

Detailed contents

Part I Clinical presentations: approaches to problems	
1	Dyspnea 3
	Clinical assessment and causes 4
	Specific situations 8
<hr/>	
2	Chronic cough and normal chest X-ray 9
	Etiology, clinical assessment, and treatment 10
	Causes of chronic cough: UACS 13
	Causes of chronic cough: asthma, NAEB 14
	Causes of chronic cough: GERD 16
	Causes of chronic cough: chronic bronchitis, bronchiectasis, ACE inhibitors 18
	Causes of chronic cough: miscellaneous 20
	Further information 20
<hr/>	
3	Chest pain 21
	Chest pain: overview 22
	Acute chest pain 24
	Chronic chest pain 25
<hr/>	
4	Hemoptysis 27
	Clinical assessment and causes 28
	Investigations 30
	Management of massive hemoptysis 31
<hr/>	
5	Unexplained respiratory failure 33
	Causes 34
	Clinical assessment and management 38
<hr/>	

6	Pleural effusion	41
	Clinical assessment	42
	Diagnostic algorithm for the patient with a pleural effusion	44
	Transudative pleural effusions	45
	Exudative pleural effusions	46
	Pleural fluid analysis 1	48
	Pleural fluid analysis 2	50
<hr/>		
7	Diffuse parenchymal lung disease	53
	Causes	54
	Clinical assessment and imaging	56
	HRCT diagnosis	58
	Further investigations	60
<hr/>		
8	Diffuse alveolar hemorrhage	63
<hr/>		
9	Pulmonary infiltrates in the immunocompromised host (non-HIV)	67
	Clinical assessment	68
	Further investigations	70
	Causes	72
	Treatment	76
<hr/>		
10	Pulmonary infiltrates in the immunocompromised host (HIV)	79
	Introduction	80
	Causes of respiratory disease in HIV infection	84
<hr/>		
11	The respiratory sleep patient	87
	History	88
	Examination and investigations	90
<hr/>		

12 The breathless, pregnant patient	93
Causes <i>94</i>	
Investigations <i>96</i>	
<hr/>	
13 Preoperative assessment of the pulmonary patient	99
<hr/>	
14 Postoperative breathlessness	103
<hr/>	
Part II Clinical conditions	
15 Asthma	109
Definition, epidemiology, pathophysiology, etiology <i>110</i>	
Diagnosis <i>112</i>	
Investigations <i>114</i>	
Asthma exacerbations <i>116</i>	
Acute severe or life-threatening asthma <i>118</i>	
Treatment of acute asthma <i>120</i>	
Chronic asthma: management <i>126</i>	
Nonpharmacological therapies <i>131</i>	
“Difficult/refractory” asthma <i>132</i>	
Asthma in pregnancy <i>134</i>	
Occupational asthma <i>136</i>	
Management of occupational asthma <i>138</i>	
Vocal cord dysfunction <i>139</i>	
Allergic rhinitis (hay fever) <i>140</i>	
<hr/>	
16 Chronic obstructive pulmonary disease (COPD)	143
Definition, etiology, pathology, and clinical features <i>144</i>	
Investigations <i>148</i>	
Nonpharmacological management of stable COPD <i>150</i>	
Pharmacological management of stable COPD <i>152</i>	
Management of exacerbations <i>154</i>	

Summary of approaches to medical treatment *156*
Surgical treatment *158*

17 Lung cancer	161
Epidemiology and types	<i>162</i>
Clinical features	<i>164</i>
Investigations	<i>166</i>
Diagnostic procedures	<i>168</i>
Staging	<i>170</i>
Non-small cell lung cancer (NSCLC): surgery	<i>174</i>
NSCLC: chemotherapy	<i>178</i>
NSCLC: radiotherapy	<i>180</i>
Small cell lung cancer: treatment	<i>182</i>
Superior vena caval obstruction (SVCO): etiology and clinical assessment	<i>184</i>
SVCO: management	<i>186</i>
Hypercalcemia	<i>188</i>
Syndrome of inappropriate ADH secretion (SIADH)	<i>189</i>
Spinal cord compression	<i>190</i>
Pulmonary carcinoid tumors	<i>192</i>
Pulmonary nodules	<i>194</i>
Lung cancer screening	<i>198</i>
<hr/>	
18 Mediastinal abnormalities	199
Anatomy	<i>200</i>
Mediastinal abnormalities	<i>202</i>
<hr/>	
19 Bacterial respiratory infection	207
Community-acquired pneumonia (CAP)	<i>208</i>
CAP: clinical features	<i>210</i>

