## Part I. The DEG/ENaC Family

1. The Role of DEG/ENaC Ion Channels in Sensory Mechanotransduction.....	3
<i>Dafni Bazopoulou, Giannis Voglis, and Nektarios Tavernarakis</i>	
2. ASICs Function as Cardiac Lactic Acid Sensors During Myocardial Ischemia .....	32
<i>Christopher J. Benson and Edwin W. McCleskey</i>	
3. Molecular Components of Neural Sensory Transduction: DEG/ENaC Proteins in Baro- and Chemoreceptors .....	51
<i>François M. Abboud, Yongjun Lu, and Mark W. Chapleau</i>	

## Part II. The TRP Family

4. TRP Channels as Molecular Sensors of Physical Stimuli in the Cardiovascular System.....	77
<i>Roger G. O'Neil</i>	
5. TRPV1 in Central Cardiovascular Control: Discerning the C-Fiber Afferent Pathway .....	93
<i>Michael C. Andresen, Mark W. Doyle, Timothy W. Bailey, and Young-Ho Jin</i>	
6. TRPV1 as a Molecular Transducer for Salt and Water Homeostasis .....	110
<i>Donna H. Wang and Jeffrey R. Sachs</i>	

7. Functional Interaction Between ATP and TRPV1 Receptors .....	133
<i>Makoto Tominaga and Tomoko Moriyama</i>	
8. TRPV4 and Hypotonic Stress.....	141
<i>David M. Cohen</i>	
Part III. Other Ion Channels and Biosensors	
9. Ion Channels in Shear Stress Sensing in Vascular Endothelium: Ion Channels in Vascular Mechanotransduction.....	155
<i>Abdul I. Barakat, Deborah K. Lieu, and Andrea Gojova</i>	
10. Redox Signaling in Oxygen Sensing by Vessels .....	171
<i>Andrea Olschewski and E. Kenneth Weir</i>	
11. Impedance Spectroscopy and Quartz Crystal Microbalance: Noninvasive Tools to Analyze Ligand–Receptor Interactions at Functionalized Surfaces and of Cell Monolayers .....	189
<i>Andreas Hinz and Hans-Joachim Galla</i>	
Index.....	207
