Symbols and abbreviations *xix*

Anatomical terminology *xxiii*

Prefixes *xxiv*

Anatomical prefixes *xxv*

Suffixes *xxvi*

Glossary of medical terms *xxvii*

1 Scope of forensic medicine **1**

Introduction to forensic medicine *2*

History of forensic medicine *4*

Developing clinical forensic medicine *6*

Forensic medicine around the world *8*

Professional bodies and discipline *10*

Forensic organizations *12*

Consent *14*

Mental capacity *16*

Confidentiality *17*

Preparing a witness statement *18*

Sample witness statement *20*

Appearing in court *22*

Professional and expert medical evidence *24*

Medical negligence *26*

2 Forensic aspects of death **29**

Definition and diagnosis of death *30*

Changes after death: lividity *32*

Rigor mortis *33*

Changes after death: decomposition *34*

Time interval since death *36*

Death scene investigation *38*

The coroner system in England and Wales *40*

Coroner's inquest *42*

Fatal accident inquiry in Scotland *44*

x DETAILED CONTENTS

Homicide 46
Serial killers 48
Suicide 50
Dyadic death 52
Sudden death from natural causes 54
Accidents as a cause of death 56
Environmental causes of death 58
Deaths during sport 60
Specific sport related deaths 61
Cardiovascular collapse during exercise 62
Trauma scoring 64

3 Forensic autopsy

67

The autopsy: terminology and definitions 68
Historical perspective 70
Forensic or medicolegal autopsy 72
Forensic autopsy procedure: summary 74
The autopsy report 76
External examination 77
Forensic autopsy: evisceration 78
Dissection: cardiovascular system 80
Dissection: respiratory system 82
Dissection: endocrine system 83
Dissection: digestive system 83
Dissection: lymphatic system 84
Dissection: musculoskeletal system 84
Dissection: cranium and nervous system 85
Dissection: genitourinary system 85
Autopsy samples: legal issues 86
Autopsy samples: histology and toxicology 87
The paediatric forensic autopsy 88
Exhumation 89
Mass graves and war crimes 90
Health and safety issues 91
High-risk autopsy 92
Infection risks of autopsy 94
Death certification 96

4 Asphyxia	99
Definitions and historical perspective	100
Clinical features of asphyxia	102
Strangulation	104
Hanging	106
Compression asphyxia	108
Smothering	109
Choking	109
Autoerotic asphyxia	110
Drowning	112
<hr/>	
5 Forensic pathology of physical injury	115
Injury classification	116
Terms used to describe injuries	118
Describing injuries	120
Body diagrams	122
Bruising	124
Progression of bruising with time	126
Lacerations, abrasions, and scratches	128
Incised wounds	130
Stab wounds	132
Slash wounds	136
Skin wound healing	138
Defence injuries	139
Intimate partner violence and abuse	140
Elder abuse and neglect	141
Torture	142
Scalp injury and skull fracture	144
Primary brain injury	146
Traumatic intracranial haemorrhage	148
Further complications of brain injury	150
Facial injury	152
Spinal injury	153
Chest injury	154
Abdominal injury	156
Fractures of the pelvis and extremities	157
Burns	158

xii DETAILED CONTENTS

- Explosive injuries 160
 - Investigations after an explosion 162
 - Firearms 164
 - Rifled gunshot injuries 166
 - Shotgun injuries 168
-

6 The police custody unit 171

- The custody unit 172
 - Purpose of detention 174
 - Police and Criminal Evidence Act 1984 176
 - The custody record 178
 - Conditions of detention 180
 - The forensic physician 182
 - Vulnerable persons in custody 184
 - Appropriate adults 186
 - Solicitors and legal representatives 188
 - Fingerprints and drug testing 190
 - DNA and the national database 191
 - Non-intimate and intimate samples 192
 - Intimate searches 194
 - Approach to custody work 196
 - Personal safety 198
 - The medical room 200
 - Documentation 202
 - Assessing fitness to detain 204
 - Instructions to custody staff 206
 - Levels of observation by custody staff 208
 - Detainees requiring continuing healthcare 210
 - Prescribing medication 212
 - Deaths in custody 214
-

7 Life-threatening emergencies in custody 217

- Approach to life-threatening custody emergencies 218
- Airway obstruction 1 220
- Airway obstruction 2 222
- Choking 224

Near hanging	226
Tension pneumothorax	227
Respiratory arrest	228
The recovery position	229
Cardiac arrest in custody	230
Modified advanced life support	232
Shock	236
Epileptic fit	238
The unconscious patient	239
Suspected meningitis	240
<hr/>	
8 Assessing and managing illness in custody	241
Assessment of illness	242
Management of chronic illness	244
Diabetes	246
Chest pain	248
Palpitations	249
Breathlessness	250
Asthma	252
Alcohol intoxication	254
Alcohol withdrawal	256
Other problems of alcoholics	258
Detainees under the influence of drugs	260
Drug withdrawal	262
Body packers, pushers, and stuffers	264
Other presentations and problems	266
<hr/>	
9 Assessing and managing injury in custody	267
Approach to assessment of injury	268
Clinical assessment of injury	269
Documenting injuries	270
Restraint techniques and injuries	272
Chemical restraint agents	273
Handcuffs	274
Injury from police weapons	276
Taser	277

