PREFACE TO THE SECOND EDITION	xv
PREFACE TO THE FIRST EDITION	xvii
ACKNOWLEDGMENTS	xix
AUTHOR	xxi
I. BASICS OF TOXICOLOGY RELATED TO FOOD	1
1. INTRODUCTION	3
1.1 What Is Toxicology?	3
1.2 Short History of Toxicology	6
1.3 Toxicity, Dose, and Response	8
1.4 Integrated Effect of Toxic Substances	16
1.5 Classification of Toxicants	18
1.6 Some Toxicology-Related Principles of Cellular Biology and Biochemistry	18
1.6.1 Structure of Cellular Membranes	18
1.6.2 Transport of Substances across Biomembranes	19
1.6.3 Receptors	23
1.6.4 Ion Channels	25
References	26
2. ROUTES OF XENOBIOTICS IN AN ORGANISM	27
2.1 Entry and Absorption of Foreign Compounds	27
2.1.1 Digestive Tract	28
2.1.2 Lungs	30
2.1.3 Skin	30
2.2 Distribution of Xenobiotics in the Organism	31
2.2.1 Blood Supply and Membrane Barriers	31
2.2.2 Role of Lymph in Absorption and Distribution of Xenobiotics	34

2.2.3	Binding of Xenobiotics to Charged Particles	34
2.2.4	Bioaccumulation of Xenobiotics	35
2.3	Metabolism of Xenobiotics	36
2.3.1	General Principles	36
2.3.2	Phase I Reactions	39
2.3.2.1	Enzyme Superfamily CYP	40
2.3.2.2	Other Enzymes Catalyzing Oxidation	41
2.3.2.3	Examples of Phase I Reactions	42
2.3.3	Phase II Reactions	45
2.3.4	Induction and Inhibition of Metabolic Enzymes	50
2.3.4.1	Induction of Enzymes	50
2.3.4.2	Inhibition of Enzymes	52
2.3.5	Participation of Enteric Microflora in the Metabolism of Xenobiotics	53
2.3.6	Influence of Diet on Metabolism	54
2.4	Elimination of Xenobiotics and/or Their Metabolites from the Organism	56
2.4.1	Kidneys	56
2.4.2	Liver	58
2.4.3	Intestines	59
2.4.4	Lungs	59
2.5	Biomagnification	59
2.6	Antidotes	61
2.6.1	General Methods	61
2.6.2	Specific Mechanisms of Antidote Action	62
	References	63
3.	TOXIC RESPONSE	65
3.1	Variability in Toxic Response	65
3.2	Physiological Classification of Toxic Responses	66
3.2.1	General Principles	66
3.2.2	Direct Injury to a Cell or a Tissue	69
3.2.3	Biochemical Damage	70
3.2.4	Neurotoxicity	72
3.2.5	Immunotoxicity	73
3.2.6	Teratogenicity	74
3.2.7	Genotoxicity and Mutagenicity	77
3.2.8	Carcinogenicity	79
3.2.9	Reproductive and Developmental Toxicity	87
3.2.9.1	Reproductive Toxicity	88
3.2.9.2	Developmental Toxicity	88
3.2.10	Multiorgan Toxicity	89
3.3	Molecular Mechanisms of Toxicity	90

3.3.1	Disturbance of Cell Homeostasis	91
3.3.2	Receptor-Mediated Mechanisms	91
3.3.3	Other Toxic Effects Mediated by Cellular Membranes	94
3.3.4	Alteration of Cell Energetics	95
3.3.5	Covalent Binding to Essential Cellular Macromolecules	95
3.3.6	Endocrine Disruption	96
3.3.7	Oxidative Stress	101
3.3.8	Inhibition of DNA Repair	103
3.3.9	Multiple Interorgan Effects	103
3.4	Biomarkers of Toxic Effect	104
	References	106
4.	ANALYTICAL TOXICOLOGY	109
4.1	Introduction	109
4.2	Sample Preparation	109
4.3	Mouse Bioassay: Functional Analysis	110
4.4	Biological Methods: Biosensors	112
4.5	Immunochemical Methods: Immunosensors	112
4.6	Spectrophotometric (Colorimetric) Methods	113
4.7	Electrophoretic Methods	113
4.8	Chromatographic Methods	113
	References	114
5.	EVALUATION OF TOXICITY OF SUBSTANCES	117
5.1	Epidemiological Studies	117
5.2	Animal Tests	119
5.2.1	General Principles	119
5.2.2	Organism-Depending Factors, Influencing the Compound Toxicity	124
5.2.2.1	Dependence on Species	124
5.2.2.2	Genetic Variabilities	125
5.2.2.3	Generic Variabilities	126
5.2.2.4	Dependence on the Age	127
5.2.2.5	Dietary Conditions	127
5.2.2.6	Health Conditions	129
5.2.2.7	Simultaneous Contact with Several Xenobiotics	129
5.3	Cell Culture Tests	130
5.4	Computer Calculations	133
5.5	Acute Toxicity Tests	134
5.6	Subacute/Subchronic Toxicity Tests	136

