<b>Woodhead Publishing Series in Food Science, Technology and Nutrition</b>	<b>xv</b>
<b>1 Introduction to food allergy</b>	<b>1</b>
<i>R. K. Ward</i>	
1.1 Introduction: what is food allergy?	1
1.2 Other food intolerances	3
1.3 Food allergy prevalence and patterns	3
1.4 What is a food allergen?	4
1.5 Food allergen risk management	5
1.6 The value of having food allergen data	8
1.7 Challenges and considerations in food allergen analysis	9
1.8 Conclusions	12
References	12
<b>Part One Managing allergens in the food chain</b>	<b>17</b>
<b>2 Traceability of allergenic foods in the food chain</b>	<b>19</b>
<i>P. Millard, S. Paine, S. O'Hagan, J. Hipkiss</i>	
2.1 Introduction	19
2.2 Legislation, standards and guidance	22
2.3 Traceability systems	29
2.4 Analytical methods used in traceability investigations	38
2.5 Conclusions	38
References	39
<b>3 Food allergen risk assessment and management</b>	<b>41</b>
<i>R. W. R. Crevel</i>	
3.1 Introduction	41
3.2 Food allergy as a public health issue	42
3.3 Risk assessment for food allergens: background and issues	46
3.4 Development of risk assessment for food allergens	47
3.5 Practical aspects of risk assessment	55
3.6 Risk management	57
3.7 Conclusions	63
References	63

---

<b>4</b>	<b>Assessment and communication of allergen risks in the food chain</b>	<b>67</b>
	<i>S. Flanagan</i>	
4.1	Introduction	67
4.2	Principles and methods	68
4.3	Allergen risk assessment and hazard characterisation	70
4.4	Risk communication	81
4.5	Risk assessment to allergen control plan	82
4.6	Current research and future trends	83
4.7	Conclusions	84
	References	85
<b>5</b>	<b>Hygienic design and cleaning as an allergen control measure</b>	<b>89</b>
	<i>D. Nikoleiski</i>	
5.1	Introduction	89
5.2	Hygienic design: regulations and norms	89
5.3	Hygienic equipment design	90
5.4	Hygienic building design	93
5.5	Integrating hygienic systems/hygienic engineering	94
5.6	Cleaning as an allergen control measure	96
5.7	Allergen cleaning: verification and validation	100
	References and further reading	102
<b>6</b>	<b>Effective allergen management practices to reduce allergens in food</b>	<b>103</b>
	<i>K. Stein</i>	
6.1	Introduction	103
6.2	The retailer's perspective	103
6.3	The allergy journey	106
6.4	Labelling and packaging	109
6.5	Marks & Spencer packaging evolution	110
6.6	Allergen management risk assessment	112
6.7	Marks & Spencer's risk assessment process	114
6.8	Factory standards and controls	119
6.9	Gluten-free	129
6.10	Next steps	130
	Acknowledgements	131
	References	131
<b>7</b>	<b>Consumer attitudes to allergens in food</b>	<b>133</b>
	<i>M. H. Gowland</i>	
7.1	Introduction	133
7.2	Which consumers are avoiding foods and why?	134
7.3	What information do these consumers need?	139
7.4	Living with food allergy	140
7.5	Information from packaging	143
7.6	Challenges for consumers at different stages of life	144

---

7.7	Summary of consumer needs	149
7.8	How can food suppliers ensure consumer confidence and trust?	149
7.9	Conclusions and future trends	154
7.10	Sources of further information and advice	157
	Acknowledgements	157
	References	157
<b>8</b>	<b>Assessing and managing allergenicity of genetically modified (GM) foods</b>	<b>161</b>
	<i>J. M. Wal</i>	
8.1	Introduction	161
8.2	Assessing the allergenicity of novel proteins	163
8.3	Key steps in allergenicity assessment	164
8.4	Environmental factors affecting allergenicity	167
8.5	Assessing the allergenicity of whole GM plants	169
8.6	Assessing the allergenicity of products from GM animals	172
8.7	Post-market monitoring	173
8.8	Conclusion	174
	References	176
<b>Part Two</b>	<b>Detecting allergens in food</b>	<b>179</b>
<b>9</b>	<b>Sampling for food allergens</b>	<b>181</b>
	<i>H. M. Brown, H. E. Arrowsmith</i>	
9.1	Introduction	181
9.2	Reasons to sample for food allergens and sampling plans	181
9.3	Approaches to sampling	184
9.4	Sample types	186
9.5	Quality of the sample	193
9.6	Future trends	196
	References	196
<b>10</b>	<b>Enzyme-linked immunosorbent assays (ELISAs) for detecting allergens in food</b>	<b>199</b>
	<i>U. Immer, M. Lacorn</i>	
10.1	Introduction	199
10.2	Principles of an enzyme immunoassay	200
10.3	Main components of ELISA	202
10.4	Detection issues relating to particular allergens: egg, milk, nuts, prolamins and glutelins	209
10.5	Validation, characteristic parameters of ELISA and collaborative studies	212
10.6	Conclusions	214
	References	214