CAP: severity assessment 212
 CAP: investigations 214
 CAP: management 216
 CAP: antibiotics 218
 CAP: treatment failure 220
 CAP: follow-up 222
 Hospital-acquired pneumonia: clinical features 224
 Hospital-acquired pneumonia: management 226
 Ventilator-acquired pneumonia (VAP) 228
 Aspiration pneumonia 230
 Aspiration pneumonia: clinical features 232
 Lung abscess: clinical features 234
 Lung abscess: diagnosis 236
 Lung abscess: management 238
 Nocardiosis 240
 Actinomycosis 242
 Anthrax 244

20 Viral respiratory infection 247
 Viral pneumonia: overview 248
 Influenza 250
 Respiratory syncytial virus 252
 Parainfluenza 254
 Adenovirus 255
 Cytomegalovirus 256
 Herpes simplex virus 258
 Varicella zoster virus 260
 Measles 262
 Epstein–Barr virus 263
 Hantavirus 264
 Severe acute respiratory syndrome 266

21	Mycobacterial respiratory infection	269
	Tuberculosis (TB): epidemiology and pathophysiology 270	
	TB: clinical manifestations 272	
	Extrapulmonary tuberculosis (XPTB) 273	
	TB: diagnostics studies 274	
	TB: treatment 276	
	Isolation of TB suspects and patients 280	
	Nontuberculous (environmental) mycobacterial (NTM) lung disease 282	
<hr/>		
22	Fungal respiratory diseases	285
	<i>Aspergillus</i> lung disease: classification 286	
	1. Atopic allergy to fungal spores 287	
	2. Allergic bronchopulmonary aspergillosis 288	
	3. Invasive aspergillosis 292	
	4. Chronic necrotizing aspergillosis 295	
	5. Aspergilloma/mycetoma 296	
	<i>Pneumocystis</i> pneumonia (PCP) 298	
	PCP: treatment 300	
	Endemic mycoses 302	
	Histoplasmosis 304	
	Blastomycosis 306	
	Coccidioidomycosis 308	
	Paracoccidioidomycosis 308	
	Cryptococcosis 309	
	<i>Candida</i> 310	
<hr/>		
23	Parasitic lung disease	311
	Hydatidosis 312	
	Amebiasis 312	

Ascariasis	313
Strongyloidiasis	313
Toxocara canis	313
Dirofilariasis	313
Schistosomiasis	314
Paragonimiasis	314
Tropical pulmonary eosinophilia	314
<hr/>	
24 Pneumothorax	315
Clinical features and investigations	316
Initial management	318
Further management	320
Treatment algorithm for primary pneumothorax	322
Treatment algorithm for secondary pneumothorax	323
Specific situations	324
<hr/>	
25 Pleural effusions	327
Clinical features and imaging	328
Malignant pleural effusion: causes and investigations	330
Malignant pleural effusion: management	332
Parapneumonic effusion and empyema: definition and clinical features	334
Parapneumonic effusion and empyema: bacteriology and investigations	336
Parapneumonic effusion and empyema: management and outcome	338
Tuberculous pleural effusion	340
Other causes	342
<hr/>	
26 Asbestos and the lung	345
Asbestos	346
Benign asbestos-related pleural disease	348
Asbestosis	350

Mesothelioma: diagnosis	352
Mesothelioma: treatment and outcome	354
Asbestos-related lung cancer	356
<hr/>	
27 Sleep-related respiratory disorders	357
Introduction	358
Obstructive sleep apnea: clinical features, pathophysiology, and consequences	360
Obstructive sleep apnea: evaluation	362
Obstructive sleep apnea: therapy	364
Central sleep apnea	366
Cheyne–Stokes respiration	367
Obesity hypoventilation syndrome	368
Chronic alveolar hypoventilation syndromes	369
Further reading	369
<hr/>	
28 Bronchiectasis	371
Epidemiology, pathophysiology, and causes	372
Clinical features and diagnosis	374
General management	376
Further management	378
<hr/>	
29 Adult cystic fibrosis (CF)	381
General principles	382
Principles of disease management	384
Management of CF lung disease	386
Other pulmonary disease	390
Nonpulmonary disease	392
CF pulmonary exacerbation: etiology	398
CF pulmonary exacerbation: antibiotics	400
Management of an exacerbation	402
Seeing the patient with CF in the clinic	404
<hr/>	

