List of Contributors, vii

Preface, xi

Part 1 Muscle Aging

- 1** Aging of the human neuromuscular system: pathological aspects, 3
W. King Engel and Valerie Askanas
- 2** Aging of the human neuromuscular system: clinical considerations, 33
W. King Engel and Valerie Askanas
- 3** Aging of the human neuromuscular system: patient vignettes, 55
W. King Engel, Shalini Mahajan, and Valerie Askanas
- 4** Mitochondrial changes in aging with particular reference to muscle, and possible clinical consequences, 81
Salvatore DiMauro, Eric Schon, and Michio Hirano
- 5** Protein degradation in aging cells and mitochondria: relevance to the neuromuscular system, 89
Jenny K. Ngo and Kelvin J. A. Davies
- 6** Human muscle protein metabolism in relation to exercise and aging: potential therapeutic applications, 97
Micah J. Drummond and Blake B. Rasmussen

Part 2 Sporadic Inclusion-Body Myositis

- 7** Pathogenesis of sporadic inclusion-body myositis: role of aging and muscle-fiber degeneration, and accumulation of the same proteins as in Alzheimer and Parkinson brains, 111
Valerie Askanas, W. King Engel, and Anna Nogalska
- 8** Inflammatory and autoimmune features of inclusion-body myositis, 146
Marinos C. Dalakas
- 9** Sporadic inclusion-body myositis: clinical symptoms, physical findings, and diagnostic investigations, 159
Frank L. Mastaglia
- 10** Pathologic diagnostic criteria of sporadic inclusion-body myositis and hereditary inclusion-body myopathy muscle biopsies, 168
Valerie Askanas and W. King Engel

Part 3 Hereditary Inclusion-Body Myopathies

- 11** Function and mutations of the *GNE* gene leading to distal myopathy with rimmed vacuoles/hereditary inclusion-body myopathy, animal models, and potential treatment, 177
May Christine V. Malicdan, Satoru Noguchi, and Ichizo Nishino
- 12** *GNE* myopathy (hereditary inclusion-body myopathy/distal myopathy with rimmed vacuoles): clinical features and epidemiology, 191
Zohar Argov, Ichizo Nishino, and Ikuya Nonaka
- 13** Consequences of the hereditary inclusion-body myopathy-characteristic *GNE* mutations on muscle proteins *in vivo* and *in vitro*, 199
Aldobrando Broccolini and Massimiliano Mirabella
- 14** Function and structure of *VCP* mutations leading to inclusion-body myopathy associated with Paget disease of bone and frontotemporal dementia, 206
Cezary Wójcik
- 15** Clinical spectrum of *VCP* myopathy, Paget disease, and frontotemporal dementia: experimental models and potential treatments, 219
Virginia E. Kimonis, Eric Dec, Mallikarjun Badadani, Angele Nalbandian, Jouni Vesa, Vincent Caiozzo, Douglas Wallace, Barbara Martin, Charles Smith, and Giles D. Watts
- 16** *Drosophila* and mouse models of hereditary myopathy caused by mutations in *VCP/p97*, 230
Nisha M. Badders and J. Paul Taylor

Index, 241
