

Detailed contents

Symbols and Abbreviations [xix](#)

1 General principles of management of patients	1
Communication skills	2
Documentation and note keeping	4
Patient safety in surgical practice	6
2 Significance and preliminary investigation of urological symptoms and signs	7
Haematuria I: definition and types	8
Haematuria II: causes and investigation	10
Haemospermia	14
Lower urinary tract symptoms (LUTS)	16
Nocturia and nocturnal polyuria	18
Loin (flank) pain	20
Urinary incontinence	24
Genital symptoms	26
Abdominal examination in urological disease	28
Digital rectal examination (DRE)	30
Lumps in the groin	32
Lumps in the scrotum	34
3 Urological investigations	37
Assessing kidney function	38
Urine examination	40
Urine cytology	42
Prostatic-specific antigen (PSA)	43
Radiological imaging of the urinary tract	44
Uses of plain abdominal radiography (the 'KUB' X-ray—kidneys, ureters, bladder)	46
Intravenous urography (IVU)	48
Other urological contrast studies	52
Computed tomography (CT) and magnetic resonance imaging (MRI)	54

Radioisotope imaging 60
 Uroflowmetry 62
 Post-void residual urine volume measurement 66
 Cystometry, pressure flow studies, and videocystometry 68

4 Bladder outlet obstruction 71

Regulation of prostate growth and development of benign prostatic hyperplasia (BPH) 72
 Pathophysiology and causes of bladder outlet obstruction (BOO) and BPH 73
 Benign prostatic obstruction (BPO): symptoms and signs 74
 Diagnostic tests in men with LUTS thought to be due to BPH 76
 The management of LUTS in men: NICE 2010 Guidelines 78
 Watchful waiting for uncomplicated BPH 84
 Medical management of BPH: alpha blockers 86
 Medical management of BPH: 5 α -reductase inhibitors 88
 Medical management of BPH: combination therapy 90
 Medical management of BPH: alternative drug therapy 92
 Minimally invasive management of BPH: surgical alternatives to TURP 94
 Invasive surgical alternatives to TURP 96
 TURP and open prostatectomy 100
 Acute urinary retention: definition, pathophysiology, and causes 102
 Acute urinary retention: initial and definitive management 106
 Indications for and technique of urethral catheterization 108
 Technique of suprapubic catheterization 110
 Management of nocturia and nocturnal polyuria 116
 Chronic retention 118
 High-pressure chronic retention (HPCR) 120
 Bladder outlet obstruction and retention in women 122
 Urethral strictures and stenoses 124

5 Incontinence and female urology 127

Incontinence: classification 128
 Incontinence: causes and pathophysiology 130

Incontinence: evaluation	132
Stress and mixed urinary incontinence	136
Surgery for stress incontinence: injection therapy	138
Surgery for stress incontinence: retropubic suspension	140
Surgery for stress incontinence: suburethral tapes and slings	142
Surgery for stress incontinence: artificial urinary sphincter	146
Overactive bladder: conservative and medical treatments	148
Overactive bladder: options for failed conventional therapy	150
Overactive bladder: intravesical botulinum toxin-A therapy	152
Post-prostatectomy incontinence	154
Vesicovaginal fistula (VVF)	156
Incontinence in elderly patients	158
Management pathways for urinary incontinence	160
Initial management of urinary incontinence in women	161
Specialized management of urinary incontinence in women	162
Initial management of urinary incontinence in men	163
Specialized management of urinary incontinence in men	163
Management of urinary incontinence in frail older persons	164
Female urethral diverticulum (UD)	166
Pelvic organ prolapse (POP)	170

6 Infections and inflammatory conditions	175
Urinary tract infection: definitions and epidemiology	176
Urinary tract infection: microbiology	178
Lower urinary tract infection: cystitis and investigation of UTI	182
Urinary tract infection: general treatment guidelines	184
Recurrent urinary tract infection	186
Upper urinary tract infection: acute pyelonephritis	190
Pyonephrosis and perinephric abscess	192
Other forms of pyelonephritis	194
Chronic pyelonephritis	196
Septicaemia	198
Fournier's gangrene	202
Peri-urethral abscess	204

