

Detailed contents

1	Communication skills	1
	Introduction 2	
	Essential considerations 4	
	Essential rules 6	
	Getting started 7	
	General principles 9	
	Communicating with deaf patients 12	
	Cross-cultural communication 13	
	Interpreters 14	
	Imparting information 15	
	The importance of silence 15	
	Angry patients 15	
	Telephone and e-mail communication 16	
	Talking about sex 16	
	Breaking bad news 17	
	Body language: an introduction 21	
	Written communication 23	
	Law, ethics, and communication 26	
2	The history	29
	History-taking 30	
	Using this book 31	
	Patient profile (PP) 31	
	Chief complaint (CC) 32	
	History of present illness (HPI) 33	
	Past medical history (PMH) 35	
	Allergies 36	
	Drug history 36	
	Alcohol 37	
	Smoking 38	
	Family history (FH) 39	
	Social history (SH) 41	
	Review of systems (ROS) 42	
	The elderly patient 43	
	The pediatric patient 45	
3	General examination	47
	Approaching the physical examination 48	
	First impressions 50	
	Preparing for the examination 50	
	Color 51	
	Temperature 53	

Hydration 54
 Edema 55
 Nutritional status 56
 Lymph nodes 58
 Hands 62
 Recognizable syndromes 68
 Vitamin and trace element deficiencies 70
 The elderly patient 72

4 Skin, hair, and nails 75

Applied anatomy and physiology 76
 Dermatological history 78
 Hair and nail symptoms 80
 Examining the skin 82
 Describing a lesion 84
 Examining a lump 88
 Examining an ulcer 90
 The elderly patient 92

5 Endocrine system 95

Applied anatomy and physiology 96
 Presenting symptoms in endocrinology 98
 The rest of the history 100
 General examination 102
 Examining the thyroid 104
 Eye signs in thyroid disease 106
 Examining the patient with diabetes 108
 The fundus in endocrine disease 110
 Important presenting patterns 114

6 Ear, nose, and throat 119

Applied anatomy and physiology 120
 Symptoms of ear disorders 122
 Tinnitus 124
 Symptoms of nasal disorders 127
 Symptoms of throat disorders 129
 Examining the ear 132
 Examining the nose 135
 Examining the nasal sinuses 137
 Examining the mouth and throat 138
 Important presentations 141

7 Cardiovascular system 145

Applied anatomy and physiology 146
 Chest pain 148
 Breathlessness and edema 150

Palpitations 152
 Syncope 152
 Other cardiovascular symptoms 153
 The rest of the history 154
 General inspection and hands 155
 Peripheral pulses 157
 The face and neck 161
 Examining the precordium 165
 Auscultating the precordium 167
 The rest of the body 173
 Important presenting patterns 175
 The elderly patient 179

8 Respiratory system 181

Applied anatomy and physiology 182
 Dyspnea 184
 Cough and expectoration 185
 Other respiratory symptoms 187
 The rest of the history 188
 General appearance 190
 Hands, face, and neck 191
 Inspection of the chest 193
 Palpation 194
 Percussion 196
 Auscultation 198
 Important presenting patterns 200
 The elderly patient 201

9 Abdomen 203

Applied anatomy 204
 Esophageal symptoms 206
 Nausea, vomiting, and vomitus 208
 Abdominal pain 210
 Bowel habit 212
 Jaundice and pruritus 216
 Abdominal swelling 217
 Urinary and prostate symptoms 218
 Appetite and weight 220
 The rest of the history 221
 Outline examination 223
 Hand and upper limb 224
 Face and chest 226
 Inspection of the abdomen 229
 Auscultation 231
 Palpation 232
 Palpating the abdominal organs 233
 Percussion 239
 Rectal examination 241

Hernial orifices 243
 Important presenting patterns 246
 The elderly patient 252

10 Nervous system 255

Presenting symptoms in neurology 256
 The rest of the history 258
 The outline examination 259
 General inspection and mental state 259
 Speech and language 260
 Cognitive function 262
 Cranial nerve I: olfactory 263
 Cranial nerve II: optic 264
 Cranial nerve II: ophthalmoscopy 268
 Pupils 273
 Cranial nerves III, IV, and VI 276
 Palsies of cranial nerves III, IV, and VI 280
 Cranial nerve V: trigeminal 283
 Cranial nerve VII: facial 285
 Cranial nerve VIII: vestibulocochlear 287
 Cranial nerves IX and X 289
 Cranial nerve XI: accessory 291
 Cranial nerve XII: hypoglossal 293
 Motor: applied anatomy 294
 Motor: inspection and tone 296
 Motor: upper limb power 298
 Motor: lower limb power 300
 Tendon reflexes 302
 Other reflexes 305
 Primitive reflexes 307
 Sensory: applied anatomy 308
 Sensory examination 312
 Coordination 315
 Some peripheral nerves 317
 Gait 321
 Important presenting patterns 323
 The unconscious patient 331
 The elderly patient 334

