Preface	xviii
Acknowledgements	xix

SECTION 1: INTRODUCTION

1	Introduction to Human Immunodeficiency Virus	3
	<i>Tanya Welz, Amanda Samarawickrama, Vivian Pribram, Bavithra Nathan, Lisa Hamzah and Emily Cheserem</i>	
	Key Points	3
1.1	Introduction	3
1.2	Current state of the epidemic	4
1.3	HIV transmission	5
1.4	About the virus	6
1.5	Diagnosis of HIV	8
1.6	Measurement of CD4 cells	8
1.7	Natural history of untreated HIV infection and AIDS	10
1.8	Staging and classification of HIV disease	10
1.9	Monitoring the HIV pandemic	12
1.10	Prevention	13
1.11	Effect of antiretroviral therapy on the HIV epidemic	14
1.12	Stigma	14
	Acknowledgements	15
	References	15
2	Introduction to Nutrition and HIV	18
	<i>Vivian Pribram</i>	
	Key Points	18
2.1	Introduction	18
2.2	Malnutrition, infectious disease and immune function	19
2.3	HIV infection and decreased nutritional status	21
2.4	Nutritional screening and assessment	22
2.5	Metabolic and morphological complications	23
2.6	Paediatric undernutrition and maternal and child health	24
2.7	Healthy eating and management of HIV for well-being and longevity	26
2.8	Management of co-morbidities and serious non-HIV conditions	27
2.9	End-of-life care and ethical issues	29
	References	29

SECTION 2: PAEDIATRIC NUTRITION, MATERNAL AND CHILD HEALTH

3	Malnutrition, Infant Feeding, Maternal and Child Health <i>Theresa Banda, Vivian Pribram, Margaret Lawson, Catherine Mkangama and Gertrude Nyirenda</i>	35
	Key Points	35
3.1	Introduction	35
3.2	Maternal health and nutrition	36
3.3	Mother-to-child transmission	41
3.4	Infant feeding in the context of HIV	43
3.5	Malnutrition in children with HIV	49
	Acknowledgements	55
	Further reading	55
	References	55
4	Paediatric Nutritional Screening, Assessment and Support <i>Lisa Cooke</i>	58
	Key Points	58
4.1	Introduction	58
4.2	Nutritional assessment and screening	58
4.3	Dietary assessment – what to do	61
4.4	Nutritional support	68
	Acknowledgements	71
	References	71
5	Adherence, Symptom Management, Psychological Aspects and Multidisciplinary Care of Children with HIV <i>Daya Nayagam, Paul Archer, Susheela Sababady, Shema Doshi, and Ella Sherlock</i>	72
	Key Points	72
5.1	Transmission of HIV in children and young people	72
5.2	Prevention of mother-to-child transmission (vertical transmission)	73
5.3	Clinical presentation of paediatric HIV infection	73
5.4	Failure to thrive	73
5.5	Central nervous system	74
5.6	Hepatosplenomegaly	74
5.7	Older children	74
5.8	HIV disease and opportunistic infections	74
5.9	Prophylaxis	74
5.10	Antiretroviral treatment for children	75
5.11	Monitoring of paediatric HIV infection	77
5.12	Caring for children and their families in the community	77
5.13	Adherence, symptom management, psychological aspects and multidisciplinary care of children with HIV and AIDS	78
5.14	Nutritional care in a multidisciplinary team setting	81
5.15	The psychological effects of HIV on family functioning – key themes which arise in a child setting	82
	Acknowledgements	85
	References	85