Epididymitis and orchitis	206
Prostatitis: classification and pathophysiology	208
Bacterial prostatitis	210
Chronic pelvic pain syndrome	212
Bladder pain syndrome (BPS)	214
Urological problems from ketamine misuse	218
Genitourinary tuberculosis	220
Parasitic infections	222
HIV in urological surgery	226
Phimosis	228
Inflammatory disorders of the penis	230

7 Urological neoplasia	235
Basic pathology and molecular biology	236
Wilms' tumour and neuroblastoma	238
Radiological assessment of renal masses	242
Benign renal masses	244
Renal cell carcinoma: pathology, staging, and prognosis	246
Renal cell carcinoma: epidemiology and aetiology	250
Renal cell carcinoma: presentation and investigation	252
Renal cell carcinoma (localized): surgical treatment I	254
Renal cell carcinoma: surgical treatment II and non-surgical alternatives for localized disease	256
Renal cell carcinoma: management of metastatic disease	258
Upper urinary tract transitional cell carcinoma (UUT-TCC)	260
Bladder cancer: epidemiology and aetiology	264
Bladder cancer: pathology, grading, and staging	266
Bladder cancer: clinical presentation	270
Bladder cancer: haematuria, diagnosis, and transurethral resection of bladder tumour (TURBT)	272
Bladder cancer (non-muscle invasive TCC): surgery and recurrence	276
Bladder cancer (non-muscle invasive TCC): adjuvant treatment	280
Bladder cancer (muscle-invasive): staging and surgical management of localized (pT2/3a) disease	282
Bladder cancer (muscle-invasive): radical radiotherapy and palliative treatment	286

- Bladder cancer: management of locally advanced and metastatic disease 288
- Bladder cancer: urinary diversion after cystectomy 290
- Prostate cancer: epidemiology and aetiology 294
- Prostate cancer: incidence, prevalence, mortality, and survival 296
- Prostate cancer: prevention 298
- Prostate cancer: pathology of adenocarcinoma 302
- Prostate cancer: grading 304
- Prostate cancer: staging and imaging 306
- Prostate cancer: clinical presentation 315
- Prostate cancer: screening 316
- Prostate cancer: prostate-specific antigen (PSA) 318
- Prostate cancer—PSA derivatives and kinetics: free-to-total, density, velocity, and doubling time 320
- Prostate cancer: counselling before PSA testing 322
- Prostate cancer: other diagnostic markers 324
- Prostate cancer: transrectal ultrasonography and biopsy 326
- Prostate cancer: suspicious lesions 330
- Prostate cancer: general considerations before treatment (modified from the 2008 UK NICE Guidance) 331
- Prostate cancer: watchful waiting and active surveillance 332
- Prostate cancer: radical prostatectomy and pelvic lymphadenectomy 334
- Prostate cancer—radical prostatectomy: post-operative care and complications 338
- Prostate cancer: oncological outcomes of radical prostatectomy 340
- Prostate cancer: radical external beam radiotherapy (EBRT) 344
- Prostate cancer: brachytherapy (BT) 346
- Prostate cancer (minimally invasive management of localized and radio-recurrent prostate cancer): cryotherapy, high-intensity focused ultrasound, and photodynamic therapy 348
- Prostate cancer: management of locally advanced non-metastatic disease (T3–4 N0M0) 350
- Prostate cancer: management of advanced disease—hormone therapy I 352

