<i>Contributors</i>	vii
1 Clinical Management of Respiratory Failure	1
<i>John Hurst</i>	
What is respiratory failure?	1
What are the causes of respiratory failure?	2
The pathophysiology of respiratory failure	3
The management of respiratory failure	4
Assessment of a patient with respiratory failure	4
Diagnostic investigations	8
Summary	13
Case studies	14
References	24
2 Arterial Blood Gas Analysis	26
<i>With contribution from Maura McElligott and Sandra Gallacher</i>	
Acid–base physiology	26
Non-invasive monitoring for respiratory failure	32
Invasive monitoring for respiratory failure	35
Case studies	44
References	45
3 Oxygen Therapy	47
Hypoxaemic (Type I) respiratory failure	47
Hypercapnic (Type II) respiratory failure	47
Delivery of supplemental oxygen	49
Acute oxygen therapy	56
Home oxygen therapy	61
Ambulatory oxygen therapy	69
Travelling with oxygen	83
References	86

4 Non-Invasive Ventilation	89
Indications: acute use	90
Indications: long-term use	97
Indications: palliation	101
Contraindications	105
Application	108
Choosing equipment (interfaces)	116
Prevention of complications	120
Troubleshooting	120
References	122
5 Continuous Positive Airway Pressure (CPAP)	127
CPAP for the treatment of Type I respiratory failure	127
CPAP for the treatment of obstructive sleep apnoea/ hypopnoea syndrome	140
Other forms of treatment	149
References	152
6 Setting Up Respiratory Support Services	156
Non-invasive ventilation	159
Home oxygen	168
Home CPAP for sleep apnoea	176
References	186
7 Ethics	187
Principle-based approach to ethical decision making	187
End-of-life decisions	191
Acts and omissions	198
Case studies	199
Legal cases to support decision making	203
Professional responsibility in ethical decision making	206
References	207
Legal references	209
