

Table of Contents

	Page
Prologue	ix
Dedication	xi
Acknowledgement	xii
Clinical physiological challenges	xiii
Overview of the GI tract	1
Luminal Anatomy of the GI Tract	2
Digestion and absorption of macronutrients	3
Control of Food Intake	7
Control Of Food Intake	8
Networks Involved in the Control of Food Intake	11
Starvation	20
Protein – Energy Malnutrition (PEM)	22
Mouth and salivary glands	25
Regulation of Salivary Secretion	31
Esophagus	33
Gross Anatomy of Esophagus	34
Lower Esophageal Sphincter	38
Gastroesophageal Reflux Disease	42
Swallowing	43
Esophageal Motility Disorders	49
Stomach	51
Gastric Anatomy	52
Gastric Hydrochloric Acid Secretion at the Macromolecular level	55
Acid Secretion	56
Gastric Hydrochloric Acid Secretion at the Micro' (Cellular) Level of the Parietal Cell	68
Gastric Secretion of Pepsinogen	75
Gastric Filling and Emptying	77

Determinants of Rate of Gastric Emptying	81
Tests of Gastric Neurological Function	84
Vomiting	86
Pancreas	91
Functional Anatomy of the Pancreas	92
Pancreatic Acinar Cell Secretion of Protein	93
The Macro' Level of Pancreatic Secretion	94
The Micro' (Cellular) Level of Pancreatic Secretion of Enzymes	101
Pancreatic Enzymes	105
Protection of the Pancreas from Auto Digestion	108
Pancreatic Stones	119
Hepatobiliary System	121
Hepatocytes, Sinusoids, and the Intrahepatic Bile System	122
Causes of Portal Hypertension	128
Portal Circulation	130
The Enterohepatic Circulation (EHC) of Bile Acids	130
Secretion of HCO ³⁻ and water by Cholangiocytes	141
Gallbladder	146
Absorption of Electrolytes and Water by Gallbladder	148
Pathophysiology of Gallstone Formation	149
Formation of Cholesterol Gallstones	150
Development of Lithogenic Bile	152
Bilirubin metabolism	161
Complications of Gallstones	164
Heterogeneity of hepatocyte metabolic function in the hepatic zones	166
Non-Alcoholic Fatty Liver Diseases (simple steatosis and non-alcoholic steatohepatitis)	175
Polycystic Liver Diseases (PLDs)	180
Hepatic Encephalopathy (HE)	180
Small Intestine	189
The Types of Epithelial Cells of the Intestinal Mucosa:	191
Enterocytes	
Small Intestinal Motility	194
Absorption of Water	202

Chloride Secretion	216
Secretion	219
Potassium (K ⁺) Absorption and Secretion	226
Absorption of Proteins, Peptides, Oligopeptides and Amino Acid	227
Carbohydrate Assimilation	236
Absorption of Triglycerides	243
Absorption of fat soluble Vitamins A, D, E, and K	252
Cholesterol	252
Bile Acids – Intestinal Components of Enterohepatic Circulation (EHC) of Bile Acids	260
Control of the Enterohepatic Circulation (EHC) of Bile Acids	264
Water Soluble Vitamins	267
Minerals	271
Colon	283
Structure	284
Movement/ Transit	284
Classification of Laxatives	290
Defecation	292
Fecal continence	296
Fecal Incontinence	297
Rectal Manometry	300
Miscellaneous Topics	301
Mucosal Immunity	302
Food Allergies	307
Oncogenesis	310
Oncogenesis – associated genes and colorectal cancer	312
Visceral Pain	313
Index	317