Prostate cancer: management of advanced disease—hormone therapy II	354
Prostate cancer: management of advanced disease—hormone therapy III	356
Prostate cancer: management of advanced disease—castrate-resistant prostate cancer (CRPC)	358
Prostate cancer: management of advanced disease—palliative care	362
Urethral cancer	364
Penile neoplasia: benign, viral-related, and premalignant lesions	368
Penile cancer: epidemiology, risk factors, and pathology	370
Penile cancer: clinical management	374
Scrotal and paratesticular tumours	377
Testicular cancer: incidence, mortality, epidemiology, and aetiology	378
Testicular cancer: pathology and staging	380
Testicular cancer: clinical presentation, investigation, and primary treatment	384
Testicular cancer: serum markers	386
Testicular cancer: prognostic staging system for metastatic germ cell tumours (GCT)	388
Testicular cancer: management of non-seminomatous germ cell tumours (NSGCT)	390
Testicular cancer: management of seminoma, IGCN, and lymphoma	392

8 Miscellaneous urological disease of the kidney **395**

Simple and complex renal cysts	396
Calyceal diverticulum	399
Medullary sponge kidney (MSK)	400
Acquired renal cystic disease (ARCD)	402
Autosomal dominant polycystic kidney disease (ADPKD)	404
Vesicoureteric reflux in adults	408
Pelviureteric junction obstruction in adults	412
Anomalies of renal fusion and ascent: horseshoe kidney, ectopic kidney	416

Anomalies of renal number and rotation: renal agenesis
and malrotation 420

Upper urinary tract duplication 422

9 Stone disease 427

Kidney stones: epidemiology 428

Kidney stones: types and predisposing factors 432

Kidney stones: mechanisms of formation 434

Factors predisposing to specific stone types 436

Evaluation of the stone former 440

Kidney stones: presentation and diagnosis 442

Kidney stone treatment options: watchful waiting and
the natural history of stones 444

Stone fragmentation techniques: extracorporeal lithotripsy
(ESWL) 446

Intracorporeal techniques of stone fragmentation 450

Flexible ureteroscopy and laser treatment 454

Kidney stone treatment: percutaneous nephrolithotomy
(PCNL) 456

Kidney stones: open stone surgery 462

Kidney stones: medical therapy (dissolution therapy) 464

Ureteric stones: presentation 466

Ureteric stones: diagnostic radiological imaging 468

Ureteric stones: acute management 470

Ureteric stones: indications for intervention to relieve obstruction
and/or remove the stone 472

Ureteric stone treatment 476

Treatment options for ureteric stones 478

Prevention of calcium oxalate stone formation 482

Bladder stones 486

Management of ureteric stones in pregnancy 488

10 Upper tract obstruction, loin pain, hydronephrosis 491

Hydronephrosis 492

Management of ureteric strictures (other than PUJO) 496

Pathophysiology of urinary tract obstruction 498

Physiology of urine flow from kidneys to bladder 499
 Ureter innervation 500
 Retroperitoneal fibrosis 502

11 Trauma to the urinary tract and other urological emergencies 505

Initial resuscitation of the traumatized patient 506
 Renal trauma: classification, mechanism, grading 508
 Renal trauma: clinical and radiological assessment 512
 Renal trauma: treatment 516
 Ureteric injuries: mechanisms and diagnosis 520
 Ureteric injuries: management 522
 Pelvic fractures: bladder and ureteric injuries 526
 Bladder injuries 532
 Posterior urethral injuries in males and urethral injuries
 in females 535
 Anterior urethral injuries 536
 Testicular injuries 540
 Penile injuries 542
 Torsion of the testis and testicular appendages 544
 Paraphimosis 545
 Malignant ureteric obstruction 546
 Spinal cord and cauda equina compression 548

12 Infertility 551

Male reproductive physiology 552
 Aetiology and evaluation of male infertility 554
 Investigation of male infertility 556
 Oligozoospermia and azoospermia 560
 Varicocele 562
 Treatment options for male infertility 564

13 Sexual health 567

Physiology of erection and ejaculation 568
 Erectile dysfunction: evaluation 572
 Erectile dysfunction: treatment 576

