

# CONTENTS

<i>Preface</i>	ix
<i>Acknowledgements</i>	xi
<b>1 An overview of the theory</b>	<b>1</b>
Context	4
Limitations of the existing theories	5
Core elements of CEOS	12
Conceptual underpinnings	14
The generation of behaviour	17
Capacity of the ES	19
Initiation versus maintenance of behaviour	20
The relationships between the two systems	21
Story creation within the ES	22
Biological constraints	22
Elaboration of CEOS theory	24
References	26
<b>2 Characteristics of hard-to-maintain behaviours</b>	<b>31</b>
Types of behaviour to change	31
What makes some behaviours hard to maintain?	34
Hard-to-reduce/resist/eliminate behaviours	37
Addictions versus other HTR behaviours	38
The example of smoking	40
Hard-to-sustain behaviours	44
Examples of HTS behaviours	45
Combinations of both kinds of behaviour change	46
Replacements and substitutes	47
What is learnt in HTM behaviour change	48
References	50
<b>3 The roles of the operational and executive systems</b>	<b>54</b>
The Operational System	55
The nature of the Operational System	55
Functions of the Operational System	60
Modifying OS functions	62

The Executive System	65
Core capacities of the ES	66
Inputs to the ES	69
Stories and the roles they play	72
What the ES can do	75
Limitations of thinking	81
Self-regulation	85
The stability of change	86
Relationship of CEOS to other dual-process theories	86
References	94
<b>4 Environmental influences: the context of change</b>	<b>98</b>
The relatively stable environment	99
The social environment and social norms	102
Modelling and vicarious learning	103
Changing the broader environment	104
Regulation and legislation	106
Public education	109
The interactional environment	110
Requisites for behaviour	110
Interpersonal influences	111
References	114
<b>5 Conceptual influences on change</b>	<b>117</b>
Framing the problem	118
Message framing	120
Mechanisms of persuasion	122
Organisation of concepts about change	125
Core beliefs and values	126
The desirability of change	127
Influences on goal desirability	127
Priority	130
Decisional balance	131
Goal achievability	133
Analysis of the challenge (task difficulty)	133
Self-efficacy	135
Beliefs that can interfere with behaviour change	137
References	139
<b>6 The structure of the change process</b>	<b>142</b>
Tasks involved in behaviour change	143
Getting behaviour change on the agenda	145
Goals	146
Making an attempt to change	148
Scripts	152
Commitments to change	154

Maintaining change: perseverance	155
Determinants of maintenance/relapse	159
Drivers of relapse	160
Maintaining appropriate beliefs	161
Influences on self-control	163
Influences on reorienting the OS	164
Recovering from setbacks	165
Feedback and evaluation	166
Repeated attempts are the norm	167
Hardening: the changing nature of the population who have not changed	169
References	171
<b>7 Interventions for behaviour change</b>	<b>176</b>
Internal and external perspectives on change	177
Differences between HTR and HTS behaviours	178
Enhancing executive function: optimising understanding	180
Framing: defining the problem and options for change	180
Feedback and evaluation	182
Making relevant knowledge salient	183
The occasional value of biases	185
Enhancing self-control	186
Enhancing executive functions	187
Managing and prioritising life challenges	188
Implementation intentions	189
Enhancing self-reorientation	190
Mindfulness and awareness	190
Acceptance	191
Understanding emotions and attitudes	193
Reconditioning the Operational System	194
Targeting alternatives to the desired behaviour	196
Practice	196
Use of drug therapies	197
Creating more supportive environments	197
Changing the pattern of cues to act	197
Rewards and other motivators	198
Understanding communication	198
Externalising self-control	199
The availability of what is required	200
Advocating for change	200
Integrative strategies	201
Building a revised sense of self	201
Improving recovery from setbacks	202
Optimising a script or plan for action	202
References	205

<b>8 Using CEOS to advance knowledge</b>	209
Key features of CEOS theory	209
Reframing thinking	211
Key questions to answer for behaviour change	213
Contributions of different kinds of research	213
Measuring key constructs	215
Measuring ES influences on behaviour	217
Measures of OS influences on behaviour	218
Measures of context	219
Elements of a theory-driven research agenda	220
Comparisons with other theories	221
Implications for reducing inequities	226
Concluding comments	227
References	229