30 Lung transplantation	405
Background and current status	<i>406</i>
Indications and patient selection	<i>408</i>
Timing of referral and listing	<i>410</i>
Surgical approaches	<i>412</i>
Organ allocation and donor–recipient matching	<i>413</i>
Routine post-transplant care	<i>414</i>
Outcomes	<i>415</i>
Complications	<i>416</i>
<hr/>	
31 Pulmonary hypertension	421
Classification	<i>422</i>
Idiopathic pulmonary arterial hypertension (IPAH)	<i>424</i>
IPAH: clinical features	<i>426</i>
IPAH: general management	<i>427</i>
IPAH: vasodilator therapy	<i>428</i>
IPAH: surgical treatments, end-of-life care, and future developments	<i>430</i>
Associated pulmonary hypertension (APH): causes	<i>432</i>
Associated pulmonary hypertension: management	<i>434</i>
Further information	<i>435</i>
<hr/>	
32 Pulmonary thromboembolic disease	437
Epidemiology and pathophysiology	<i>438</i>
Etiology	<i>440</i>
Clinical features	<i>444</i>
Diagnosis of acute pulmonary embolism	<i>446</i>
Diagnostic studies	<i>450</i>
Management	<i>454</i>
Special considerations	<i>460</i>

	Rare causes of embolic disease	462
	Future developments	464
<hr/>		
33	Sarcoidosis	465
	Etiology and pathology	466
	Chest disease: clinical features	468
	Chest disease: management	470
	General management	472
	Extrathoracic disease	476
<hr/>		
34	Idiopathic interstitial pneumonias	481
	Overview	482
	Idiopathic pulmonary fibrosis (IPF): diagnosis	484
	IPF: management	488
	Nonspecific interstitial pneumonia (NSIP)	490
	Cryptogenic organizing pneumonia (COP)	492
	Acute interstitial pneumonia (AIP)	494
	Respiratory bronchiolitis-associated interstitial lung disease (RB-ILD)	496
	Desquamative interstitial pneumonia (DIP)	497
	Lymphoid interstitial pneumonia (LIP)	498
<hr/>		
35	Hypersensitivity pneumonitis	499
	Causes	500
	Diagnosis	502
	Management	505
<hr/>		
36	Bronchiolitis and related disorders	507
	Pathophysiology and causes	508
	Management	512
<hr/>		

37 Eosinophilic lung disease	515
Introduction	<i>516</i>
Eosinophilic lung disease: secondary disorders	<i>518</i>
Eosinophilic lung disease: primary disorders, lung-limited	<i>520</i>
Eosinophilic lung disease: primary disorders, systemic	<i>521</i>
<hr/>	
38 Pneumoconioses	523
Overview and causative mineral dusts	<i>524</i>
Coal-workers' pneumoconiosis	<i>528</i>
Silicosis	<i>532</i>
Berylliosis	<i>536</i>
<hr/>	
39 Connective tissue disease and the lung	541
Differential diagnosis and standard tests to consider	<i>542</i>
Rheumatoid arthritis (RA)	<i>546</i>
Systemic lupus erythematosus (SLE)	<i>548</i>
Polymyositis and dermatomyositis	<i>552</i>
Systemic sclerosis	<i>554</i>
Sjögren's syndrome	<i>556</i>
Ankylosing spondylitis	<i>557</i>
<hr/>	
40 Vasculitis and the lung	559
Classification	<i>560</i>
Wegener's granulomatosis: presentation and diagnosis	<i>562</i>
Wegener's granulomatosis: management	<i>564</i>
Microscopic polyangiitis	<i>566</i>
Goodpasture's disease	<i>568</i>

Churg–Strauss syndrome	570
Rare pulmonary vasculitic diseases	572
<hr/>	
41 Gastrointestinal disease and the lung	573
Hepatic hydrothorax	574
Hepatopulmonary syndrome	576
Portopulmonary hypertension (POPH)	578
Inflammatory bowel disease, celiac disease, and pancreatitis	582
<hr/>	
42 Acute respiratory distress syndrome (ARDS)	585
Pathophysiology and diagnosis	586
Management and complications	588
<hr/>	
43 Upper airway diseases	589
Acute upper airway obstruction	590
Anaphylaxis	592
Upper respiratory tract infections 1	594
Upper respiratory tract infections 2	596
<hr/>	
44 Hyperventilation syndrome	599
<hr/>	
45 Unusual conditions	603
Alveolar microlithiasis	604
Pulmonary alveolar proteinosis (PAP): pathophysiology and clinical features	606
PAP: diagnosis and treatment	608
Amyloidosis: pathophysiology and classification	610
Amyloidosis: lung involvement	612
Idiopathic pulmonary hemosiderosis	616
Pulmonary Langerhans cell histiocytosis (PLCH)	618

