# *Contents*

Preface.....	x <sup>i</sup>
About the Author.....	xv
<b>Chapter 1 Safety pharmacology: Background, history, issues, and concerns .....</b>	<b>1</b>
1.1 General versus safety pharmacology .....	2
1.2 History.....	4
1.3 Reasons for poor predictive performance.....	7
1.4 Why tiers? .....	8
1.5 Study designs and principles.....	9
1.5.1 Selection of methodology and species.....	9
1.6 Issues .....	12
1.7 Integral versus separate.....	13
1.8 Summary .....	15
References .....	15
<b>Chapter 2 Regulatory requirements: ICH, FDA, EMA, and Japan....</b>	<b>19</b>
2.1 Regulatory requirements.....	19
References .....	23
<b>Chapter 3 Principles of screening and study design.....</b>	<b>25</b>
3.1 Introduction.....	25
3.2 Characteristics of screens .....	27
3.3 Uses of screens .....	30
3.4 Types of screens .....	32
3.5 Criterion: Development and use .....	32
3.6 Analysis of screening data .....	35
3.6.1 Univariate data.....	35
3.6.1.1 Control charts.....	35
3.6.1.2 Central tendency plots .....	37
3.6.2 Multivariate data.....	38
3.6.2.1 Analog plot .....	39
3.7 Study design.....	41

3.7.1	Animal model .....	41
3.7.2	Group size.....	42
3.7.3	Statistical design .....	42
3.7.3.1	Dose levels and test concentrations .....	42
	References .....	42
<b>Chapter 4 Cardiovascular system.....</b>		<b>45</b>
4.1	Introduction.....	45
4.2	History.....	45
4.2.1	Special case (and concern)—QT prolongation .....	45
4.2.1.1	Regulatory developments.....	47
4.2.2	Patch-clamp studies using recombinant cells expressing hERG channels.....	57
4.2.3	hERG protein expression system.....	57
4.2.3.1	Relevance of hERG to QT prolongation.....	58
4.2.3.2	Expression and recording systems.....	58
4.2.4	Cardiovascular function testing.....	59
4.2.5	Conscious rodent, dog, and primate telemetry studies....	64
4.2.5.1	Six-lead ECG measurement in the conscious dog .....	64
4.2.6	Systems for recording cardiac action potentials .....	65
4.2.6.1	Cloned human potassium channels .....	65
4.2.6.2	Cardiac action potential <i>in vitro</i> —Purkinje fibers .....	65
4.2.6.3	Monophasic action potential in anesthetized guinea pigs.....	65
4.2.6.4	ECG by telemetry in conscious guinea pigs .....	65
4.2.6.5	Hemodynamics and ECG in anesthetized or conscious dogs or primates .....	66
4.3	Summary .....	66
	References .....	66
<b>Chapter 5 Central nervous system.....</b>		<b>69</b>
5.1	Core battery CNS procedures.....	72
5.1.1	General behavioral observation.....	72
5.1.2	Functional observational battery .....	73
5.2	Rat .....	74
5.2.1	Observational assessments .....	74
5.2.2	Locomotor activity.....	75
5.2.3	Motor coordination.....	75
5.2.4	Pain sensitivity .....	76
5.2.5	Convulsive threshold.....	76
5.3	Dog.....	77
5.3.1	Neurobehavioral screen.....	77

5.4	Sleep induction and interaction with hypnotics .....	81
5.5	Higher cognitive function .....	81
5.5.1	Passive avoidance .....	81
5.5.2	Morris maze .....	82
5.5.2.1	Materials.....	82
5.5.2.2	Set up apparatus and begin acquisition testing ...	83
5.5.2.3	Continue trials.....	83
5.6	Isolated tissue assays.....	84
5.6.1	Electrophysiology methods.....	84
5.7	CNS function: Electroencephalography.....	86
5.8	Neurochemical and biochemical assays .....	87
	References .....	88
	<b>Chapter 6 Respiratory system.....</b>	<b>91</b>
6.1	Plethysmography.....	96
6.2	Design of respiratory function safety studies .....	99
6.2.1	General considerations .....	99
6.2.2	Study design.....	99
6.2.3	Capnography .....	100
6.3	Study design considerations .....	101
6.3.1	Dose selection.....	101
6.3.2	Species selection.....	101
6.4	Summary .....	101
	References .....	102
	<b>Chapter 7 Renal function.....</b>	<b>105</b>
7.1	Major functions of the kidney .....	106
7.2	Acute renal failure.....	108
7.3	Functional reserve of the kidney.....	109
7.4	Clearance.....	109
7.5	Free water clearance and renal concentrating ability .....	114
7.5.1	Renal blood flow .....	116
7.5.2	Fractional excretion of sodium .....	116
7.6	Clinical chemistry measures .....	116
7.7	Animal models.....	117
7.7.1	Rat .....	117
7.7.2	Dog.....	118
7.8	Examples of species differences in drug sensitivity.....	118
	References .....	119
	<b>Chapter 8 The gastrointestinal system.....</b>	<b>121</b>
8.1	Drug-induced alterations of GI transit or motility .....	122
8.2	Gastrointestinal function.....	122
8.3	Assessment of intestinal transit.....	124

8.4	Determination of intestinal absorption.....	126
8.4.1	Methods of administering test substance.....	126
8.4.2	Methods for quantitating degree of absorption.....	127
8.4.2.1	Appearance in systemic fluids.....	127
8.5	Gastric emptying rate and gastric pH changes: A new model.....	130
8.6	Effects of drugs on gut immune system (jejunum, ileum, colon)....	131
8.7	Candidate drugs to evaluate for effects on gut immune system...	131
8.8	Conclusions .....	132
	References .....	132
	<b>Chapter 9 The immune system.....</b>	<b>135</b>
9.1	Introduction to the immune system and adverse modulation activities of drugs .....	135
9.1.1	Passive cutaneous anaphylaxis: Test for potential antigenicity of compound .....	137
9.1.1.1	Test method for pulmonary sensitization.....	140
9.1.2	Center for Drug Evaluation and Research guidance for investigational new drugs.....	141
9.2	Overview of the immune system .....	142
9.3	Immunotoxic effects.....	148
9.3.1	Immunosuppression .....	149
9.3.2	Immunosuppressive drugs .....	151
9.3.2.1	Antimetabolites.....	151
9.3.2.2	Glucocorticosteroids.....	154
9.3.2.3	Cyclosporine.....	155
9.3.2.4	Nitrogen mustards.....	155
9.3.2.5	Estrogens.....	156
9.3.2.6	Heavy metals.....	156
9.3.2.7	Antibiotics.....	157
9.3.3	Immunostimulation .....	157
9.3.3.1	Hypersensitivity .....	159
9.3.3.2	Photosensitization.....	164
9.3.3.3	Autoimmunity.....	165
	References .....	169
	Appendix A: Acronyms .....	175
	Appendix B: Laboratories conducting safety pharmacology testing....	179