6	Healthy Eating, Prevention and Management of Obesity and Long-Term Complications in Children <i>Julie Lanigan</i>	87
	Key Points	87
6.1	Introduction	87
6.2	Metabolic complications	88
6.3	Malnutrition and HIV	88
6.4	Micronutrients and HIV	88
6.5	Obesity	90
6.6	Lipodystrophy	91
6.7	Assessment and monitoring	94
6.8	Dietary intake assessment	94
6.9	Advice for healthy eating	94
6.10	Conclusion	100
	References	102
SECTION 3: NUTRITIONAL MANAGEMENT OF HIV DISEASE		
7	Decreased Nutritional Status and Nutritional Interventions for People Living with HIV <i>Vivian Pribram</i>	107
	Key Points	107
7.1	Introduction/Background	107
7.2	Malnutrition, weight loss and wasting	107
7.3	Significance of involuntary weight loss	108
7.4	Definitions of HIV-related weight loss and wasting	109
7.5	Prevalence	110
7.6	Aetiology	110
7.7	Nutritional requirements	116
7.8	Nutritional management	117
7.9	Non-nutritional treatments for HIV-related muscle wasting	122
7.10	Micronutrients	125
7.11	Conclusions	128
	Acknowledgements	129
	References	129
8	Nutritional Screening and Assessment <i>Sarah Woodman, Michelle Sutcliffe and Amy McDonald</i>	132
	Key Points	132
8.1	Overview	132
8.2	Nutritional screening in the clinical setting	134
8.3	Nutritional assessment	136
8.4	Biochemical assessment	146
8.5	Clinical assessment	148
8.6	Dietary and lifestyle assessment	150
8.7	Conclusion	153
	Acknowledgements	153
	Further reading	153
	References	153

9	Symptom Control and Management	157
	<i>Louise Houtzager and Tim Barnes</i>	
	Key Points	157
9.1	Symptoms experienced by people living with HIV	157
9.2	Referring patients to a dietitian for symptom control and management	158
9.3	Goals of dietary symptom management strategies	159
9.4	Symptom control and management of diarrhoea	159
9.5	Symptom control and management of loss of appetite	165
9.6	Mouth pain, taste changes and swallowing difficulties	165
9.7	Reflux (heartburn)	170
9.8	Symptom control and management of nausea and vomiting	171
9.9	Symptom control and management of fatigue	171
9.10	Conclusion	174
	Acknowledgements	174
	References	175
10	The Nutritional Management of Complications Associated with HIV and Antiretroviral Therapy	176
	<i>Alastair Duncan and Karen Klassen</i>	
	Key Points	176
10.1	Introduction	176
10.2	Aetiology of metabolic side effects	177
10.3	Prevalence of metabolic side effects	178
10.4	Assessment of metabolic parameters and cardiovascular disease risk	179
10.5	Management of dyslipidaemias	180
10.6	Management of impaired glucose metabolism	185
10.7	Management of altered fat distribution	188
10.8	Altered bone metabolism	193
10.9	Management of lactic acidaemia	199
10.10	Peripheral neuropathy	199
10.11	Routine assessment, dietary and lifestyle management of metabolic complications	200
10.12	Summary	201
	Acknowledgements	206
	References	206
	Further resources	211
11	Community Interventions in Resource-Limited Settings	212
	<i>Claire de Menezes and Kate Ogden</i>	
	Key Points	212
11.1	Introduction	212
11.2	HIV and nutrition in resource-limited settings	213
11.3	Assessment of needs and capacities	215
11.4	Targeting	217
11.5	Nutrition counselling and education	218
11.6	Targeted food supplementation programmes	221
11.7	Support of HIV-positive pregnant women	223
11.8	Breastfeeding and infant feeding support	225
11.9	Support for other vulnerable groups	227