Peyronie's disease	580
Priapism	584
Retrograde ejaculation	588
Premature ejaculation	590
Other disorders of ejaculation and orgasm	592
Late-onset hypogonadism (LOH)	594
Hypogonadism and male hormone replacement therapy	596
Urethritis	600
Non-specific urethritis and urethral syndrome	602

14 Neuropathic bladder **603**

Innervation of the lower urinary tract (LUT)	604
The physiology of urine storage and micturition	608
Bladder and sphincter behaviour in the patient with neurological disease	610
The neuropathic lower urinary tract: clinical consequences of storage and emptying problems	612
Bladder management techniques for the neuropathic patient	614
Catheters and sheaths and the neuropathic patient	622
Management of incontinence in the neuropathic patient	624
Management of recurrent urinary tract infections (UTIs) in the neuropathic patient	628
Management of hydronephrosis in the neuropathic patient	630
Bladder dysfunction in multiple sclerosis, Parkinson's disease, spina bifida, after stroke, and in other neurological disease	632
Neuromodulation in neuropathic and non-neuropathic lower urinary tract dysfunction	636

15 Urological problems in pregnancy **639**

Physiological and anatomical changes in the urinary tract	640
Urinary tract infection (UTI)	642
Hydronephrosis of pregnancy	644

16 Paediatric urology **645**

Embryology: urinary tract	646
Embryology: genital tract	648
Undescended testes (UDT)	650

Urinary tract infection (UTI)	654
Antenatal hydronephrosis	658
Vesicoureteric reflux (VUR)	662
Megaureter	666
Ectopic ureter	668
Ureterocele	670
Pelviureteric junction (PUJ) obstruction	672
Posterior urethral valves (PUV)	674
Cystic kidney disease	676
Hypospadias	678
Disorders of sex development	682
Exstrophy–epispadias complex	688
Primary epispadias	690
Urinary incontinence in children	692
Nocturnal enuresis	694

17 Urological surgery and equipment

697

Preparation of the patient for urological surgery	698
Antibiotic prophylaxis in urological surgery	702
Complications of surgery in general: DVT and PE	706
Fluid balance and the management of shock in the surgical patient	710
Patient safety in the urology theatre	712
Transurethral resection (TUR) syndrome	713
Catheters and drains in urological surgery	714
Guidewires	720
Irrigating fluids and techniques of bladder washout	722
JJ stents	724
Lasers in urological surgery	730
Diathermy	732
Sterilization of urological equipment	736
Telescopes and light sources in urological endoscopy	738
Consent: general principles	740
Cystoscopy	742
Transurethral resection of the prostate (TURP)	744
Transurethral resection of bladder tumour (TURBT)	746

Optical urethrotomy	748
Circumcision	750
Hydrocele and epididymal cyst removal	752
Nesbit's procedure	754
Vasectomy and vasovasostomy	756
Orchidectomy	758
Urological incisions	760
JJ stent insertion	762
Nephrectomy and nephro-ureterectomy	764
Radical prostatectomy	766
Radical cystectomy	768
Ileal conduit	772
Percutaneous nephrolithotomy (PCNL)	774
Ureteroscopes and ureteroscopy	778
Pyeloplasty	782
Laparoscopic surgery	784
Endoscopic cystolitholapaxy and (open) cystolithotomy	786
Scrotal exploration for torsion and orchidopexy	788
Electromotive drug administration (EMDA)	790

18 Basic science and renal transplant **793**

Basic physiology of bladder and urethra	794
Basic renal anatomy	796
Renal physiology: glomerular filtration and regulation of renal blood flow	800
Renal physiology: regulation of water balance	802
Renal physiology: regulation of sodium and potassium excretion	803
Renal physiology: acid–base balance	804
Renal replacement therapy	806
Renal transplant: recipient	808
Renal transplant: donor	810
Transplant surgery and complications	812

19 Urological eponyms **815**

Index	820
