

Contents

1	Introduction	1
	Organization of This Book	5
2	A Brief History of Memory Development Research	9
	1880–1935	10
	Evidence from Child Psychology Studies	10
	Findings from Early Experimental Studies	11
	Children’s Eyewitness Memory	14
	Assessment of “General” Memory Development	15
	1936–1965	17
	German Research	17
	American Research	17
	Russian Research	18
	Transition to the Modern Era	20
3	The Development of Implicit Memory	25
	Development of Perceptual Priming	26
	The Development of Conceptual Priming	30
	Interactions Between Implicit and Explicit Memory	32
	Implicit Memory in Clinical Populations	33
	The Impact of Advances in Neuroscience	34
	Conclusions	36
4	Memory Development During the Infant and Toddler Years	39
	A Short History	39
	Short-Term/Working Memory in Infancy	42
	Memory Tasks Used with Preverbal Infants	43
	Hide-and-Seek Tasks	43
	Novelty-Preference Paradigms	48
	Summary	53

The Development of Long-Term Memory in Infants and Toddlers	54
Conditioning Paradigms	54
Deferred Imitation Tasks	57
Does the Age of 9 Months Indicate an Important Transition Period?	59
Effects of Memory Reinstatement and Reactivation	61
The Impact of Language Acquisition on Toddlers' LTM	63
Determinants of Young Children's Long-Term Recall	65
Kinds of Memory: Implicit and Explicit Memory in Infancy	67
Summary	72
 5 The Development of Event and Autobiographical Memory in Childhood and Adolescence	 75
Memory for Routine Events (Script-Based Memory)	78
Developmental Differences in Event Recall	79
Developmental Differences in Event Recall Format	80
Memories for Single Instances of Routine Events	82
Memory for Fixed and Variable Items	83
The Schema-Confirmation-Deployment Model as an Explanatory Approach	84
The Importance of Memory Cues	86
Memories of Novel and Salient Events	87
Memory of Novel Events	87
Memory for Salient Events	88
Effects of Experience and Prior Knowledge	90
Social-Cultural Contexts of Event Memories: Effects of Maternal Reminiscing Style	91
Conversations About Past Events	91
Conversations During Events	95
Relevance of Social-Cultural Context: Reminiscing and Socioemotional Development	97
How Long Do Autobiographical Memories Last?	99
Infantile Amnesia	101
Empirical Findings	102
Explanations of Infantile Amnesia and Their Evaluation	103
Eyewitness Memory	108
How Long Do Eyewitness Memories Last?	111
The Role of Metacognitive and Background Knowledge	113
Importance of the Salience of Events	115
Age Differences in Suggestibility	116
Source Memory Problems	120
Developmental Trends in False Memory Creation	121
Familiarity and Recollection	125

	Facilitating Young Children's Performance in Eyewitness Situations	127
	Summary	128
6	The Role of Basic Memory Capacities and Working Memory	131
	The Development of Short-Term Memory Capacity	133
	The Impact of Strategic Variables on Memory Span Development	136
	The Impact of Item-Ordering Ability on Memory Span Development	138
	Information Processing Speed and Short-Term Memory Capacity	139
	Developmental Changes in Information Processing Speed	139
	Relations Between Information Processing Speed and Memory Span	141
	Capacity, Working Memory, and Cognitive Development: Theoretical Approaches.	144
	Neo-Piagetian Models	145
	Information Processing and Working Memory Models	148
	Empirical Tests of the Various Theoretical Working Memory Models.	154
	Empirical Tests of Pascual-Leone's Model	154
	Tests of Case's Resource-Sharing Model or Working Memory and its Competitors	157
	Empirical Tests of the Baddeley's Model	160
	Neuropsychological Evidence	171
	Evidence of the Episodic Buffer	175
	Evaluation of Cowan's Working Memory Model	176
	Summary	180
7	The Development of Encoding and Retrieval Strategies	183
	Evidence of Strategic Behavior in Young Children.	186
	Evidence of Early Retrieval Strategies.	186
	Evidence of Early Encoding Strategies	189
	What Develops Earlier: Encoding or Retrieval Strategies?	190
	Encoding Strategies During the Elementary and Middle-School Years	193
	Rehearsal	193
	Organizational Strategies	197
	Elaboration	204
	Strategies for Remembering Complex Materials	210
	Retrieval Strategies	212
	Developmental Trends in the Use of External and Internal Retrieval Cues	212

Age Differences in the Flexibility of Retrieval Strategies	214
Multiple and Variable Strategy Use.	216
Factors Affecting Children's Strategy Use and Development	218
Summary	229
8 Effects of the Knowledge Base on Memory Development	231
Conceptualizations of Knowledge	231
Effects of the Knowledge Base on Memory	234
Item-Specific Effects	234
Effortless Activation of Semantic Memory Relations	236
The Knowledge Base and Strategy Use	237
Evidence That World Knowledge Mediates Memory and Learning	238
Evidence for the Limited Effects of Domain Knowledge on Subsequent Learning	240
Interrelations Between the Knowledge Base and Strategies	241
Evidence for Strong Effects of the Knowledge Base on Subsequent Learning and Memory: The Case of Expertise	246
Intelligence, Knowledge, and Memory Performance	249
Conclusions	252
9 The Development of Metamemory	255
Conceptualizations of Metacognitive Knowledge	256
Children's "Theory of Mind" and Metacognitive Knowledge	260
Assessment of Metamemory	262
Measures of Declarative Metamemory	262
Measurement Problems	263
Measures of Procedural Metamemory	264
Measurement Problems	266
The Development of Metamemory in Children and Adolescents	268
Precursors of Metamemory: Knowledge of "Mental Verbs" and the Acquisition of a "Theory of Mind"	268
Development of Declarative Metamemory from Early Childhood to Adolescence	269
The Development of Monitoring and Self-Control	275
Ease-of-Learning (EOL) Judgments	276
Learning (JOLs)	278
Knowing (FOK) Judgments	281
Retrieval Monitoring: The Case of Confidence Judgments (CJs)	283
The Relation Between Monitoring and Control Processes in Children and Adolescents	285
Metamemory–Memory Relations	294
Evidence from Correlational Studies	295
Evidence from Training Studies	298
Evidence from Multivariate Analyses	299

Contents	xiii
The Importance of Metacognition for Education	302
Summary	307
10 Conclusions and Future Directions	309
Development of Implicit Memory.	310
Infancy and Early Childhood	311
Event Memory and Autobiographical Memory	313
Development of Memory Capacity and Working Memory.	315
Development of Memory Strategies	316
The Impact of the Knowledge Base on Memory Development	318
The Development of Metamemory	319
Future Directions.	320
References	327
Index.	381