<ul style="list-style-type: none"> Lymphangiomyomatosis (LAM): clinical features 620 LAM: diagnosis and management 622 Recurrent respiratory papillomatosis 624 Pulmonary arteriovenous malformations (PAVMs): etiology and diagnosis 626 PAVMs: management and complications 628 Hereditary hemorrhagic telangiectasia 629 Primary ciliary dyskinesia (PCD) 630 <hr/>	
<ul style="list-style-type: none"> 46 Flying, diving, and altitude 633 <ul style="list-style-type: none"> Lung disease and flying 634 Diving 636 Altitude sickness 638 <hr/>	
<ul style="list-style-type: none"> 47 Toxic agents 641 <ul style="list-style-type: none"> Drug-induced lung disease: clinical presentations 642 Drug-induced lung disease: examples 644 Paraquat poisoning 649 Inhalational lung injury 650 Carbon monoxide poisoning 654 <hr/>	
<ul style="list-style-type: none"> 48 Pediatric lung disorders pertinent to adult practice 657 <ul style="list-style-type: none"> Chronic lung disease of prematurity and viral wheeze 658 Congenital abnormalities 660 <hr/>	
<ul style="list-style-type: none"> Part III Supportive care 49 Noninvasive ventilation 665 <ul style="list-style-type: none"> Terminology 666 Indications 668 Contraindications 670 	

NIV in acute respiratory failure	672
NIV in chronic respiratory failure	674
<hr/>	
50 Indications for intensive care unit admission	677
<hr/>	
51 Ethical issues	681
Background and COPD	682
Lung cancer and neurological disease	684
<hr/>	
52 Tracheostomy	685
<hr/>	
53 Inhalers and nebulizers	689
Background	690
Different inhaler types and instructions for their use	692
<hr/>	
54 Immunosuppressive therapy	697
Introduction	698
Glucocorticoids	700
Azathioprine	706
Hydroxychloroquine	708
Methotrexate	710
Cyclophosphamide	714
Mycophenolate mofetil	716
Infliximab	718
Rituximab	720
Cyclosporine	722
Sirolimus	724
<hr/>	
55 Long-term oxygen therapy	727
<hr/>	
56 Pulmonary rehabilitation	731
Definition	732
Aims and evidence	732

Patient selection	733
Program	734
57 Smoking cessation	737
Aims and nicotine replacement therapy	738
Non-nicotine replacement therapy	742
58 Palliative care of the chest patient	745
Pain and dyspnea	746
Other symptoms	748
Part IV Practical procedures	
59 Airway management	751
60 Cricothyroidotomy	759
61 Bronchoscopy	763
62 Thoracentesis	769
Diagnostic thoracentesis	770
Therapeutic thoracentesis	771
63 Aspiration of pneumothorax	773
64 Abrams pleural biopsy	775
65 Chest drains	779
Indications, drain types, and complications	780
Insertion technique	782
Drain management	784
66 Chemical pleurodesis	785

67	Medical thoracoscopy	789
68	Some diagnostic tests	793
	Skin-prick tests	794
	Technique of induced sputum	795
	Methacholine challenge testing	796
Appendices		
1	Lung function testing	799
	Flow–volume loop	800
	Spirometry, peak flow measurements, and CO transfer	804
	Respiratory muscle function, body plethysmography, and lung volumes	806
2	Blood gases and acid–base balance	809
	Introduction	810
	Interpretation of arterial blood gases: 1. Hypoxia	811
	Interpretation of arterial blood gases: 2. Acid–base disorders	812
	Cases	819
3	CT anatomy of the thorax	821
	Mediastinal window	822
	Level of head and neck vessels	
	Level of aortic arch	
	Level of left main pulmonary artery	
	Level of right main pulmonary artery	
	Level of right ventricular outflow tract	
	Level of aortic valve	
	Level of coronary sinus	
	Lung window	826

Level of trachea
 Level of carina
 Level of bifurcation of right upper lobe bronchus
 Level of lingular bronchus
 Level of right middle lobe bronchus
 Level of basal segmental bronchi

4 CT patterns of lung disease 829

5 BMI calculator and height converter 833
