1 Introduction	1
1.1 Nature of Science Investigation	2
1.2 Sorting Out the Terminology	3
1.2.1 Practical Work	4
1.2.2 Experiments	4
1.2.3 Scientific Method	5
1.2.4 Approaches to Investigation	5
1.3 The Context of the Study	6
1.4 The Research Questions	7
1.5 Outline of This Book	7
References	8
2 Science Laboratory Learning Environment, and Learning	11
2.1 Science Laboratory and Learning	11
2.2 Science Laboratory Environment Inventory	12
2.3 Methodology	13
2.4 Results	14
2.4.1 The Science Laboratory	14
2.4.2 Results of the SLEI	15
2.5 Student Experiences of Learning to Investigate	16
2.5.1 Illustrative Example 1	17
2.5.2 Illustrative Example 2	19
2.6 Chapter Summary	22
References	23
3 Motivation to Learn Science Investigation	25
3.1 Relevant Theories of Motivation	25
3.2 Assessment of Motivation	29
3.3 Motivation and Approaches to Learning	29
3.4 Motivational Framework for the Study	30

3.5	Results	30
3.5.1	Engagement	31
3.5.2	Variety	32
3.5.3	Novelty	34
3.6	Summary	37
	References	38
4	Assessment of Science Investigation	41
4.1	Multiple Purposes of Assessment in Science	41
4.1.1	Diagnostic Assessment	41
4.1.2	Formative Assessment	42
4.1.3	Summative Assessment	43
4.1.4	Assessment for Evaluation	43
4.2	Assessment in Science for Year 11	43
4.3	Results	44
4.3.1	Formative Assessment in the Study Class	44
4.3.2	Summative Assessment in the Study Class	46
4.4	Study Class National Certificate of Educational Achievement Results	52
4.5	Validity, Reliability, and Manageability	53
4.6	Summary	54
	References	55
5	Discussion and Conclusion	57
5.1	Emergent Themes	57
5.1.1	Fair Testing: Investigation in Practice	57
5.1.2	Learning that Science Investigation Process Is Linear and Sequential	58
5.1.3	Learning Through Science Investigation	59
5.1.4	Motivational Influences of Science Investigation	60
5.1.5	Assessment as the Driver of Learning	62
5.1.6	Assessment Reliability and Validity Issues	62
5.1.7	Assessment Promoted Low Level Learning Outcomes	65
5.1.8	Assessment Encouraged a Surface Approach to Learning	66
5.2	Conclusion	67