---

<b>11</b>	<b>Lateral flow devices for detecting allergens in food</b>	<b>219</b>
	<i>J. L. Baumert, D. H. Tran</i>	
11.1	Introduction	219
11.2	Lateral flow devices	220
11.3	Development of a lateral flow device	221
11.4	Key issues in using lateral flow devices	224
11.5	Future trends	225
11.6	Conclusions	226
11.7	Sources of further information and advice	227
	References	227
<b>12</b>	<b>Surface plasmon resonance (SPR) sensors for detecting allergens in food</b>	<b>229</b>
	<i>A. E. M. Wammes, F. L. van Delft, J. C. M. van Hest, D. W. P. M. Löwik</i>	
12.1	Introduction	229
12.2	Development of an SPR food allergen biosensor	230
12.3	Applications of SPR for food allergen detection: peanuts	235
12.4	Detection of shellfish toxins with SPR	238
12.5	High-throughput food allergen profiling with imaging SPR	239
12.6	Future trends	241
12.7	Conclusions	242
	References	242
<b>13</b>	<b>Polymerase chain reaction (PCR) methods for detecting allergens in food</b>	<b>245</b>
	<i>T. Holzhauser, M. Röder</i>	
13.1	Introduction	245
13.2	Advantages of PCR for allergen detection	245
13.3	PCR principles and methods	247
13.4	Multi-allergen detection and quantification with PCR	251
13.5	PCR performance characteristics	254
13.6	Conclusions and future trends	259
	References	260
<b>14</b>	<b>Optical thin film biochips for detecting allergens in food</b>	<b>265</b>
	<i>Y. Chen, P. Wang, W. Wang, J. X. Han</i>	
14.1	Introduction	265
14.2	Principles of optical thin film biochips	266
14.3	Applications for detection of allergenic foods	268
14.4	Advantages and disadvantages of optical thin film biosensor chip assays	269
14.5	Future trends	269
14.6	Conclusions	270
	References	270

<b>15</b>	<b>IgE antibody-based analysis for detecting allergens in food</b>	<b>273</b>
	<i>R. G. Hamilton</i>	
15.1	Introduction	273
15.2	General considerations	274
15.3	IgE antibody-based <i>in vivo</i> assay for food allergen potency assessment	275
15.4	IgE antibody-based <i>in vitro</i> assays for food allergen potency assessment	282
15.5	Applications in the detection of peanuts	288
15.6	Allergosorbent competitive inhibition assay: strengths and weaknesses	290
15.7	Future trends	292
	References	292
	Appendix: abbreviations	294
<b>16</b>	<b>Validation, standardisation and harmonisation of analytical methods and test kits for detecting allergens in food</b>	<b>295</b>
	<i>B. Hirst, S. J. Miguel</i>	
16.1	Introduction	295
16.2	Different methods for the detection of allergens in food	295
16.3	Comparing the different methods	297
16.4	Limitations of the different methods and how they can be overcome	299
16.5	Importance of validation and good practices	302
16.6	Challenges of standardisation and harmonisation of analytical methods	305
16.7	Future trends	308
	References	309
	<b>Part Three Case studies: detection and control of specific food allergens</b>	<b>311</b>
<b>17</b>	<b>Detection and control of eggs as a food allergen</b>	<b>313</b>
	<i>S. Sakai, R. Adachi, R. Teshima</i>	
17.1	Introduction	313
17.2	Egg allergy	313
17.3	Egg allergens	318
17.4	Detection of egg allergens	323
17.5	Enzyme-linked immunosorbent assay (ELISA)	325
17.6	Other techniques: western blots, lateral flow and polymerase chain reaction (PCR) devices	329
17.7	Future trends	332
17.8	Conclusion	333
	References	333

<b>18</b>	<b>Detection and control of soybeans as a food allergen</b>	<b>341</b>
	<i>S. L. Taylor, B. C. Remington, R. Panda, R. E. Goodman, J. L. Baumert</i>	
18.1	Introduction	341
18.2	Soybeans and their food uses	342
18.3	Soybean allergy: prevalence and potency	344
18.4	Clinical manifestations and severity of soybean allergy	348
18.5	Soybean allergens	349
18.6	Detection of soy residues	355
18.7	Control of soy residues in food manufacturing facilities	356
18.8	Future trends	357
18.9	Conclusions	358
18.10	Sources of further information and advice	358
	References	359
<b>19</b>	<b>Detection and control of gluten as a food allergen</b>	<b>367</b>
	<i>I. Nasr, J. Messing, I. H. Nasr, P. J. Ciclitira</i>	
19.1	Introduction	367
19.2	Pathogenesis of celiac disease (CD)	368
19.3	Testing of gluten toxicity	370
19.4	Current EU labeling and codex guidelines	370
19.5	Methods for measurement of gluten contamination in foods	371
19.6	Future trends and summary	372
	References	373
<b>20</b>	<b>Detection and control of fish, shellfish and molluscs as food allergens</b>	<b>379</b>
	<i>G. W. K. Wong</i>	
20.1	Introduction	379
20.2	Classification of seafood and seafood protein characteristics	380
20.3	Seafood as allergens	381
20.4	Epidemiology of seafood allergy	382
20.5	Manifestations of seafood allergies	383
20.6	Management of seafood allergies	384
20.7	Summary and future trends	386
	References	386
<b>21</b>	<b>Detection and control of mustard and sesame as food allergens</b>	<b>391</b>
	<i>Y. Chen, Y. J. Wu, T. T. Deng</i>	
21.1	Introduction	391
21.2	Mustard as an allergen	391
21.3	The major allergic proteins in mustard	393
21.4	Detection of mustard allergens and markers in food	394
21.5	Sesame as an allergen	398

---

21.6	The major allergic proteins in sesame	<b>399</b>
21.7	Detection of sesame allergens and markers in food	<b>400</b>
21.8	Future trends	<b>402</b>
	References	<b>402</b>