11.10 Treatment of severe acute malnutrition in HIV context	229
11.11 Micronutrient supplementation programmes	230
11.12 Livelihood support and ensuring access to food	230
11.13 Community mobilisation to support people living with HIV	234
11.14 Monitoring	236
11.15 Other issues	237
11.16 Conclusion	238
References	238
SECTION 4: HEALTHY LIVING AND LONG-TERM MANAGEMENT	
12 Medications, Adherence and Interactions with Food	243
<i>Angela Bailey</i>	
Key Points	243
12.1 HIV medications – background	243
12.2 Drug interactions	256
12.3 Micronutrients used in HIV infection	257
12.4 Food and drug interactions	257
12.5 Adherence	261
12.6 Adherence and food	264
12.7 Looking to the future	266
12.8 Conclusion	268
Acknowledgements	269
References	269
13 Healthy Eating and Well-Being	275
<i>Vivian Pribram and Kirsten Foster</i>	
Key Points	275
13.1 Diet, lifestyle and disease prevention	275
13.2 The importance of healthy eating for people living with HIV (PLHIV)	276
13.3 Factors that affect healthy eating and improved well-being among PLHIV	277
13.4 Other lifestyle factors that influence health outcomes	280
13.5 Principles of healthy eating	282
13.6 Portion sizes and quantity of food required	295
13.7 Weight management for people living with HIV	295
13.8 Summary	299
Acknowledgements	299
References	299
14 Exercise and Physical Activity and Long-Term Management of HIV	302
<i>Joanna Lucy Bowtell and Rebecca Weissbort</i>	
Key Points	302
14.1 Introduction	302
14.2 Observational studies	304
14.3 Effect of exercise on immunological parameters	305
14.4 Effect of exercise on wasting	306
14.5 Management of metabolic disturbances with exercise programmes	308

14.6	Effect of exercise on quality of life and physical capacity	312
14.7	Exercise prescription for people living with HIV/AIDS	313
14.8	Practical considerations for exercise prescription	314
14.9	Exercise programme for a patient living with HIV	316
14.10	Conclusion	319
	References	319
15	Mental Health	324
	<i>Shirley Hamilton and Christian Lee</i>	
	Key Points	324
15.1	Introduction	324
15.2	Mental disorders and nutrition	324
15.3	Acute cognitive impairment	325
15.4	Delirium and nutrition	326
15.5	Chronic cognitive impairment	326
15.6	Chronic cognitive impairment and nutrition	327
15.7	Depression	327
15.8	Depression and nutrition	328
15.9	Management of depression	329
15.10	Suicide	332
15.11	Management of suicidal ideation	333
15.12	Mania	333
15.13	Mania and nutrition	333
15.14	Anxiety	334
15.15	Psychosis	336
15.16	Socio-economic factors for mental health/HIV clients affecting nutrition	339
15.17	Personality disorders	340
15.18	Dual diagnosis	340
15.19	Nutritional management of patients with HIV/mental health issues	341
	Acknowledgements	341
	References	342
16	Complementary and Alternative Therapy	345
	<i>Charle Maritz, Sharon Byrne and Vivian Pribram</i>	
	Key Points	345
16.1	Introduction	345
16.2	Safety and regulation of CAT therapy	346
16.3	Use of CAT	346
16.4	Factors influencing use of CAT	347
16.5	CAT use in HIV	347
16.6	Reasons for CAT use among PLHIV	348
16.7	Information sources about CAT	349
16.8	Disclosure of CAT use	349
16.9	Evidence for the use of CAT	349
16.10	Dietary supplements	350
16.11	Dietary supplement use among PLHIV	350
16.12	Knowledge of drug–CAT interactions	351
16.13	Herbal remedies	353
16.14	Addressing patients' use of CAT	356
16.15	Conclusions	356
	References	357

17	Food and Water Safety	360
	<i>Louise Houtzager</i>	
	Key Points	360
17.1	Introduction	360
17.2	Why food and water safety is important for PLHIV	360
17.3	Causes of food- and waterborne illness in PLHIV	362
17.4	Management and prevention of food-borne illness	373
17.5	Conclusion	380
	Acknowledgements	381
	References	381
SECTION 5: THE NUTRITIONAL MANAGEMENT OF HIV AND CO-MORBIDITIES		
18	The Nutritional Management of Patients Living with Tuberculosis and HIV Co-Infection	385
	<i>Louise Houtzager, Tim Barnes and Kirilee Matters</i>	
	Key Points	385
18.1	Tuberculosis	385
18.2	Epidemiology	386
18.3	The relationship between tuberculosis and HIV	387
18.4	Medical issues	388
18.5	Nutrition, HIV infection and TB	390
18.6	Nutrition screening	392
18.7	Nutrition assessment: special considerations in TB	392
18.8	Nutritional treatment/intervention	393
18.9	Recommendations	394
	Acknowledgements	394
	References	394
19	The Nutritional Management of Patients Living with HIV and Renal Disease	396
	<i>Deepa Kariyawasam</i>	
	Key Points	396
19.1	Introduction	396
19.2	Presentation and symptoms	397
19.3	Screening	397
19.4	Diagnosis	397
19.5	Classification of chronic kidney disease	397
19.6	Treatment	398
19.7	Methods of renal replacement therapy	398
19.8	Renal transplantation	399
19.9	Nutritional issues on dialysis	402
19.10	Nutritional assessment	402
19.11	Nutritional requirements	403
19.12	Treatment	403
19.13	Conclusion	409
	Acknowledgements	410
	References	410