11 Musculoskeletal system 337

Applied anatomy and physiology 338
 Important locomotor musculoskeletal symptoms 340
 The rest of the history 344
 Outline examination 346
 GALS screen 347
 Elbow 349
 Shoulder 351
 Spine 354

	Hip 356	
	Knee 358	
	Ankle and foot 363	
	Important presenting patterns 365	
	The elderly patient 373	
12	Male reproductive system	375
	Applied anatomy and physiology 376	
	Sexual history 378	
	Symptoms 379	
	Examining the male genitalia 381	
	Important presenting patterns 386	
	The elderly patient 388	
13	Female breast	391
	Applied anatomy and physiology 392	
	Important symptoms 394	
	Inspection of the breast 397	
	Palpation of the breast 399	
	Examining beyond the breast 402	
	Important presentations 404	
14	Female reproductive system	407
	Applied anatomy 408	
	Applied physiology 411	
	History-taking in gynecology 413	
	Abnormal bleeding in gynecology 415	
	Other symptoms in gynecology 419	
	Outline gynecological examination 423	
	Pelvic examination 424	
	Taking a cervical smear 430	
	History-taking in obstetrics 433	
	Presenting symptoms in obstetrics 437	
	Outline obstetric examination 441	
	Abdominal examination 442	
	The elderly patient 447	
15	Psychiatric assessment	449
	Approach to psychiatric assessment 450	
	History 452	
	Mental status examination 458	
	Physical examination 466	
	Important presenting patterns 467	
	Medical conditions with psychiatric symptoms and signs 476	

16	Pediatric assessment	479
	History-taking 480	
	Examination: an approach 482	
	Respiratory system 484	
	Ear, nose, and throat 488	
	Cardiovascular system 490	
	Abdomen and gastrointestinal system 493	
	Palpation 495	
	Nervous system 497	
	Developmental assessment 500	
	The newborn 502	
17	Examination under special circumstances	507
	Overview 508	
	Disasters, terrorism, and public health emergencies 509	
	Sexual assault 510	
	Other thoughts 510	
18	Practical procedures	511
	Using this chapter 512	
	Infiltrating anesthetic agents 512	
	Sterility and preparation 513	
	Hand-washing 514	
	Injections 516	
	Venipuncture 518	
	Peripheral IV catheterization 522	
	Setting up an infusion 524	
	External jugular vein catheterization 526	
	Central venous catheterization 527	
	Blood pressure measurement 531	
	Recording a 12-lead ECG 533	
	Arterial blood gas sampling 535	
	Peak flow measurement 537	
	Inhaler technique 538	
	Oxygen administration 544	
	Basic airway management 547	
	Tracheostomy management 555	
	Endotracheal (ET) intubation 557	
	Noninvasive ventilation (NIV) 559	
	Pleural fluid sampling (thoracentesis) 561	
	Chest tube insertion 563	
	Nasogastric (NG) tube insertion 567	
	Ascitic tap 569	
	Abdominal paracentesis (drainage) 571	
	Male urethral catheterization 573	
	Female urethral catheterization 575	
	Suprapubic catheterization 577	

Basic suturing 579
 Lumbar puncture 581
 Pericardial aspiration 583
 Defibrillation 584
 Knee joint aspiration 588

19	Data interpretation	591
	ECG: introduction 592	
	Chest X-rays: introduction 616	
	Abdominal X-rays: introduction 641	
	Radiology: pelvis 646	
	Radiology: hips and femurs 648	
	Radiology: knees 650	
	Radiology: shoulder 652	
	Radiology: cervical spine 654	
	Radiology: thoracic and lumbar spine 656	
	Lung function tests 658	
	Arterial blood gas analysis 663	
	Cerebrospinal fluid (CSF) 667	
	Urinalysis 669	
	Pleural and ascitic fluid 671	

Index	673