5.7	Chronic Toxicity Tests: Acceptable Daily Intake	136
5.8	Specific Toxicity Tests	138
	References	139
6.	TOXICOLOGICAL SAFETY AND RISK ANALYSIS	141
6.1	Toxicological Safety	141
6.2	Risk Assessment	142
6.2.1	Hazard Identification: Principle of the Three R's	145
6.2.2	Demonstration of a Dose-Response Relationship	145
6.2.3	Assessment of Exposure	147
6.2.4	Risk Characterization	148
6.3	Risk-Benefit Analysis	151
	References	153
II.	MAIN GROUPS OF FOOD TOXICANTS	155
7.	ENDOGENOUS PLANT TOXICANTS	157
7.1	Lectins or Hemagglutinins	157
7.2	Enzyme Inhibitors	159
7.3	Alkaloids	160
7.3.1	Pyrrrolizidine Alkaloids	160
7.3.2	Solanine-Group Glycoalkaloids	162
7.3.3	Xanthine Alkaloids	164
7.3.4	Ephedrine Alkaloids	167
7.4	Cyanogenic Glycosides: Toxicity Mechanism of HCN	168
7.5	Phytoestrogens	171
7.6	Glucosinolates	172
7.7	Coumarin	174
7.8	Thujones	175
7.9	Toxic Amino Acids	177
7.10	Toxic Lipids	179
7.10.1	Erucic Acid	179
7.10.2	Sterculic and Malvalic Acids	180
7.10.3	Polyunsaturated Fatty Acids	180
7.11	Oxalates	181
7.12	Fluoroacetates	182
7.13	Bracken Toxins	183
7.14	Saponins	184
7.15	Grayanotoxin	186
7.16	Soybean as a Potential Source of Versatile Possible Toxicants	187
7.17	Mushroom Toxins	188
7.17.1	General Principles	188
7.17.2	Amatoxins	190

- 7.17.3 Muscarine 191
- 7.17.4 Isoxazoles 192
- 7.17.5 Other Mushroom Toxins 193
- References 195
- 8. GEOCHEMICAL POLLUTANTS THAT PLANTS ABSORB FROM SOIL 199
 - 8.1 Arsenic 199
 - 8.2 Selenium 202
 - 8.3 Fluorine 204
 - References 206
- 9. ENVIRONMENTAL POLLUTANTS 209
 - 9.1 Toxic Elements 209
 - 9.1.1 Mercury 209
 - 9.1.2 Lead 212
 - 9.1.3 Cadmium 214
 - 9.1.4 Chromium 216
 - 9.1.5 Copper 217
 - 9.1.6 Nickel 218
 - 9.2 Radionuclides 219
 - 9.3 Polychlorinated Biphenyls 221
 - 9.4 Polychlorinated Dibenzodioxins and Dibenzofurans 223
 - References 228
- 10. MYCOTOXINS 231
 - 10.1 Overview 231
 - 10.2 Aflatoxins 233
 - 10.3 Ochratoxins 236
 - 10.4 Sterigmatocystin 238
 - 10.5 Zearalenone 239
 - 10.6 Fumonisin 240
 - 10.7 Trichothecenes 240
 - 10.8 Patulin 242
 - 10.9 Citrinin and Citreoviridin 242
 - 10.10 Ergot Toxins 243
 - 10.11 Other Mycotoxins 245
 - 10.12 Combined Toxicity of Mycotoxins 246
 - References 246
- 11. ANIMAL ENDOGENOUS POISONS 249
 - 11.1 Prions 249
 - 11.2 Lactose 251
 - 11.3 Phytanic Acid 252