Head injury from a custody perspective	278
Head injury assessment	280
Referral of head injury to hospital	282
Custody management of head injury	284
Facial injury	286
Spinal injury	288
Dermatomes	289
Skin wounds	290
Bite wounds	292
Closed limb injury	294
Upper limb injury	295
Lower limb injury	296
Blunt chest injury	298
Abdominal injury	300

10 Traffic law and medicine**301**

Road traffic accidents in perspective	302
Road traffic safety	304
Investigating road traffic collisions	306
Patterns of injury in fatal road trauma	308
Patterns of fatal pedestrian injury	309
Patterns of injury in fatal crashes: vehicle occupants	310
Fatal injury patterns: motorcyclists and cyclists	311
Medical conditions and fitness to drive	312
Alcohol and driving performance	314
Drink-driving legislation	316
Provision of specimens for analysis	318
Taking blood alcohol samples in a police station	320
Hospital procedures	322
Failure to provide samples under the Road Traffic Act	324
Failure to provide blood and/or urine	325
Failure to provide a breath sample	326
Field impairment testing by police	328
Medical examination of drug-impaired drivers	330
Drugs and driving performance	332
Drugs and driving: cannabis	333

Drugs and driving: opioids 334
Drugs and driving: benzodiazepines 335
Drugs and driving: stimulants 336

11 Adult sexual assault 339

Definitions and law 340
Background to adult sexual assault 342
Examination suites 344
Principles of assessment 346
Assessment procedure 348
History of assault: the complainant 350
Further medical history: complainant 352
Examination for adult sexual assault 354
Female genital examination 356
Male genital examination 358
Anal examination 360
Examination of suspects 362
Collecting forensic samples 364
Persistence of forensic material 366
Sexual assault examination kit 368
Documentation of findings 369
Interpretation of genital findings 370
Interpretation of anal findings 372
Treatment, counselling, and follow-up 374
Appearance in court 376

12 Child abuse and neglect 377

Background and historical perspective 378
Types of child abuse 380
Medical approach to child abuse 381
Children Act 1989 and 2004 (England and Wales) 382
Physical abuse: medical perspective 384
Presentation of physical abuse 386
Physical abuse: examination 388
Physical abuse: interpreting findings 390
Development of sexual characteristics 392
Sexual abuse: presentation 394

Sexual abuse: approach to examination	396
Sexual abuse: examination procedure	398
Sexual abuse: interpreting findings	400
Recommended terminology	401
Female child genital findings	402
Anal findings in suspected child abuse	404
Sexual abuse and infections	405
Neglect and emotional abuse	406
Fictitious illness by proxy	408
Management of child abuse	409

13 Psychiatric aspects 411

Introduction	412
Definitions of some common terms	413
Anxiety disorders	414
Mood disorders	416
Psychotic illness	417
Learning disability	418
Psychiatric illness, alcohol, and drugs	420
Violent/disturbed behaviour	422
Assessment of the mental state	424
Assessment of suicide risk	426
Fitness to interview	428
Fitness to be charged/plead	432
Mental capacity and the 2005 Act	434
Mental health legislation	436
Compulsory hospitalization	438
Sections 136 and 135 (Mental Health Act 1983)	440
Diversion from the criminal justice system	442
Forensic psychiatry	444
Forensic psychology	446

14 Forensic toxicology 447

Introduction to forensic toxicology	448
Arsenic poisoning	449
Common drugs and poisons	450
Toxicology and sudden death	452

Signs of poisoning at autopsy 453
 Postmortem sample collection 454
 Interpretation of postmortem toxicology 456
 Controlled drugs legislation 458
 Alcohol overview 460
 Alcohol and sudden death 462
 Toxicological kinetics 464
 Diamorphine (heroin) and morphine 466
 Methadone (physeptone) 468
 Other opioid substitutes 469
 Stimulants: amphetamines and ecstasy 470
 Cocaine 472
 Hallucinogens and related substances 474
 Benzodiazepines 476
 Phenothiazines 477
 'Date-rape' drugs 478
 Poisonous gases 480
 Volatile substances 482
 Antidepressants 483
 Paracetamol poisoning 484
 Aspirin and non-steroidal poisoning 485
 Harold Shipman 486
 Public health 487
 Drugs in sport 488
 Drugs and substance dependence 489
 Glossary of drug terminology 490
 Antidepressant drugs 492
 Analgesic drugs 493

15 Forensic science 495

Introduction to forensic science 496
 Crime scene management 498
 Crime scene investigation 500
 Locard's principle 502
 Identification: matching and uniqueness 504
 The Ruxton case 506
 Daubert 507

Trace evidence: background 508
Trace evidence: glass 509
Trace evidence: paint 510
Trace evidence: hairs and fibres 511
Fingerprints 512
Forensic analysis of DNA 514
Interpretation of DNA analysis 516
National DNA database 520
Exonerating the innocent 521
Forensic biology 522
Source of blood 524
Blood pattern analysis 526
Forensic identification of semen 528
Forensic identification of other fluids 529
Forensic anthropology 530
Forensic archaeology 532
Forensic entomology 534
Environmental forensics 536
Document analysis 537
Forensic miscellany 538
Fire: background 540
Fire prevention and safety 541
Behaviour of fire indoors 542
Behaviour of fire outdoors 544
Fire: investigation 546
Explosions and explosives 548
Explosion investigation 550
The context effect and scientific evidence 552
Forensic statistics 553
The prosecutor's fallacy 554

Index 557