20	The Nutritional Management of Patients Living with HIV and Liver Disease	412
	<i>Tracy Russell and Ruth Westwood</i>	
	Key Points	412
20.1	Introduction	412
20.2	Hepatitis B, hepatitis C and HIV	413
20.3	Nutrition and liver disease	415
20.4	Liver transplantation	420
20.5	Nutritional interventions for hepatitis C	420
20.6	HIV and non-alcoholic fatty liver disease	421
20.7	Use of complementary and alternative therapies (CAT) in liver disease	422
20.8	Vulnerable groups	423
20.9	Conclusion	424
	Acknowledgements	424
	References	425
21	Critical Care, Respiratory and Multi-organ Failure	427
	<i>Sarah Cassimjee</i>	
	Key Points	427
21.1	Background/overview	427
21.2	Diseases and infections associated with ITU admission	428
21.3	Sepsis and multiple organ dysfunction syndrome (MODS)	430
21.4	Neurological failure	430
21.5	Cardiovascular failure	430
21.6	Gastrointestinal (GI) failure	430
21.7	Liver failure	430
21.8	Renal failure	431
21.9	Medical treatment	431
21.10	Nutritional considerations	431
21.11	Nutritional assessment	433
21.12	Nutritional requirements	433
21.13	Nutritional treatments/intervention	438
21.14	Early feeding and the use of enteral feeding protocols	438
21.15	Conclusion	439
	References	439
22	Nutritional Management of Patients Living with HIV and Cancer	442
	<i>Rachael Donnelly and Rachel Barrett</i>	
	Key Points	442
22.1	Introduction	442
22.2	Science of cancer	443
22.3	Overview of cancer treatments	444
22.4	Cancers in HIV infection	447
22.5	Nutrition in the management of non-surgical oncology patients	451
	References	454

SECTION 6: PALLIATIVE, END OF LIFE CARE AND NUTRITION

23	Nutrition and End of Life Care	459
	<i>Vivian Pribram</i>	
	Key Points	459
23.1	Introduction	459
23.2	Palliative care	461
23.3	Nutritional care in later stages of progressive illness	462
23.4	Ethical and legal considerations	464
23.5	Withdrawal of nutrition	469
23.6	Implications for practice	470
23.7	Conclusion	470
	Acknowledgements	471
	Further reading	471
	References	471

APPENDICES 473

Appendix 1	WHO Clinical Staging of HIV/AIDS for Adults and Adolescents	475
Appendix 2	Weight-for-Height Reference Card (87 cm and above)	477
Appendix 3	Weight-for-Length Reference Card (below 87 cm)	478
Appendix 4	Guidance Table to Identify Target Weight	479
Appendix 5	Basic Steps in Estimating Energy Requirements for Adults	480
Appendix 6	NICE Guidelines: What to Give in Hospital and the Community	482
Appendix 7	Basic Steps in Estimation of Nitrogen Requirements for Adults (Source: Elia, 1990)	484
Appendix 8	Summary of ESPEN Statements: HIV and Nutritional Therapy	485
Appendix 9	Form for Monitoring Anthropometry Measurements	487
Appendix 10	Equations to Calculate Height and Estimation of Height from Ulna Length	488
Appendix 11	Mid Upper Arm Circumference (MUAC)	490
Appendix 12	Mid Arm Muscle Circumference (MAMC)	491
Appendix 13	Biochemical Reference Ranges	492
Appendix 14	Ways to Improve Adherence to TB Medication	493
Appendix 15	The BCG Vaccination	494
	Index	495