11.4	Avidin	253
11.5	Vitamins of Animal Origin	253
	References	254
12.	FOOD TOXICANTS FROM AQUATIC ANIMALS	255
12.1	Introduction	255
12.2	Shellfish Toxicants	255
12.2.1	Paralytic Shellfish Poisoning	255
12.2.2	Diarrhetic Shellfish Poisoning	258
12.2.3	Neurotoxic Shellfish Poisoning	260
12.2.4	Amnesic Shellfish Poisoning	261
12.2.5	Microcystins and Nodularins	262
12.3	Fish Toxins	263
12.3.1	Tetrodotoxin	263
12.3.2	Ciguatoxin	265
	References	267
13.	PESTICIDE RESIDUES	269
13.1	Overview	269
13.2	Insecticides	277
13.3	Herbicides	278
13.4	Fungicides	279
	References	280
14.	VETERINARY DRUGS AND FEED ADDITIVES	283
14.1	Antibiotics	284
14.2	Hormones	285
14.3	Other Veterinary Drugs	286
14.3.1	Coccidiostatics	286
14.3.2	Anthelmintics	287
14.3.3	β -Agonists	288
14.3.4	Glucocorticoids	288
14.3.5	Thyreostatics	288
	References	289
15.	TOXICANTS UNINTENTIONALLY FORMED DURING PROCESSING, STORAGE, AND DIGESTION OF FOOD	291
15.1	General	291
15.2	Polycyclic Aromatic Hydrocarbons	295
15.3	Alcohols	298
15.4	Bacterial Toxins	302
15.4.1	Exotoxins	303
15.4.1.1	<i>Staphylococcus</i>	303
15.4.1.2	<i>Clostridia</i>	304
15.4.1.3	<i>Bacillus cereus</i>	308

- 15.4.1.4 Campylobacters 308
- 15.4.1.5 *Listeria* 309
- 15.4.2 Endotoxins 310
- 15.5 Biogenic Vasoactive Amines 312
 - 15.5.1 Scombroid Poisoning 313
- 15.6 Nitrates, Nitrites, and Nitrosamines 316
- 15.7 Acrylamide 319
- 15.8 *Trans* Fatty Acids 321
- 15.9 Chlorinated Propanols 322
- 15.10 Food Contact Materials 323
 - 15.10.1 Phthalates 323
 - 15.10.2 Bisphenols 326
 - 15.10.3 Aluminum from Cookware 327
- References 328
- 16. FOOD ADDITIVES 333
 - 16.1 Traditional Food Additives 333
 - 16.1.1 General Principles: ADI 333
 - 16.1.2 Colorants 336
 - 16.1.3 Artificial Sweeteners 337
 - 16.1.4 Preservatives 340
 - 16.1.5 Antioxidants 340
 - 16.1.6 Glutamates 340
 - 16.2 Functional Additives 341
 - 16.2.1 General Principles 341
 - 16.2.2 Functional Additive–Drug Interactions 345
 - References 346
- 17. VITAMINS 349
 - 17.1 General 349
 - 17.2 Vitamin A: Phenomenon of Smokers 350
 - 17.3 Vitamin D 353
 - 17.4 Vitamin E 354
 - 17.5 Vitamin K 355
 - 17.6 Vitamin B₂ 356
 - 17.7 Vitamin B₆ 356
 - 17.8 Vitamin C 357
 - 17.9 Vitamin B₃ 358
 - 17.10 Diagnosing and Therapy of Vitamin Intoxications 359
 - References 359
- 18. FOOD ADULTERATION 361
 - 18.1 What Is Food Adulteration? 361
 - 18.2 Melamine and Cyanuric Acid 361

xiv CONTENTS

18.2.1	Toxicity of MEL	363
18.2.2	Toxicity of Cyanuric Acid	363
18.2.3	Combined Toxicity of Triazine Compounds	364
18.3	Anisatine	365
18.4	Toxic Oil Syndrome	366
18.5	Epidemic Dropsy	367
	References	368
