236
Neurotoxic Effects and Neurotoxicants 238
Testing Procedures 244
Behavioral Studies: Testing Procedures 246
Evaluation 248
References 249
Appendix 1 Select Neurotoxicants Described in the Text 251

18. Reproductive and Cardiovascular Systems *253*
Reproductive System 254
Toxicants and Their Effects 256
Routine Testing: Multigeneration
Reproduction Studies 258
Other Tests 259
Cardiovascular System 260
Toxic Effects on the Heart 261
Toxic Effects on Blood Vessels 263
Testing Procedures 264
References 265

PART IV: Toxic Substances and Risk Assessment

19. Food Additives and Contaminants *271*
Introduction 272
Toxicological Testing and Evaluation 274

Additives of Toxicological Concern 275
Indirect Additives and Contaminants 277
Contaminants 279
References 282
Appendix 1 Major Functional Groups of Direct Food Additives 285

20. Toxicity of Pesticides *287*
Introduction 288
Categories of Pesticides 289
Toxicological Properties 292
Testing, Evaluation, and Control 296
Gulf War Syndrome 298
References 300
Appendix 1 Toxicological Findings and Evaluation on Certain Insecticides 302

21. Toxicity of Metals *303*
Introduction 304
Certain Common Features 305
Common Toxic Effects 309
Metals of Major Toxicological Concern 310
Risk/Benefit Considerations 317
References 321

22. Over-the-Counter Preparations *325*
General Remarks 325
Prevalence in Society 326
Adverse Consequences 327
References 330

23. Environmental Pollutants *333*
General Remarks 334
Air Pollutants 335
Water and Soil Pollutants 339
References 343

24. Occupational Toxicology *345*
General Remarks 346
Exposure Limits 346
Occupational Toxicants 348
Monitoring 354
References 355
Appendix 1 Acute Pesticide Toxicity, General Signs, and Symptoms in Humans 357

25. Toxicologic Evaluation *359*
Introduction 360
Major Approaches 361
Acceptable Daily Intake (ADI/RfD)/Safety Assessment 362

Mathematical Models/Risk Assessment 365
Other Procedures 370
International Activities in Toxicological Evaluation 371
References 373
Further Reading 375

Chemical Index 377
Subject Index 387
