Preface	ix
Acknowledgements	x
Glossary	xi
Part 1 Introduction and context	1
1 The big picture: The context for a textbook on public health nutrition practice	3
Why develop a public health nutrition textbook?	3
Malnutrition is still the main game	3
Innovative solutions are needed	4
Surely you don't mean these challenges can be found in rich countries like mine?	4
Level of influence	5
Practice informed by a public health approach	5
First, work to understand the causes, by looking upstream	5
Practitioners and politics	6
The philosophy underpinning this book	6
Building capacity for effective public health nutrition action	7
2 Defining public health nutrition as a field of practice	9
Introduction	9
Modes of nutrition practice	10
Definitions of public health nutrition	12
An emphasis on the <i>prevention</i> of food and nutrition problems	12
The core functions of the PHN workforce	15
Competencies for PHN practice	17
Professionalism and PHN practice	18
3 A framework for public health nutrition practice	21
Introduction	21
A socio-ecological approach to practice	21
The PHN practice cycle	22

Recognising the importance of capacity building as a discrete strategy and as an approach to practice	23
Why make things more complicated and introduce a new framework?	25
A bi-cyclic framework for public health nutrition practice	28
Part 2 Intelligence	29
4 Step 1: Community engagement and analysis	31
Introduction	33
What is a community?	33
Why community engagement?	33
Community development constructs	34
Community development – a process or an outcome?	36
Building community capital (and capacity)	37
Building capacity via ‘bottom-up’ practice	38
Community analysis	40
5 Step 2: Problem analysis	43
Introduction	45
Public health intelligence	45
What is problem analysis?	46
Types of need	47
Conducting a problem analysis	47
Different methodological approaches to gather intelligence for problem assessment	51
Applying the intelligence and analysis results	53
6 Step 3: Stakeholder analysis and engagement	57
Introduction	59
Why stakeholder engagement?	59
Stakeholder analysis	60
Considerations for stakeholder analysis	60
Conducting the stakeholder analysis	61
Organising and presenting stakeholder analysis data	63
Stakeholder engagement	67
Engaging stakeholders in decision-making	67
7 Step 4: Determinant analysis	71
Introduction	73
Analysing determinants	73
Characterising determinants by their effect	74
Characterising determinants by the type of causal link	75
Characterising determinants by level	76
Determinant interaction and causal pathways	77
Diagrammatic illustration of determinant analysis	79

8 Step 5: Capacity analysis	81
Introduction	83
What is capacity?	83
A framework for capacity building practice	84
Capacity assessment for capacity building	84
Challenges in measuring capacity	86
Selecting tools for capacity analysis	86
Tools and strategies for analysing capacity	89
Presenting capacity analysis data	96
9 Step 6: Mandates for public health nutrition action	99
Introduction	101
Mandates for action – the policy context	101
Policy development – an overview	102
The challenge of competing policy agendas	103
National food and nutrition policies	104
Mandates for action – direct relevance to PHN practice	104
10 Step 7: Intervention research and strategy options	107
Introduction	109
Strategic frameworks for health promotion	109
Determinants as leverage points for intervention	113
Levels of intervention	113
Settings as a focus for intervention	113
Target groups as a focus for intervention	115
Intervention research: learning from earlier work	116
Abstracting intelligence from intervention research	117
11 Step 8: Risk assessment and strategy prioritisation	121
Introduction	123
Assessing risks and benefits	123
Types of risks and benefits	125
Strategy prioritisation	125
Challenges and dilemmas in strategy prioritisation	126
Methods for strategy prioritisation	127
Part 3 Action	137
12 Step 9: Writing action statements	139
Introduction	141
Intervention planning	141
Action statements	142
Linking problem and determinant analysis to action statements	142

Writing intervention goals	144
Writing intervention objectives	145
13 Step 10: Logic modelling	151
Introduction	153
What is a logic model?	153
Types of logic model	154
Logic model elements	155
Logic modelling in PHN practice	156
Developing a logic model	157
Key questions for reviewing logic models	157
14 Step 11: Implementation and evaluation planning	161
Introduction	163
Engaging stakeholders in intervention and evaluation planning	163
Planning for intervention implementation	164
Developing work package plans	166
Work scheduling – developing a Gantt chart	168
Developing intervention budgets	169
Evaluation planning	172
Levels of evaluation	173
Developing evaluation indicators and plans	175
15 Step 12: Managing implementation	179
Introduction	181
Types of PHN intervention implementation	181
Governance	182
Managing risk	185
Partnership satisfaction	186
Evaluability assessment	188
Part 4 Evaluation	191
16 Step 13: Process evaluation	193
Introduction	195
Evaluation – a brief overview	195
Linking evaluation to planning	196
Qualitative and quantitative approaches to evaluation	196
Levels of evaluation	197
Process evaluation	197
Elements of process evaluation	198
Methods for conducting process evaluation	202
Process evaluation indicators	202
Process evaluation in practice – some published examples	206

17 Step 14: Impact and outcome evaluation	207
Introduction	209
Impact and outcome evaluation – what is the difference?	209
When to evaluate?	210
Key measures of impact and outcome evaluation	211
Reliability and validity in evaluation	214
Sampling and data analysis	215
Evaluation design	218
18 Step 15: Evaluating capacity gains	221
Introduction	223
Challenges in measuring capacity	223
Pre- and post-intervention comparisons	226
Strategies to enhance the trustworthiness of capacity evaluation	227
Visual presentations of capacity evaluations	228
19 Step 16: Economic evaluation	231
Introduction	233
Costs and consequences in health care	233
Characteristics of economic evaluation	233
Types of economic evaluation	234
Conducting an economic evaluation	237
Efficiency vs. equity	237
20 Step 17: Reflective practice and valorisation	243
Introduction	245
What is reflective practice?	245
Transformatory learning and reflective practice	245
Improving practice through reflection	245
Stages of reflective practice	246
Methods of reflective practice	246
Tools for reflective practice	248
What is valorisation?	249
Targets of valorisation	250
Methods of valorisation	250
Presenting intervention results	253
Appendices	257
1 Intervention plan template	259
2 Capacity building analysis tool	267
References	277
Index	284
